Ounce of Prevention is Worth a Pound of Cure

WELCOME TO ALANTRA

Alantra has earned a good name as a leading health and wellness brand in the industry.

It works rigorously towards furnishing the market with a range of wellness products grown organically in company owned farmlands under careful supervision. Based in Rajasthan where majority of the production takes place. Herbs, raw materials and fruits chiefly Amla, Aloe vera. Ashwagandha, Shatavari, Tulsi, Neem, Lemon, Kinnoo, Stevia, Giloy, Cissus etc. are cultivated organically .

Alantra pledging by its name presents . “ Complete and Powerful” , the entire range of these products is intended towards the improvement of immunity, aiding of the detoxification process and replenishing the nutrients of the body. The products are made available in their purest form and are highly effective. The processing unit is located at the farming premises itself to make the instant utilization of fresh produce in the manufacture of all Alantra products.

Our factory producing all these products is located in the city of JAIPUR, State of Rajasthan. Complete manufacturing set up is of 6000sq.ft., ensuring the high level of purity and the quality product.

OUR MISSION

Our mission is to keep on researching and developing the Natural way to keep human young. By this goal we promise to all the consumers the best quality the best services we can ever provide to roil at all times. We will make sure that all the consumers will achieve the same results as they use our products and be very satisfy at all times.

All the products, manufactured and marketed are backed up with clinical data. The active principles in these products are time tested and well documented in the Ayurvedic Science. While the whole world is attempting to be in harmony with nature to lead a more eco friendly way of life, we are committed to serve mankind with high quality products. In producing these products endeavors to meet the burgeoning demand world wide for herbal formulations through dedicated research and scientific application.
