Barr's "Gold Medal" Daffodils

AWARDED

One hundred & Forty-one Gold Medals, Four Silver Challenge Cups and Four R.H.S. Silver Cups for New Seedling Daffodils.

Also many First-class Certificates and other high awards.

We have been awarded for New Seedling Daffodils—

The Engleheart Challenge Cup by the Royal Horticultural Society as First Prize for 12 Best Seedling Daffodils not in commerce.

The Walter Ware Challenge Cup for the Best New Triandrus Hybrids.

The R.H.S. Silver Standard Cup for the best 12 New Seedling Daffodils.

R.H.S. First Prize for the 12 Best Seedling Daffodils in Commerce.

Our Exhibits of Daffodils received the following High Awards for Excellence during the Spring of 1936:

- Mar. 17th. Gold Medal, awarded at the Bournemouth Spring Show.
 „ 19th. Gold Medal, awarded at the Taunton Spring Show.
 April 1st. Gold Medal, awarded at the Tamar Valley Show, Plymouth.
 „ 15th. Gold Medal, awarded at the Torquay Spring Show.
 „ 16th. Silver Gilt Medal, awarded at the London Daffodil Show.
 „ 18th. Gold Medal, awarded by Tewkesbury Daffodil Society.
 „ 22nd. Gold Medal, awarded at the Truro Show.
 „ 22nd. Gold Medal, awarded at the Birmingham Daffodil Show.

New Hybrid Nerines

Nine Silver and Silver-Gilt Medals Awarded by the R.H.S.

The most beautiful and easiest grown of Autumn-flowering bulbs for cool greenhouse. For descriptive list and full cultural directions, see page 30.

CULTURE AND ADAPTATION OF THE DAFFODIL OUTDOORS.

Soil and Manures.—Daffodils will thrive in any well-cultivated garden soil, but prefer a good deep well-drained loam. In preparing the ground for planting, dig deeply, and if well-rotted stable or cow manure is available, this may with advantage be dug in 15 to 18 inches deep so as not to be in immediate contact with the bulbs. *Fresh stable manure should on no account be used.* Where cow or well-rotted stable manure is not available a good compound manure should be used such as our Phytobroma, *see page 32* (which contains, in suitable proportions, Steamed Bone Flour, Sulphate of Potash, Superphosphate of Lime, etc.), and be forked into the ground before or at planting time at the rate of 3 oz. per square yard; Phytobroma is a perfectly safe complete manure, suitable for heavy or light soils, and the best general manure for all bulbs, encouraging vigorous root action and subsequent good bloom.

In February as soon as the foliage is visible Daffodil Beds should be hoed and given a surface dressing of our Phytobroma at the rate of 3 oz. to the square yard. In the case of bulbs which have not been lifted we recommend a surface dressing, well hoed in, of Phytobroma in October or November, and again in early Spring. These dressings should also be given to Daffodils naturalised in grass: soil fertility must be maintained if bulbs are to continue to flourish and flower well. *For Price see p. 32.*

Time and Depth to Plant.—Daffodils are best planted as early in Autumn as possible (especially Poeticus varieties), although we have planted the stronger growing sorts as late as the end of December and obtained excellent blooms. Depth of planting depends on the size of the bulbs; a good rule to follow on heavy and medium soils is to cover the bulb with soil once and a half to twice its own depth, measuring the bulb from base to shoulder, and at least twice its own depth on light soils. Thus a Daffodil bulb measuring 2 inches from base to shoulder should be covered with 3 to 4 inches of soil. Some of the stronger growing sorts, such as Emperor, Empress, Incomparabilis Sir Watkin and Barrii Conspicuus, also the Poeticus varieties, may with advantage be planted deeper.

Freshly dug soil should be allowed to stand vacant two or three weeks before planting, or some of the bulbs may sink below their proper depth, causing irregularity in growth and flowering.

Naturalising Daffodils in Grass, etc.—All Daffodils are suitable for naturalising, but in heavy soils, preference should be given to the stronger growing sorts. To produce the best effect Trumpet, Chalice-cup, and Poeticus varieties should be grouped separately; we offer mixtures of these groups separately on page 5. Daffodils are admirably adapted for grassy slopes and banks, where they should be freely planted.

In planting bulbs *in grass*, **Barr's Bulb Planter** (*see page 32*) should always be used. It cuts out a clean piece of turf, leaving a hole to receive the bulb, and on making the second cutting clears itself of the first piece of turf, which lies ready at hand for filling in the first hole. This handy implement saves an immense amount of time, and does not, as with an ordinary dibber, leave a hard resting place for the bulb, while by its use *the grass is not in the least disturbed.* Planting is best done after the first autumn rains. If the ground is poor, a compost of fresh soil with *Phytobroma* (1 lb. to a bushel) should be made and dropped into each hole before placing the bulb. Cut the grass as late in autumn as possible, so as to ensure it being short at the time the bulbs flower. In meadowland Daffodils in no way affect the hay crop, which may be cut at the usual season.

CULTURE OF DAFFODILS IN POTS OR BOXES.

Daffodils should be potted in September or October in a compost of good sweet fibrous loam and well-decayed cow manure or leaf soil, with a sprinkling of sharp silver sand, adding 1½ lbs. of steamed bone flour or 1 lb. of Phytobroma to every bushel of soil, mixing well together before using. The pots should be carefully washed and allowed to dry before using; new pots should be well soaked. Good drainage should be secured by placing pieces of charcoal or crocks over the drainage hole, covering the charcoal or crocks with a little rough fibre from the loam. When boxes are used, the slit at bottom of box should be covered with pieces of charcoal, and a good layer of rough fibrous loam or leaf soil placed on this to ensure perfect drainage.

After potting, stand the pots or boxes outside, on a firm bottom, such as a bed of well-weathered ashes or gravel to prevent entrance of worms. They should then be completely covered with Peat Fibre, the top of the pots being at least 2 inches below the surface of the covering material. This will secure a natural and moist condition to the bulbs and encourage root action.

The pots or boxes should remain plunged for ten or twelve weeks in order that the bulbs may get well rooted, when they should be removed indoors for succession, selecting first those which bloom naturally early. *On no account should bottom heat be given.* A frequent mistake made in forcing bulbs is that they are removed from the plunging-bed and subjected to heat too early, before they have made sufficient root growth, and failure is the result. It is a good plan, when bulbs are removed from the plunging-bed, to place an inverted flower-pot over them for a day or two to prevent any check to the young top growths from draughts or too sudden exposure to light. Weak liquid manure-water (1 oz. of Phytobroma to a gallon of water) may then be given once a week until the bulbs come into flower. Those that are wanted in bloom early, may, after the flower buds are advanced, be placed in a warmer temperature, such as a slow forcing-house, but this should never exceed 65° if fine blooms are desired. The plants should always be kept as near to the glass as possible and not allowed to get drawn, from insufficient light or air.

COLLECTIONS OF DAFFODILS

Barr's 25/- Collection of Garden Daffodils.

The following varieties are all beautiful in the flower border, and the selection embraces early and late varieties, giving a good succession of bloom.

ALL EXTRA STRONG SELECTED BULBS.

6 King Alfred	6 Incomparabilis Lucille	6 Leedsii White Lady
6 Van Waverens Giant	6 " Croesus	6 Jonquilla Golden Sceptre
6 Bicolor Empress	6 Barrii Fair Maiden	6 Poetaz Cheerfulness
6 " Spring Glory	6 " Lady Moore	6 Poeticus Cassandra
6 Mrs. E. H. Krelage	6 " Red Beacon	6 " Homer
6 Incomparabilis Bernardino	6 Leedsii Lord Kitchener	6 The Pearl (double)

3 Bulbs each of the above 18 varieties for 12/6

Barr's 30/- Collection of Daffodils for Pot Culture.

The following Daffodils can be specially recommended for pot culture, and by gentle forcing a succession of bloom may be had through February and March, the selection containing early and later-flowering varieties. If after flowering they are turned out of pots and carefully planted out (the ground being well watered previously, should it be dry) they will mostly flower well outdoors the following season. *For Cultural Directions see page 2, and pages 2 and 3 of our General Bulb Catalogue.*

ALL EXTRA STRONG SELECTED BULBS.

6 Cornelia	6 Incomparabilis Casimir	6 Queen of Spain
6 King Alfred	6 " Croesus	6 Odorus rugulosus
6 Madame de Graaff	6 Barrii Fair Maiden	6 Poetaz Cheerfulness
6 Mrs. E. H. Krelage	6 " Lady Moore	6 " Klondyke
6 Bicolor Victoria	6 Leedsii Evangeline	6 Poeticus ornatus maximus
6 Incomparabilis Bernardino	6 " Lord Kitchener	6 " Horace
	6 " Southern Gem	6 Argent (double)

3 Bulbs each of the above 20 varieties for 15/-

3 Bulbs each of 12 varieties (our selection), 8/6

Barr's 21/- Collection of Daffodils for Bowl Culture.

For growing in bowls in our Peat-fibre Mixture. *For Cultural Directions see page 3 of Bulb Catalogue.*

ALL EXTRA STRONG SELECTED BULBS.

6 King Alfred	6 Incomparabilis Bernardino	6 Leedsii Lord Kitchener
6 Obvallaris	6 Barrii Red Beacon	6 Orange Glory (Cyclamineus hybrid)
6 Alice Knights	6 " Seagull	6 Odorus Campanelle
6 Bicolor Empress	6 Jonquilla Golden Sceptre	6 Poetaz Cheerfulness
6 " Spring Glory	6 Leedsii Evangeline	6 " Elvira

3 Bulbs each of the above 15 varieties for 10/6

Barr's Collections of Daffodils for Exhibition.

Consisting of the most reliable varieties for exhibiting at the Spring shows.

3 Bulbs each of 12 Exhibition varieties 15/-, 21/- and 42/-

6 " " " 12 " " " 25/-, 42/- and 63/-

DAFFODILS RECOMMENDED FOR FORCING.

The following varieties may be easily brought into bloom by February by gentle forcing.

For Cultural Directions see page 2, and pages 2 and 3 of General Bulb Catalogue.

In addition to the above we recommend all the Polyanthus Narcissi offered on page 25.

Barr's Mixtures of Daffodils and Narcissi.

For the Flower Border.

Barr's Flower Border Mixture, an exceptionally fine mixture of YELLOW, BICOLOR *s. d.* and WHITE TRUMPETS, INCOMPARABILIS, BARRII, LEEDSII, CAMPANELLE JONQUILS and POET'S NARCISSI, including also many fine unnamed new varieties, all suitable for massing in the Flower Border or large Beds.

Strong flowering bulbs, per 1,000, 100/-; per 100, 10/6; per doz. 1 6

Barr's Red-Cup Mixture, composed of showy red-cup varieties of Incomparabilis and Barrii varieties in mixture, charming for Flower Beds and Borders, also suitable for naturalising.....*Strong flowering bulbs*, per 100, 15/-; per doz. 2 3

The Backhouse Red-Cup Mixture, a very striking and extremely showy mixture of unnamed hybrids from the famous Backhouse collection, composed entirely of giant red-crowned Incomparabilis and Barrii varieties. *Strong flowering bulbs*, each, 1/-; per doz. 10 6

Miniature Daffodils for the Rock Garden.

The following are charming little subjects for the rock garden, where their dainty flowers are seen to perfection. They should be left undisturbed for years, and, if happy, will soon establish themselves and afford a lovely picture in early spring. *Bulbocodium citrinus* and *conspicuum*, also *Cyclamineus*, like moisture, and should therefore be planted in a moist situation. *Bulbocodium monophyllum*, which blooms in winter, requires a warm dry sheltered situation, planted in almost pure sand; when coming into bloom give water freely. *Triandrus albus* (*Angel's Tears*) and *Juncifolius* delight in partial shade and a light gritty soil, and should be given a well-drained position. In the case of these Miniature Daffodils, the ground may be carpeted with close-growing surface-rooting plants, such as *Acæna*, *Arenaria cæspitosa*, *Thymus Serpyllum* vars., *T. lanuginosus*, *Herniaria glabra*, etc.; these plants provide a natural protection for these little bulbs, besides keeping their dainty blooms from being splashed and soiled in rainy weather. Many prefer, however, seeing these little gems peeping out of grass, and we can supply seed of a suitable fine dwarf grass for sowing in September after planting the bulbs; this sowing will give a fine green carpet by the following spring when the Narcissi bloom.

☞ Full descriptions of the following Miniature Daffodils will be found in body of Catalogue.

Daffodils and Narcissi for Naturalising

In Woodlands, Shrubberies, Orchards, Grass, etc., and to plant for cutting

BARR'S COLLECTIONS FOR NATURALISING.

1000 in 20 fine showy named sorts (Trumpets, Chalice-cupped, Poets, etc.)	120/-
500 in 20	60/-
100 in 10	12/6

The above Collections of Daffodils are made up from varieties specially selected as being suitable for naturalising and for cutting. They may be relied on to give a good supply of flowers over a long period.

Barr's Mixtures of Daffodils for Naturalising.

The following mixtures are specially made up by us from separate named varieties, and are greatly superior to the cheap mixtures frequently sold.

Mixed Daffodils of Many Sorts, for large plantings, naturalising and cutting, including a good mixture of **Trumpets, Incomparabilis, Barrii, Leedsii, Poets,** etc., suitable for large plantings in Grass, Woodlands, Herbaceous Borders, etc. per 1000, 70/-; per 100, 7/6; doz., 1/3

Trumpet Daffodils in Mixture, a splendid mixture of large Trumpet Daffodils, including **EMPEROR, EMPRESS,** etc., all suitable for naturalising..per 1000, 100/-; per 100, 10/6; per doz., 1/6

Single Chalice-Cup or Star Narcissi Mixed (Incomparabilis, Leedsii and Barrii varieties); the charming effect of these light graceful Daffodils, when naturalised, must be seen to be realised. For cutting they are most valuable....per 1000, 80/-; per 100, 8/6; per doz., 1/3

Single Poet's Narcissi in Mixture, including many good varieties, all suitable for naturalisingper 1000, 70/-; per 100, 7/6; per doz., 1/3

Daffodils and Narcissi

Special offer of a few good named varieties for Naturalising.

We recommend the following varieties for planting in large quantities in grass, shrubberies, etc. They are all of robust constitution and remarkably decorative; all are suitable for maintaining a supply of flowers for cutting. Full descriptions of these sorts will be found in the body of the catalogue.

The following are all good sound bulbs of full flowering size. In ordering from this list the following special prices should be quoted:—

	per 1,000	per 100
Emperor, large yellow trumpet.. .. .	115/-	12/6
Golden Spur, early yellow trumpet	125/-	14/-
Empress, large bicolor trumpet	145/-	16/-
King Alfred, large early yellow trumpet	140/-	15/-
Princeps maximus, early bicolor trumpet	115/-	12/6
Lent Lily, small English Wild daffodil, bicolor trumpet	42/-	4/6
Queen of Spain, sulphur-yellow flowers, very graceful	225/-	25/-
Incomparabilis Ladybird, yellow with fiery scarlet crown	115/-	12/6
,, Lucifer, white with orange-red cup	140/-	15/-
,, Sir Watkin, bold yellow flower	115/-	12/6
Barrii conspicuus, yellow, cup margined orange-scarlet	95/-	10/6
,, Seagull, white with apricot-edged cup	145/-	16/-
Leedsii Mrs. Langtry, white with creamy primrose cup	130/-	14/-
,, White Lady, white pale canary coloured cup, very graceful	130/-	14/-
Odorus Campanelle, bright yellow, sweet scented.. .. .	115/-	12/6

Double Yellow Trumpet Daffodil (Telamonius plenus)	160/-	17/6

Barr's New and Rare Daffodils

Including New Varieties for 1936.

The following are all fine Exhibition varieties and comprise some of the best New Daffodils raised by ourselves and other well-known hybridists. The relative qualities as we judge them are indicated by xx, xxx, xxxx, the highest quality flower being given the most marks. The figures after the names indicate the relative period of flowering, (1) being the earliest, (7) the latest.

DAFFODIL BEERSHEBA.

- Bodilly** (INCOMPARABILIS) (3), xxxx, one of the best bicolor varieties in this section and a first-class show flower; pure white very broad and perfectly flat perianth of great substance, large bright lemon-yellow crown expanded and frilled at mouth, a fine tall plant of excellent poise, ht. 24 in. NARCISSUS BERNARDINO.

DIV. II.—INCOMPARABILIS.

Large Chalice-Cupped Daffodils or Star Narcissi.

Distinguishing Character. — Cup or crown measuring from one-third to nearly the length of the perianth segments.

All having yellow or white perianth and yellow or red-stained cups.

These beautiful **Star Narcissi** commence blooming in March, and are decorative throughout April. All are of elegant beauty, and are prized for cutting. They make charming pot plants grown in a cool greenhouse or Alpine house, and are valuable for beds and borders, and for naturalising in grass. *We illustrate Bernardino as an example of a flower in this Division.*

NARCISSUS NISSA. See page 16.

NARCISSUS FIRETAIL.

DIVISION III.—BARRII.

Short-Cupped Daffodils, or Star Narcissi
Distinguishing Character.—Cup or crown measuring less than one-third the length of the perianth segments.

All having yellow or white perianth and yellow or red-stained cups.

The beauty of these shorter-cupped Narcissi is the more highly appreciated when the cut flowers are seen in vases. The brilliancy of colouring in the cups of some, and the dainty elegance of others, render them valuable Exhibition flowers. The cheaper kinds we can strongly recommend for beds and borders, and for naturalising in grass, woodlands, wild gardens, etc.

Adorna (4), xxx, a most distinct variety with overlapping pale primrose perianth and a deep orange-yellow crown, broadly frilled at margin and having a distinct green eye, ht. 19 in.

NARCISSUS SUNRISE.

DIVISION IV.—LEEDSII.

Eucharis-Flowered Silver-White Star Narcissi.

Comprising all Star Narcissi (large chalice-cupped and short-cupped) which have pure white or silvery white perianth, and cup or crown white, cream, pale buff-orange, apricot or pale citron.

NOTE.—Those varieties marked “Giant Leedsii” are large crowned varieties, registered in the R.H.S. Classified List of Daffodil Names as “4a.” Those not so marked are the small-cupped Leedsii varieties registered as “4b.”

These chaste Daffodils are highly prized for indoor decoration in pots or bowls and for cutting. Plant 3 or 5 bulbs in a 5-inch pot. In flower beds and borders and naturalised in grass they produce a lovely effect.

	per doz.	each.
	s. d.	s. d.

†**White Eagle** (3), xxx, **Giant Leedsii**, a very fine free-flowering variety of great garden merit; large flower measuring 4½ inches across with pure white broad overlapping perianth and large creamy primrose crown well expanded at margin, ht. 22 in. .per 100, 45/- 6 0 0 7

†**White Lady** (4), xx½, a charming flower, with broad white perianth and dainty pale canary-coloured crinkled cup, delicately scented; it may be gently forced, is a free bloomer, and valuable for cutting, ht. 23 in. AWARD OF MERIT R.H.S. .per 100, 16/- 2 4 0 3

White Nile (2), xxx, **Giant Leedsii**, large flower of exquisite form, measuring 4 in. across, broad snowy white perianth of fine substance, bold white crown open and frilled at mouth, strong vigorous grower, early, ht. 20 in., forces well and a fine pot plant. AWARD OF MERIT R.H.S. .per 100, 16/- 12 6 1 3

†**White Sentinel** (3), xxx½, **Giant Leedsii**, a fine variety of good form, being a twin-seedling to **Mitylene**, see page 20: pure white overlapping perianth of slightly campanulate form, smooth saucer-shaped primrose crown. AWARD OF MERIT R.H.S. .per 100, 21/- 12 6 1 3

†**Prince Umbria** (3), xxx½, **Giant Leedsii**, very large bold flower, with broad white overlapping perianth and very large broad crown of a creamy primrose, beautifully frilled at margin, ht. 24 in. AWARD OF MERIT R.H.S. .per 100, 18/6 7 6 0 8

Royal Lady (6), xxx, perianth pure white and overlapping, cup soft lemon prettily serrated at margin, a tall strong grower; a very effective late-flowering border variety, ht. 20 in. .per 100, 18/6 2 8 0 3

†**St. Olaf** (4), xxx, a flower of remarkable beauty, measuring 3¾ inches across, with very broad rounded white perianth, and a wide flattened prettily fluted crown, colour cream delicately margined sulphur, ht. 20 in. AWARD OF MERIT R.H.S. This Daffodil likes a fairly moist soil. .per 100, 21/- 3 0 0 4

Southern Gem (3), xxx, a fine **Giant Leedsii**, with white perianth and large pale citron crown, passing to cream, a nice cool-looking flower; a fine variety for bowls, ht. 22 in. AWARD OF MERIT FOR GARDEN AND CUTTING, R.H.S. .per 100, 16/- 2 4 0 3

†**Sweet Nell** (4), xxx½, a beautifully formed short-cupped Leedsii of fine substance and vigorous growth; large, solid overlapping white perianth, large flattish expanded crown of a delicate primrose, very free-flowering, ht. 24 in. .per 100, 12/6 12 6 1 3

†**Tenedos** (3), xxx½, **Giant Leedsii**, a very handsome variety, bearing enormous flowers measuring 5 inches across, perianth pure white and slightly pointed, crown opening pale primrose and passing to pure white, ht. 20 in. AWARD OF MERIT R.H.S. .per 100, 32/6 32 6 3 0

†**Tunis** (3), xxx½, **Giant Leedsii**, a most exceptional garden plant, which will withstand bad weather and is remarkably attractive; broad creamy white perianth and large expanded frilled crown opening primrose and rapidly developing to white, with a well-defined frill of coppery-gold at edge, ht. 25 in.; FIRST-CLASS CERTIFICATE R.H.S. AT WISLEY, 1936. .per 100, 27/6 27 6 2 6

†**Venus** (3), xxx½, **Giant Leedsii**, a very beautiful chaste flower of refined form, perianth white, broad and solid, large cream-coloured crown, passing to pure white, ht. 14 in. .per 100, 32/6 4 6 0 5

DIVISION V.—TRIANDRUS.

Triandrus and Varieties obviously containing Triandrus blood.

For grace and dainty beauty these are unsurpassed. We recommend for them a partly shaded situation, and if a little very fine dwarf grass seed (see p. 2 of Cover of our General Bulb Catalogue) is sown amongst them the beauty of their flowers is enhanced. Once planted they may remain undisturbed for years.

NARCISSUS TRIANDRUS.

The Cyclamen-flowered Daffodil with reflexing perianth.

NARCISSUS TRIANDRUS ALBUS.

THE DAINTY LITTLE "ANGEL'S TEARS" DAFFODIL (*Triandrus albus*) was found by the late Mr. Peter Barr on the mountains of North Western Spain, growing in very hard, fine gritty soil, sometimes in the narrowest fissures of granite and slatestone rocks. All in this section make lovely little pot-plants (three or more bulbs in a pot) for the Alpine house.

In the rock garden they form a picture of grace and beauty. They prefer shade, a gritty soil and a well-drained position; no manure should be given.

Triandrus albus (3), an exquisitely beautiful little species, appropriately called the "Angel's Tears" Daffodil; it is of slender growth, and produces a cluster of elegant little creamy white flowers with globular cup and perianth reflexing like a Cyclamen, ht. 7 in. As the collected bulbs have to be taken up while the foliage is still green, a few may possibly not bloom the first season: the bulbs should therefore be left undisturbed to become established.

Home-grown bulbs „ 25/-	3	6	0	4

TRIANDRUS CALATHINUS.

Triandrus calathinus (3). One of the most beautiful little Daffodils in existence. The flowers, which are produced in drooping clusters of two or three, are snowy white, and more than twice the size of *Triandrus albus*, with long goblet-shaped crown prettily fluted; the foliage has a curious habit of curling over, ht. 8 in. For pots in the Alpine house or for the rock garden it is a perfect gem. It thrives best in a mixture of leaf mould, heath soil and coarse sand, with just a little bone flour added; no other manure should be given. The late Peter Barr collected this rare Daffodil some years ago on one of the sea-swept Glénan Isles (off Brittany). It is readily raised from seed, and we now offer strong flowering cultivated bulbs.

Triandrus concolor (3), collected form, bearing clusters of dainty little drooping flowers of a delicate creamy primrose, slightly fragrant, ht. 7 in..... 12 6 1 3

Triandrus pulchellus (4), collected form, producing dainty drooping clusters of flowers varying slightly in form, running from cream to pale primrose to cream, the cup being a shade lighter in colour than the perianth, ht. 9 in..... 8 6 0 9

Triandrus var. aurantiacus (4), the deepest coloured and without question the most striking of the Triandrus varieties producing flowers of a rich golden-yellow colour with short globular cup, the perianth segments being reflexed as in *Triandrus albus*, producing when established several flowers on a stem, narrow rush-like foliage; a perfect little gem, extremely rare — 10 6

NARCISSUS TRIANDRUS HYBRIDS.

Of these **Queen of Spain** is a natural hybrid of **Triandrus albus** and a **Wild Spanish Trumpet Daffodil**. The others are hybrids bred from **Triandrus albus** or **calathinus** crossed on to other Daffodils. The flowers are more or less drooping, of elegant form and graceful habit clearly showing their **Triandrus** parentage, and are most beautiful subjects for growing in pots in a cool greenhouse or Alpine house.

NARCISSUS QUEEN OF SPAIN.

Queen of Spain (3), xxx, a wild hybrid discovered by the late Mr. Peter Barr in Spain. One of the most beautiful, distinct, and graceful Daffodils, and recommended either for the border, pots, or for naturalising in woodlands, etc. The flowers vary slightly in size, and sometimes in form of trumpet, but all are of a uniform, delicate canary-yellow, with a gracefully reflexing perianth, ht. 12 in. Naturalised in grass under trees this Daffodil forms a delightful feature in the garden. A charming subject for bowls grown in peat-fibre mixture.

MIXED Triandrus Hybrids, the result of crossing **Narcissus Triandrus calathinus** with the best varieties of **Trumpet Daffodils**, **Poeticus**, **Leedsii** varieties, etc. All are of elegant and graceful habit, producing primrose, yellow or white flowers.....per 100, 48/- 6 6 0 7

DIV. VI.—CYCLAMINEUS AND CYCLAMINEUS HYBRIDS.

NARCISSUS CYCLAMINEUS.

Cyclamineus (1), the **Yellow Cyclamen-flowered Daffodil**. This beautiful little daffodil was found by the late Peter Barr in Spain and Portugal, at the margin of mountain streams and in flooded meadows adjoining; the moister the situation, the finer were the blooms. It is one of the earliest of Daffodils, blooming from the middle of February to early March, and is a charming, elegant little flower of very distinct form; the trumpet is rich yellow, straight and tube-like, elegantly serrated at mouth, while the perianth is reflexed like a Cyclamen. A valuable little species for pot-culture, edgings, and to naturalise in sunny damp spots in the rock garden, in grass, or at the water's edge; it delights in a dampish sandy peat soil and should be left undisturbed for years, ht. 6 in. **FIRST-CLASS CERT. R.H.S.** For pot culture and exhibition the larger size bulbs should be ordered. .per 100, 32/6

NARCISSUS POETAZ—HYBRID POLYANTHUS NARCISSI.

Hybrids of *Poeticus* × *Polyanthus* Narcissi.

A fine race of Daffodils, resulting from a cross between *Poeticus ornatus* (seed bearing parent) and the finest varieties of *Polyanthus* or *Bunch-flowered Narcissi*. The plants are tall and vigorous growers with strong erect foliage and heads of large well-formed flowers, deliciously fragrant. These are finer than the old *Polyanthus* Narcissi, and have the advantage of being much hardier. In pots, bowls, or the flower border they are very decorative, and the flowers are highly prized for cutting. All suitable for gentle forcing.

NARCISSUS POETAZ ELVIRA.

per doz.	each.
s. d.	s. d.
2 6	0 3

DIVISION IX.—POETICUS—TRUE POET'S NARCISSI.

These "Poet's Daffodils" or **Narcissi** all have snowy white perianth segments or petals, and a small flattened eye or crown, yellow or lemon edged more or less deeply with scarlet or crimson, sometimes almost self scarlet. All are sweetly scented.

NARCISSUS POETICUS CAEDMON.

The earlier flowering varieties afford a very beautiful decoration indoors when grown in pots (5 bulbs in a pot) and may be gently forced. As border plants and naturalised in grass these Poet's Narcissi produce a lovely effect.

Early planting and liberal culture is specially recommended for these Poet's Daffodils. To obtain tall stems and fine large flowers they should be grown in a rich deep soil, not too dry. The varieties having very highly coloured crowns should be cut young and allowed to develop indoors, to preserve the fine colouring.

†**Ashgard** (6), xxx, a bright and showy variety with well-imbricated snowy white perianth and golden-yellow eye edged madder-scarlet, a fine decorative garden variety, ht. 21 in.....per 100, 32/6

NARCISSUS LUNE DE MIEL.

DIVISION XI.—VARIOUS SPECIES AND HYBRIDS.

LARGE SULPHUR HOOP PETTICOAT.

NARCISSUS BULBOCODIUM (CORBULARIA).

The Hoop Petticoat, or Medusa's Trumpet Daffodils.

For the rock garden, edgings and small beds, these beautiful little Daffodils are most charming, while if several bulbs are planted in pots or pans, they are greatly prized for indoor decoration, and for the Alpine house.

Large Sulphur Hoop Petticoat (*Bulbocodium citrinus*) (2), very dainty pale citron-yellow flowers, ht. 6 to 8 inches; delights in a dampish sandy peat soil, but without manure. *The collected bulbs we offer having been taken up while in growth may not all bloom the first season and should therefore be planted where they may be left undisturbed to become established.*

Extra strong Home-grown bulbs	„ 17/6	2	6	0	3

WHITE HOOP PETTICOAT.

White Hoop Petticoat (*Bulbocodium monophyllum* or *Clusii*) (1), native of N. Africa, producing in winter little snowy white flowers of exquisite beauty; charming in the rock garden or may be grown in pots in a cold frame or Alpine house; as soon as signs of growth are seen, give water freely, ht. 6 in. *The bulbs we offer having been collected while in growth may not all flower the first season. Those planted outdoors should therefore be allowed to remain undisturbed so as to become established:*

on no account should manure be given.....per 100, 25/-

NERINES.

Very beautiful and easily grown Autumn-flowering bulbs for the greenhouse.

For autumn decoration in the greenhouse few plants can compare with **Nerines** for their brilliant and attractive colours, which form a pleasing contrast to the prevailing tints of this period of the year. The flowers, which are produced in umbels of 6 to 24 blooms, are borne on stout stems varying in height from 1 to 2 feet. In colour they range from *dark red, vivid crimson, cerise, and scarlet* to *salmon, coral-rose, pink, blush, and white*, many having a glistening lustre which in sunlight gives them the appearance of being dusted with gold or silver. In some cases the flowers have a well-defined bar or stripe running up the centre of the petal, which adds to their charm. They remain decorative for many weeks, and their beauty may be enjoyed in a sitting-room as well as the greenhouse, if the pots are kept in a sunny window.

A HYBRID NERINE.

The cut spikes, which last fresh a long time, are greatly appreciated for table decoration associated with some light graceful foliage such as Maidenhair or Asparagus Fern.

CULTURE.—**Nerines** may be very easily grown by anyone who has a glass structure from which frost can be excluded. *Plenty of air and sunshine* are their principal requirements. After the bulbs have finished flowering, place the pots in an airy sunny situation close to the glass, and encourage a free foliage growth by occasionally giving a little weak liquid manure. In May, when the foliage commences to turn yellow, gradually cease giving water and allow the bulbs to ripen off in their pots. As soon as the plants show signs of making fresh growth in August or early September, stand the pots in saucers of water for a few hours to ensure the soil being uniformly moist, and then give water sparingly until the flower spikes are well advanced.

Nerines bloom most freely when well established in pots. Re-pot every third or fourth year as growth is commencing, usually early in September, using a 3½-inch pot, excepting for those varieties which make large bulbs, when an appropriate size pot should be used. In potting, put in plenty of crocks to ensure good drainage, and pot in a compost of 4 parts good fibrous loam, 1 part coarse silver sand and a little dry well-decayed cow manure with a sprinkling of bone meal, well mixed. Always pot firmly leaving only the neck and shoulder of the bulb exposed.

Nerine Bowdeni and certain of the stronger growing varieties may be grown outdoors in mild districts where there is little frost, such as the South-West of England, but to flower well they should be planted against a warm South wall, where they can get a good ripening during the resting season in summer.

Our Nerine Exhibits have been awarded by the R.H.S. Nine Silver and Silver-Gilt Medals.

Barr & Son's Special Collections of Nerines.

These collections are carefully made up and represent very good value.

MIXED HYBRID NERINES (un-named) per doz., 16/- ; 1/6 each.

BARR'S SELECT LIST OF HYBRID NERINES.

	each.	s.	d.
Aurora , a splendid giant-flowered hybrid Nerine resulting from N. Bowdeni crossed with a N. Fothergilli Hybrid , producing in October flowers of great size and substance, <i>satiny rose</i> with <i>silvery lavender</i> stripe down centre of petals, borne in very large bold umbels, rising from a wealth of foliage. The resting period is after flowering, when the bulbs should be kept dry and cool from November to January until growth recommences in February ; they should then be watered sparingly until April or May, after which a plentiful supply should be given. Like N. Bowdeni , it should flourish outdoors in mild districts. F.C.C., R.H.S.....	15	0	
Barcarolle , beautiful <i>old rose</i> , gold dusted, with deeper stripe, strong stem.....	10	6	
Beacon , a very pretty soft shade of <i>coral-scarlet</i>	5	6	
Bedouin , <i>scarlet-cerise</i> , large open flower with recurved and waved petals, tall grower.....	5	6	
Betty , <i>coral-pink</i> changing to <i>mauve</i> , large flower with waved petals.....	5	6	
Bowdeni , a fine species from the Cape, producing large umbels of flowers 3 to 4 in. across, <i>pink</i> with a <i>rose-coloured</i> line down each petal. One of the hardiest and may be grown out of doors in the South and West of England. A.M., R.H.S.....per doz.	27/6	2	6
Burgundy , an art shade of <i>copper-red</i> with <i>mauve</i> shading, <i>gold-dusted</i> and with <i>scarlet</i> bar.....	7	6

Nymph, a <i>pure white</i> variety with narrow <i>pink</i> stripe, waved petals, open truss.....	15	0
Peter Barr, large open trusses of <i>glistening rose</i> flowers deepening towards centre and with sparkling <i>golden sheen</i> , of tall vigorous habit.....	21	0
Pink Beauty, pretty flowers of medium size, <i>bright rose-pink</i> , with <i>gold</i> and <i>silver</i> dusting.....	7	6
Plantii, large well-formed trusses of <i>bright rose-scarlet</i> flowers, <i>gold-dusted</i> , very reliable.....	5	6
Queen Mary, very large <i>glistening pink</i> flowers with beautifully reflexing petals, strong grower	30	0
Red Hussar, large <i>salmon-scarlet</i> flowers <i>gold-dusted</i> , large truss, of vigorous growth.....	10	6
Robert Berkeley, <i>rich salmon-rose</i> shot <i>gold</i> , large flower, <i>very free-blooming</i>	5	6
Ronald, <i>deep coral-red</i> with deeper coloured stripe, petals well curled and reflexed.....	7	6
Rosella, large <i>bright rose-pink</i> flowers with reflexing petals, large handsome truss.....	10	6
Roweana, large trusses of <i>coral-red</i> flowers with <i>deep salmon</i> star.....	10	6
Royal Dragoon, <i>glowing deep rose-crimson</i> heavily <i>gold-dusted</i> , splendid stem and truss.....	30	0
Royal Prince, large <i>rich coppery crimson</i> flowers with <i>golden sheen</i>	21	0
Salmon Perfection, perfect large truss of <i>clear light salmon</i> flowers, tall strong grower.....	21	0
Sarniensis (Rose Guernsey Lily), <i>deep rose</i> with <i>deeper</i> stripe, hardy outdoors in mild localities	2	6
„ corusca major (Scarlet Guernsey Lily) , <i>brilliant fiery orange-scarlet</i> , tall grower	3	6
„ insignis , <i>clear glistening salmon-pink</i> with faint stripe.....	5	6
„ Rose Queen , large <i>bright rose</i> flowers with a <i>glistening scarlet</i> bar, tall robust grower and hardy outdoors in the South and West of England.....	2	6
Scarlet Beauty, <i>brilliant orange-scarlet self</i> , an exceptionally vivid colour, <i>reliable bloomer</i>	7	6
Scarletta, <i>rich rose-scarlet self</i> , <i>gold-dusted</i> , petals prettily waved and reflexed, tall grower.....	15	0
Sieglinde, splendid truss of a large <i>glistening satiny pink</i> with <i>deeper coloured</i> bar, tall stem.....	21	0
Sparkler, very large <i>deep rose</i> flowers, <i>gold-dusted</i> , splendid truss, strong stem.....	21	0
Talisman, <i>bright salmon-scarlet</i> with <i>gold</i> dusting, large truss and flowers.....	10	6
Thalia, <i>rich full salmon-pink</i> , <i>gold-dusted</i> and with <i>deeper coloured</i> star, strong grower.....	15	0
Vieux Rose, a unique and attractive colour almost a <i>reddish copper</i> shot <i>gold</i>	7	6

USEFUL TOOLS FOR BULB PLANTING, etc.

Barr's Special Bulb Planter, specially designed for planting Daffodils and other bulbs in grass. This tool cuts and lifts a clean circular piece of turf, which is released from the cup when the second hole is made, and lies ready at hand to fill in the hole when the bulb has been put in, it being only necessary to remove a little of the soil from the bottom of the sod. A time must be chosen for planting when the ground has become softened after early Autumn rains, and not when in a hard and baked condition, as it is then impossible to use this, or indeed any other tool with success. By the use of BARR'S SPECIAL BULB PLANTER a large number of bulbs may be planted in a very short time, and without the least disturbance of the sward. The length of the tool is 38 inches over all, weight about 3½ lbs. The cup is manufactured from high-class hardened steel and always carries a keen cutting edge.

Small Size—To cut out a circular hole 2 inches diameter	} 18/- each ; post free, 18/9 21/-; post free, 21/9.
Medium ,, ,, ,, 2¼ ,, ,,	
Large ,, ,, ,, 2½ ,, ,,	
Extra Large Size ,, ,, 3½ ,, ,,	

We shall send the medium size (2¼ in.) if no instructions are given to the contrary.

Barr's Special Bulb Dibber, specially designed for dibbling bulbs into borders, etc.; steel shod, with strong iron cross tread and wooden handle; a good strong heavy tool, weight about 6¾ lbs., length 36 inches over all, 16/6 each.

New Pattern Hoe, a very useful tool for breaking the surface soil in the Flower Border during dry weather, and especially in early Spring when Bulbs are just showing; also a useful weeding tool.

With short handle (12½ inches over all), 3/3 each; with 3-ft. handle (41 inches over all and weight under 1 lb.), 4/6 each; with 4-ft. handle (5½ ft. over all), 5/- each.

Barr's Special Bulb Trowel, made of best steel, especially designed for lifting and planting bulbs, etc. It will also be found of great value for general garden purposes, 4/3 each.

Garden Trowel, solid cast steel, finest quality, 5 in. 2/3; 6 in. 2/6; 7 in. 2/9 each.

BARR'S BULB TROWEL.

MANURES, PEAT-FIBRE, etc.

Barr's Phytobroma, the best Manure for Daffodils, Hyacinths, Tulips, etc., and for Flower Borders generally. It should be mixed with the soil below the bulbs at planting time at the rate of 2 to 3 oz. to the square yard, and in Spring, when the bulbs are showing above ground, a top-dressing may be given of 3 oz. to the square yard. FOR POTS, mix *Phytobroma* with the soil, to be used at the rate of 1 lb. to the bushel, and in Spring, when growth is showing, top-dress once a fortnight, using a small teaspoonful and well mixing with surface soil. Leaflet with further particulars on application. 2 lb. 1/3; 7 lb. 3/-; 14 lb. 5/6; 28 lb. 10/-; 56 lb. 17/6; 112 lb. 32/-.

(Prepaid Orders for 56 lbs. and upwards sent carriage paid.)

Barr's Improved Peat-fibre, Shell, and Charcoal Mixture for growing bulbs in Bowls, Jardinets, Glasses, etc. In the case of bulbs grown in Hyacinth glasses, half fill the glass with the Fibre Mixture, and add water till no more can be absorbed. Place the bulb with its base resting on the preparation, and tie down with old fish-netting or other material, leaving an opening in the centre for the shoot. When the bulb has well rooted the covering may be removed; the same remark applies to bulbs grown in bowls, etc., they must be kept in place till they have rooted. For further directions, see page 3 of our General Bulb Catalogue. Our Fibre Mixture is sent out ready for use. 5/6 per bushel; 1/6 per peck.

Peat-fibre, recommended in preference to Cocoa-fibre for plunging bowls, pots, etc., and as a Winter mulch to bulb-beds, etc., per bushel, 2/6.

Special Notices and Terms of Business.

Carriage of Bulbs—All Orders for Bulbs to value of 20s. sent Carriage Paid to any Railway Station in the United Kingdom. *These terms do not include Nerines in pots, manures, soils or tools. These will either be sent by goods train, carriage forward, or consigned at lowest rate and carriage charged on invoice.*

5% Cash Discount on Bulb Orders of 40s. and upwards.—1s. in the £ discount is allowed for Cash with Order or for payment within 14 days from date of Invoice on all orders for bulbs of 40s. and upwards, with exception of the Collections offered on page 3 which are nett.

Terms of Credit.—Our books are made up half-yearly, when all accounts are due nett. Interest at the rate of 5% per annum will be charged on overdue Accounts.

Remittances.—Money Orders and Postal Orders should be made payable at Bedford Street Post Office; these and all Cheques should be crossed "Westminster Bank."

Packages.—Boxes, Bags, etc., are charged at cost price, but this charge may be deducted from our account if the empties are returned Carriage Paid within a fortnight. *Returned empties should have the sender's name on the address label for identification, and an advice sent by post, stating date of despatch and name of Railway Co.*

Naming Daffodils.—Cut specimens of Daffodils for naming should be sent to our Nurseries, Taplow, Bucks., accompanied by a remittance of 4d. per bloom to cover attendant expenses.

Catalogues.—Our Seed Guide and List of Bulbs and Tubers for Winter and Spring Planting is published in January, Hardy Plant Catalogue in February, List of Autumn-flowering Bulbs (Crocus species, Colchicums, etc.) in July, Daffodil and General Bulb Catalogues in August. We are always pleased to forward any of these Catalogues, free of charge, to friends of our Customers on receipt of a line requesting us to do so.

Gardeners.—We keep a special Register of Gardeners in want of situations, and shall be pleased to put such in communication with any of our Customers requiring Head Gardeners.

DAFFODIL COLOURED PLATES.

Nurseries at Taplow, Bucks., and Penryn, Cornwall.

U.S.A.

Special Notice from
BARR & SONS

11, 12 & 13 King Street, Covent Garden, London, England

**ADMISSION OF BULBS
INTO THE UNITED STATES OF AMERICA**

Under present regulations of the Federal Horticultural Board we are permitted to send to our customers in the United States the following bulbs :

Chionodoxas	Ixias
Convallaria (Lily of the Valley)	Lilies
Crocuses	Lily of the Valley
Crown Imperials	Muscari
Eranthis (Winter Aconites)	Snowdrops
Fritillaria imperialis	Scillas
Fritillaria Meleagris Varieties	Tulips
Galanthus (Snowdrops)	Tulip Species
Hyacinths	Winter Aconites
Hyacinthus amethystinus	

As small consignments cannot be sent direct from England by Parcel Post without a special permit and mailing tag (obtained by the importer from the Federal Horticultural Board at Washington), we have made arrangements with shipping agents in New York to forward small consignments of any of the above-named bulbs to our customers by the U.S.A. Parcel Post or Express from New York. These arrangements will enable us to deliver orders of not less value than \$15 at an inclusive charge of about 40 cents per lb. (including freight from London, customs entry, insurance, and U.S.A. postage to destination). This charge does not, however, include the U.S.A. Import Duty, which is \$4 per 1,000 on Hyacinths ; \$6 per 1,000 on Tulips ; \$6 per 1,000 on Narcissi ; \$6 per 1,000 on Lilies and Lily of the Valley ; \$2 per 1,000 on Crocuses, and 30 per cent. *ad valorem* on all other bulbs. An amount to cover these duties should therefore be added to remittances if it is desired that all charges are prepaid by us.

The approximate weights of various Bulbs given on page 2 of this circular will enable purchasers to estimate the total cost of transit of the bulbs ordered.

Customers desirous of importing Narcissi or Bulbs other than those named above, or Irises or Herbaceous plants must apply to the Federal Horticultural Board, Washington, D.C., for a permit to import. There is no need for such application to be made in respect to any of the bulbs named in the above List.

There are no restrictions in respect to the importation of Flower Seeds, Vegetable Seeds, or Seeds of Bulbs.

APPROXIMATE AVERAGE WEIGHTS OF BULBS.

The following approximate weights of bulbs will assist in estimating the amount to be remitted to cover cost of freight and postage. In remitting, a small amount should also be allowed to cover the cost of the English Ministry of Agriculture Health Certificate which must accompany all consignments; any surplus amount remitted will be credited to our customer's account or returned by P.O. Money Order if preferred.

	Average weight about
Amaryllis (<i>Hippeastrum</i>)	4 to 5 lbs. per 12 bulbs
Anemones	$\frac{1}{2}$ to 1 lb. ,, 100 ,,
