## About Chelsea Nursery

We are a small nursery, located in Western Colorado, dedicated to the production of xeric and native plant materials. We fell in love with native and xeric plants years ago, while working in the Denver area. Our love for these elusive and sometimes difficult to grow plants has continued throughout the years. During those years we have faced several challenges in the production and propagation of these plants, and we look forward to more years of challenges!

We are often asked, what defines a native plant? Some people feel that a true native plant should be from Colorado alone. We feel that such boundaries would restrict the use of other beautiful and resourceful plants. We define native plants as plants growing naturally in the Rocky Mountain Region.

We are also commonly asked, what is a xeric plant? Xeric plants require less water because they are more adapted to our arid climate. They require only periodic deep watering once established. It is also important to remember that they do need additional water until then. In the catalogue, we list the water usage by plants as: Moist; needs water weekly or more often during the heat of summer. Medium; needs water weekly to bi-weekly during hot, dry periods. Dry; needs water every 2-4 weeks during hot, dry periods. Very dry; could probably survive with no extra water once established, but would benefit by a monthly deep watering during the heat of summer.

The plants we have listed in this catalogue are not always available. Some are grown only in small numbers because of limited demand, or because of their difficulty to grow. Sometimes the demand outpaces what we do grow. In either case, we do our best to grow all of these plants.

We sincerely thank you for your patronage!

## Shrubs

### *Agave lechuguilla*

### Shin Dagger

This is a medium sized Agave with blue green, evergreen toothed leaves. This is a colony forming shrub, so give plenty of growing room.

Ht: 1-2'

Mature Spread: 2-4'

Shape: Spike

Flower Color: Yellow

Hardiness: Zone 6

Full Sun

Very Dry

### *Agave parryi*

### Parry's Agave

This is an evergreen compact shrub with stiff blue green leaves. Works well as an accent plant. Don't expect blooms for many years. When it does bloom, the original rosette will die, leaving some new "pups" to carry on.

*Agave parryi*

*Parry's Agave*

Ht: 1-2'

Mature Spread: 2-3'

Shape: Spike

Flower Color: Yellow

Hardiness: Zone 5

Full sun

Very Dry

### *Agave neomexicana*

### New Mexico Agave

This is an evergreen shrub with bluish-green spike like leaves. It is sometimes listed as a subspecies of Parry's Agave.

Ht: 1-2'

Mature Spread: 2-3'

Shape: Spike

Flower Color: Yellow

Hardiness: Zone 5

Full sun

Very Dry

*Amelanchier alnifolia*Saskatoon Serviceberry

This tall shrub has white flowers in the spring followed by sweet blue purple berries in the fall. The berries are loved by birds and great for jams.

*Amelanchier alnifolia**Saskatoon Serviceberry*

Ht: 10-12'

\*Native\*

Mature Spread: 6-12'

Shape: Open Vase

Flower Color: White

Hardiness: Zone 2

Full Sun

Medium to Dry

*Amelanchier utahensis*Utah Serviceberry

This tall shrub has white fragrant flowers in the spring followed by bluish black berries. The leaves have a blue green hue. Great for birds and extremely drought tolerant.

*Amelanchier utahensis* *Utah Serviceberry*

Ht: 6-12'

\*Native\*

Mature Spread: 6-12'

Shape: Upright Vase

Flower Color: White

Hardiness: Zone 4

Full Sun

Very Dry

*Amorpha canescens* Leadplant

This is a medium sized shrub with delicate lacy leaves and purple flowers with orange anthers in late summer. Be forewarned it is the last plant to leaf out in the spring. This beautiful plant is native throughout the plains states.

*Amorpha canescens*

*Leadplant*

Ht: 3-4'

\*Native\*

Mature Spread: 3-4'

Shape: Open Vase

Flower Color: Purple

Hardiness: Zone 4

Full Sun

Dry

*Amorpha nana* Dwarf Leadplant

This is a graceful compact shrub with delicate green fern like leaves and fragrant pink flowers with orange anthers. They bloom in late spring to early summer. Like its relative *A. canescens* it is also late to leaf out in the spring.

*Amorpha nana* *Dwarf Leadplant*

Ht: 1-3'

Matured Spread: 2-3'

Shape: Open Vase

Flower Color: Pink

Hardiness: Zone 4

Full Sun

Dry

*Arctostaphylos x coloradoensis* **Cascade Manzanita**

This is a low growing cascading evergreen shrub with dark glossy green leaves and tiny pink flowers in early spring. It has very attractive cinnamon-red bark color. They prefer well drainage neutral to acidic soils.

Ht: 1-2'  
 Mature Spread: 3-4'  
 Shape: Low Spreading  
 Flower Color: Pink  
 Hardiness: Zone 4  
 Sun to Part Shade  
 Dry

*Arctostaphylos x coloradoensis* **Chieftain Manzanita**

This an upright form of Manzanita it is a broad leaf evergreen shrub with very attractive cinnamon red to purple bark. They have white to pink flowers in late winter. They prefer well drained neutral to acidic soils.

Ht: 3-4'  
 Mature Spread: 8-10'  
 Shape: Upright  
 Flower Color: White to Pink  
 Hardiness: Zone 4  
 Sun or Shade  
 Dry

*Arctostaphylos x coloradoensis* **Panchito Manzanita**

This is a low growing evergreen shrub with glossy green leaves and small pink flowers in early spring. It has a very attractive red bark color. They prefer well drained neutral to acidic soils.

Ht: 1-2'  
 Mature Spread: 3-5'  
 Shape: Low Spreading  
 Flower Color: Pink  
 Hardiness: Zone 4  
 Sun to Part Shade  
 Dry

*Arctostaphylos x coloradoensis*

**Mock Bearberry** Plant Select®

This is a dense rounded evergreen with cinnamon-red to purplish exfoliating bark. Pinkish white flowers in April to May, followed by small red berries in fall.

*Arctostaphylos sp.*

## Winter Hardy Cacti

When Stacey bought some hardy cactus from a place in Kansas back in the early 1990's, I thought she was loony. Now, in 2010, we have all these wonderful varieties and are always looking for more unique ones. Many thanks to Don Campbell and our friends at the Chinle Cactus and Succulent Society.

### *Cylindropuntia acanthocarpa* Buckhorn Cholla

This is a large shrub like cactus with branches that resemble buck antlers. The flower color can vary; ours have a greenish yellow flower.

Ht: 6'  
 Mature Spread: 4-6'  
 Shape: Upright  
 Flower Color: Yellow  
 Hardiness: Zone 5  
 Full Sun  
 Very Dry

### *Cylindropuntia davisii* Devil's Cholla or Thistle Cholla

This is a tall shrub like cacti with long golden spines and greenish yellow flowers. The spines glow in the sun.

*Cylindropuntia davisii* Devil's Cholla

Ht: 4-5'                      \*Native\*  
 Mature Spread: 4-6'  
 Shape: Upright  
 Flower Color: Yellow  
 Hardiness: Zone 5  
 Full Sun  
 Very Dry

### *Cylindropuntia davisii x kleiniae* Gold Spined Cholla

We think this cholla is a cross between *C. davisii* and *C. kleiniae*. This hybrid has slender stems, gold spines, and a more upright habit than the Devil's Cholla, yet it has the same yellow flowers.

Ht: 5-6'  
 Mature Spread: 4-6'  
 Shape: Upright  
 Flower Color: Yellow  
 Hardiness: Zone 5  
 Full Sun  
 Very Dry

*Cylindropuntia imbricata* Tree Cholla

This is a tall shrub like cacti with light green stems in summer then turns purple in winter. The flowers are deep rose violet followed by large yellow fruits.

*Cylindropuntia imbricata*

Tree Cholla

Ht: 5-8'

\*Native\*

Mature Spread: 6'

Shape: Upright

Flower Color: Magenta

Hardiness: Zone 4

Full Sun

Very Dry

*Cylindropuntia imbricata* 'White Tower' White Flowered Tree Cholla

This is a tall shrub like cacti with deep green stems and white flowers in the spring.

*Cylindropuntia imbricata* White Flg. Tree Cholla

Ht: 5-6'

\*Native\*

Mature Spread: 6'

Flower Color: White

Hardiness: Zone 5

Full Sun

Very Dry

*Cylindropuntia imbricata x whipplei* Pink Flowered Tree Cholla

This is a medium sized shrub like cacti with bright pink flowers. Similar to the tree Cholla but not as tall.

*Cylindropuntia imbricata x whipplei* Pink Flg. Tree Cholla

Ht: 4- 5'

\*Native\*

Mature Spread: 4-6'

Shape: Upright

Flower Color: Pink

Hardiness: Zone 5

Full Sun

Very Dry

*Cylindropuntia leptocaulis* Christmas Cholla

This is a very thick bushy cholla with very slender stems. Small yellow/green flowers give way to small fruits that become bright red like bulbs on a Christmas tree.

*Cylindropuntia leptocaulis*

Ht: 2-3'

Mature Spread: 4-5'

Shape: Spreading

Flower Color: Yellow

Hardiness: Zone 6

Full Sun

Very Dry

*Cylindropuntia kleiniae* Pencil Cholla

This is a slender shrub like cacti with pencil shaped light green stems. The flowers are pink to purple and the fruits are an orange color.

*Cylindropuntia kleiniae* Pencil Cholla

Ht: 4-5'                      \*Native\*  
 Mature Spread: 4-5'
