BioOne Complete (complete.BioOne.org) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

VERNACULAR NAMES AND USES OF PLANTS IN NORTHERN KENYA

Jonathan Timberlake¹
National Herbarium
Box 8100, Causeway, Harare Zimbabwe

ABSTRACT

A list is presented, derived from published and unpublished accounts, of plant vernacular names and uses from the Pokot, Turkana and Marakwet peoples of north western Kenya. Uses are classified under medicinal, human food, human domestic use and livestock fodder. The knowledge and utilization of the flora is seen to be extensive, with 92% of the 888 species recorded having a vernacular name. About 46% of plants are used medicinally by at least one group of peoples, about 24% can be eaten by humans, about 23% are used for domestic purposes and 43% are eaten by domestic livestock.

INTRODUCTION

Various publications in recent years have included indigenous plant names and uses from tribal groups of northern Kenya, e.g. the pastoral Pokot of East Pokot (Timberlake, 1987), the agricultural Pokot of the Kerio Valley (Tanaka, 1980; Timberlake, 1987), the Turkana west and south of Lake Turkana (Morgan, 1980, 1981), and the Marakwet of Elgeyo, Marakwet district (Lindsay, 1978). The book on medicinal plants by Kokwaro (1976) also includes some names from these areas. The data from these six publications are here presented in a more readily utilizable format.

The area covered includes parts of Baringo Turkana, West Pokot and Elgeyo-Marakwet Districts, all in Rift Valley Province. Most of the area falls within the ecoclimatic zones 5 and 6 of Pratt & Gwynne (1977), and ranges in altitude from 2,700 m on the slopes of the Cherangani Hills to below 600 m close to Lake Turkana. There are some hill ranges, e.g. Tiati, and the Kerio Valley runs through part, but generally the landscape is a dry plain with *Acacia* savanna or bushland. Various seasonal rivers run through the area, some are fringed by *Acacia* woodland, while the hills, occasionally rising to 2,500 m, often have a different and richer flora. Soils are mostly volcanic

METHOD

All plant species mentioned in the above publications are listed, whether or not a name or use was noted. The plant species and uses are recorded for differing purposes, so do not necessarily provide comprehensive coverage. The collections described by Timberlake (1987) and Morgan (1980, 1981) are probably the most comprehensive, covering both wet and dry seasons and full range of uses. Plants described by Lindsay (1978) were restricted to those of medicinal interest only. In most cases voucher specimens were collected and their vernacular names and uses

¹ Present address: 3, Rue des Fleurs, Fortune Gate, Bulawayo, Zimbabwe

obtained from reliable local informants. Specimens were later identified at the East African Herbarium, Nairobi, or the Kew Herbarium, London.

There are various problems associated with collecting ethnobotanical information, not least of which are the knowledge and reliability of the informant, the use of singular and plural names, names associated with aspects of the plant rather than its 'true' name, and the use of names from other areas which, because they are recorded in a certain area, are thought to be indigenous to it. Different authors have different approaches to overcoming these, and brief discussions on these points can be found in Morgan (1980) and Timberlake (1987). The present list includes all names recorded (with the exceptions given by Timberlake *op. cit.* for his list), and no attempt has been made to correct orthographic differences or separate plural from singulars.

Plants are arranged firstly by division (pteridophytes, gymnosperms and angiosperms, the latter subdivided into monocotyledons and dicotyledons), then by family in alphabetical order. Within each family species are listed alphabetically, and synonyms noted. Vernacular names are given for the three linguistic groups—Pokot, Turkana and Marakwet.

Uses of plants are divided into four categories—medicinal (including spiritual), human food, domestic (house construction, household utensils, personal ornaments, *etc.*), and livestock fodder. The use of a species by each tribal group for one of these purposes is noted along with the source of information.

DISCUSSION

The list shows a widespread knowledge and use of plants by all tribal groups. Out of 888 species recorded (ten pteridophytes, two gymnosperms, 158 monocotyledons and 718 dicotyledons) 821 (92%) had a vernacular name, although some names were generic and applied to similar members of the same genus or family.

Many plants were used for medicinal purposes (407 species, 45.8% of the total, although this high percentage partly reflects the greater interest in this category of use by the observers and that the Marakwet list is only of medicinal plants), 212 species (23.9% of the total) were used for human food (mostly fruits), 202 species (22.7% of the total) for domestic purposes, and 382 (43.0% of the total) for livestock fodder. This last figure however is perhaps not very indicative as the livestock in the area, which includes browsers and grazers, are known to eat a great range of plant material when confronted with necessity, and also because of less rigorous recording of this category of use.

ACKNOWLEDGEMENTS

Thanks go to Jean Brown, formerly of the National Museums of Kenya, who first introduced me to ethnobotany, and to Jan Gillett of the East African Herbarium for early encouragement. I am most grateful to Christine Kabuye and staff of the East African Herbarium for identification of the Pokot material. Particular thanks are due to Bob Drummond of the National Herbarium, Harare, Zimbabwe, who spent many hours checking species nomenclature and bringing it up to date (1990).

SANTALACEAE

- Osyris lanceolata* Hochst. & Steud. (= *O.*
abyssinica of Timberlake)
 Pokot: mormorwo (M)
 Marakwet: jemokabil (M)
 Source: 1, 3

SAPINDACEAE

- Allophylus africanus* Beauv.
 Pokot: chepkokai, chepokony (L)
 Source: 1
Allophylus alnifolius (Bak.) Radlk.
 Pokot: chepkokai

Source: 1

Cardiospermum corindum L.

Pokot: tilion (DL)

Turkana: ngitiriam (D)

Source: 1, 2

Cardiospermum halicacabum L.

Turkana: etiriamit (DL)

Source: 2

Dodonaea angustifolia L. (= *D. viscosa* of
Timberlake, Lindsay, Tanaka)

Pokot: topolokwo (DL)

Marakwet: tabilikwa (M)

Source: 1, 3, 4

Haplocoelum foliolosum (Hiern) Bullock

Pokot: mariokwo (DL)

Source: 1

Pappea capensis Eckl. & Zeyh.

Pokot: puriokwo (MF)

Source: 1, 4

SAPOTACEAE

Manilkara mocharia (Bak.) Dubard

Pokot: noswo, sopomonan (MF)

Source: 1, 4

Mimusops kummel A.DC.

Pokot: chepolakutanian (MF)

Source: 1, 4

Mimusops sp

Pokot: ngengechwa (F)

Source: 4

SCROPHULARIACEAE

Anticharis linearis Aschers.

Turkana: ewasinaiken (L)

Source: 1, 2

Aptosimum pumilum Benth.

Turkana: akule-nachi

Source: 2

Craterostigma pumilum Hochst.

Pokot: tabach

Source: 1, 4

Ghikaea speciosa (Rendle) Diels

Pokot: psalua, cheptoya (FD)

Source: 1

SIMAROUBACEAE

Harrisonia abyssinica Oliv.

Pokot: mukurkona (MF)

Marakwet: kapkerelwa (M)

Source: 1, 3, 4

SOLANACEAE

Datura stramonium L.

Pokot: ponponuo, kmonuo, topsis,
chepowaisha (D)

Turkana: ebune

Source: 1, 2, 4

Lycium shawii Roem. & Schult. (= *L.*

europaeum of Timberlake, Morgan,
Tanaka)

Pokot: pkata, kipkata, chepkata (MF)

Turkana: ekabekebeke

Source: 1, 2, 4

Nicotiana tabacum L.

Marakwet: timote (M)

Source: 3

Solanum aculeastrum DuRoi

Marakwet: sikawa (M)

Source: 3

Solanum anguivi Lam. (= *S. indicum* of
Kokwaro)

Marakwet: jibokemnerkeny (M)

Source: 5

Solanum coagulans Forssk. (= *S. dubium* of
Timberlake, Morgan, Kokwaro)

Pokot: lopotwo

Turkana: esikilele (FL)

Marakwet: ketbon (M)

Source: 1, 2, 5

Solanum hastifolium Dunal

Pokot: adokomuroi, ngaisilion,
kipkata (ML)

Turkana: lodongamuroi (ML)

Source: 1, 2, 4

Solanum incanum L.

Pokot: lopotwo (MDL)

Turkana: etulelo (ML)

Marakwet: labotwa, jebokimnerkeny (M)

Source: 1, 2, 3, 4, 5

Solanum nigrum L.

Pokot: ksoya (F)

Turkana: (FL)

Source: 1, 2, 4

Solanum renschii Vatke

Pokot: lopotwo-kanter, karamires,
adokomuroi (M)

Marakwet: ketbor (M)

Source: 1, 3

Withania somnifera (L.) Dunal

Pokot: akakagh (M)

Turkana: emotoe

Marakwet: kipkogai (M)
