Herbs perennial. Plants usually with rhizomes, rarely without. Culms usually erect. Leaf sheath split almost to base; ligule leathery-membranous; auricles lanceolate or crescent-shaped; leaf blade usually glaucous, usually rolled, rarely flat, stiff, harsh. Inflorescence spikelike, linear, rarely oblong-ovate; rachis tough. Spikelets in regular rows of (1 or)2 or 3(–6) per node, sessile, all similar, with (1)–3–7 florets; rachilla disarticulating above glumes and between florets. Glumes opposite or side-by-side, linear to lanceolate, 1–3(–5)-veined, veins not raised (except in *L. mollis*), not keeled or keeled almost to base, apex acute to shortly awned.
