2023 Perennial Trial Garden Performance Report

Dr. Chad Miller, David Staats, and Ian McLellan

Introduction

In 2000, the Annual Trial Garden was moved from its site at PERC (Plant Environmental Research Center) to the park located at the corner of Remington and Lake Street. The relocation of the annual garden to this more spacious and visible site furthered its mission by more effectively extending education, research and outreach to students, home gardeners, Master Gardeners, community members, and Green Industry personnel. In 2007, the Perennial Trials were created in response to increased interest in new perennial cultivars. The Perennial Trials are located directly east, across the street from the Annual Trial Garden in front of the University Center for the Arts. It is managed by staff from the CSU Department of Horticulture and Landscape Architecture with substantial oversight from the Perennial Trial subcommittee which is part of the Annual Flower Trial Garden committee. Each entry must have been introduced within the past three years and is evaluated for three growing seasons, including two winters to determine landscape performance and plant hardiness.

The purpose of the trial garden is to evaluate the performance of herbaceous perennial plant species and cultivars under our unique Rocky Mountain environmental conditions. Our growing conditions are characterized by high altitude, intense solar radiation, drying winds, severe hailstorms, large fluctuations between day and night temperatures, and a season-long need for irrigation. Plants were evaluated for plant vigor, uniformity, floriferousness, and tolerance to environmental and biotic stresses. Data (ratings and photos) were collected every two weeks (May to late September). Plants were also evaluated monthly by some members of the Perennial Trial subcommittee. The Perennial Trial subcommittee met November 9th, 2023 to review data and photos for plants entered in 2021. The committee voted on the entries to be designated a "Top Performer".

The trial program is primarily funded by the entry fees collected from the plant breeding companies and perennial propagators participating in the trials. Additional financial assistance and supplies for the trial operations are donated by a number of sources, including individuals, various foundations, nurseries, greenhouse growers and plant and seed production companies from across the nation. The trial gardens at Colorado State University receives no direct operating dollars allocated from state funds. Some operational and staff dollars have come from the Colorado State Agricultural Experiment Station, Extension, the College of Agricultural Sciences, and the Department of Horticulture and Landscape Architecture.

Acknowledgements

The Department of Horticulture and Landscape Architecture at Colorado State University thanks the many plant and seed companies who continue to participate in the trials year after year. Without their cooperation and support, the research done at the trial garden would not be possible. This year, the following 25 plant and seed companies participated in the trials, entering 104 new varieties of herbaceous perennial plants for a total of 310 entries in the trials:

Benary+	Must Have Perennials
Bull Plant Genetics	Pacific Plug and Liner
Danziger	Pioneer Gardens
Darwin Perennials	Plant Haven International
Dümmen Orange	Plant Select®
Eason Horticulture Resources	Proven Winners
Flamingo Holland	Van Zanten Breeding B.V.
Garden Choice	Sakata Elite Propagation
Gulley Greenhouse	Star Roses and Plants
HilverdaFlorist	Syngenta
J. Berry Nursery	Terra Nova Nurseries
Jelitto Perennial Seeds	Walters Gardens, Inc
Kieft Seed	

In Kind Donations:

We recognize several companies that have donated supplies to the program.

ICL Specialty Fertilizer - Donated Osmocote® slow-release fertilizer used in the beds and containers.

Harrell's – Donated water soluble and slow-release fertilizers.

Tagawas - Donated potting media used to grow-on vegetative plugs.

Organix - Donated organic media for sun beds and containers.

Welby Gardens - Grew all AAS seed plants at a substantially reduced cost for the trials.

Blooma Farms, Kiyota's Greenhouse - Propagated seed varieties at a substantially reduced cost for the trials.

In Appreciation

The Department of Horticulture and Landscape Architecture recognizes and thanks the following people for making the trial gardens happen this year.

Ian McLellan – Horticulture Undergraduate and 3-Year Perennial Trial Coordinator

Tate Erickson – Horticulture Undergraduate and Annual Trial Garden Coordinator

Erin Simpson, Lauren DiFraia, Tara Conroy, Sam Altaffer – The Trial Garden Staff

David Staats – Horticulture Research Associate

Larimer & Weld County Master Gardeners who volunteered their time and hard work.

Blooma Farms, Kiyota Greenhouse, Welby Gardens and all of their staff.

The Trial Garden Advisory Committee – Dan Gerace (Welby Gardens), Al Gerace (Welby Gardens), Galen Dokter (Vaughan's Horticulture), Aki Okamoto (Tagawa Greenhouses), Milan Clinkingbeard (Tagawa Greenhouses), Amy Gonzalez (Syngenta Flowers), Karl Trellinger (Syngenta), Kathy

McKay (Schoneveld, Bull PG), Mark Seguin (Sakata Ornamentals), Stephanie Gutierrez (Plants by Stephanie), Steven Engel (PanAmerican Seed), Richard Anderson (Lifescape Colorado), Dale Kiyota (Kiyota Greenhouses), John Navant (Hylands Hills Park and Rec), Beth Gulley (Gulley Greenhouse), Gene Pielin (Gulley Greenhouse), Jim Devereux (GreenFuse Botanicals), Traicer Gray (Elitch Gardens), Diana Reavis (Eason Horticulture), Peter Ault (Dutch Heritage), Duane Sinning (Department of Agriculture), Bridget Blomquist (Denver Botanic Garden), Cassie Doolittle (Denver Botanic Garden), Philip Douglas (Denver Botanic Garden), David Hartley (CSU Emeritus), Holly Shields (City Park Greenhouse), Julie Lehman (City Park Greenhouse), Shalene Hiller (City of Westminster), Sean Moody (Ceres Land Care), Ryan Giacomini (Blooma Farms), Rachel Wood (Blooma Farms), Scott Fulton (Botany Lane Greenhouse), Doug Parry (Benary Plus), Susan Stauber (Ball Horticulture), Nora Lozada (Ball Horticulture), Ron Brum (Ball Horticulture), Aaron Bivens (Altman Plants), Jim Klett (CSU emeritus), David Staats (CSU), Chad Miller (CSU)

And a special thanks to those who served on the Perennial Trial Sub-Committee - Angela Storm (Dummen Orange), Bridget Blomquist (Denver Botanic Gardens), Ron Brum (Ball Horticulture), Susan Stauber (Ball Horticulture), Dan Gerace (Welby Gardens), Beth Gulley (Gulley Greenhouse), Gene Pielin (Gulley Greenhouse), Sean Moody (Ceres Land Care), Galen Dokter (Vaughan's Horticulture), Diana Reavis (Eason Horticultural Resources), Shalene Hiller (City of Westminster), Kathy McKay (Schoneveld and Flamingo Holland), Beverly Shaw (Plant Select) and David Hartley (Colorado State University emeritus), Jim Klett, (Colorado State University emeritus), David Staats (Colorado State University), and Chad Miller (Colorado State University).

Perhaps most importantly, much thanks and appreciation goes to the Perennial Trial Garden staff at the university that has worked diligently to prepare and maintain the garden.

David Staats Horticulture Research Associate
Ian McLellan Horticulture Undergraduate and Perennial Trial Coordinator

An Invitation

You are cordially invited to tour the garden at your leisure to enjoy the color and ambiance of a place that is like no other in Colorado. Any suggestions you may have for future programs or improvements are strongly encouraged, so please feel free to contact us with your ideas.

2023 CULTURAL DATA

Growing

All seeds were sent to Blooma Farms and Kiyota Greenhouse in January and February 2023 for germination and seedling development in their greenhouses into cell packs or 50-cell trays. All varieties of the same genus were sent to one location. Plants from these two companies were all received on June 2nd and planted in the garden starting on June 7th. All vegetative varieties were received as plugs and transplanted into 4.5" pots shortly after arriving at Colorado State University from March to mid-April.

Greenhouse Fertilizations

Plants were fertilized daily using Greencare 14-4-14 water soluble fertilizer at a rate of 200 ppm, using a Dosatron® fertilizer injectors rated at 7 GPM. On the weekends, plants were given clear water irrigation.

Preventative Fungicide Treatments

A Banrot® (6 oz/gallon) and Rootshield 2 (0.5 tsp/gallon) drench was applied to all vegetative plugs immediately after arrival and prior to potting up.

Soil Amendments and Preparation

All planting beds were raked clean of old mulch, dead plant material, and weeds prior to the application of a granular fertilizer. Osmocote 17-6-12 was used at a rate of 150g per row. Empty rows were then tilled and leveled to increase uniformity.

Data Collection Methods

Plant Size

Height and width measurements were obtained once at the end of the growing season on October 12th, 2023. Measurements were taken at the highest and widest parts of the plant, including any flowers. This was done to determine the approximate average size and growth performance of the mature plants and should not be considered the maximum height of each variety. Height and width data were also taken for perennials planted in 2023 to better understand their first season growth performance. For consistency in data collection, the third plant from the front in the left row was measured. However, if that plant was noticeably smaller or larger than average, an alternate plant was selected for measurement.

Soil Samples

Numerous samples were taken from individual ground beds on August 8th, 2020 and were combined into a single sample and submitted to the CSU Soil Testing Lab. The results are as follows:

Soil Analysis

Location	pH	E.C. mmhos/ cm	Lime Estimate	% OM	NO ₃ -N ppm	P ppm	K ppm	Zn ppm	Fe ppm	Mn ppm	Cu ppm	Texture
Perennial Beds	7.0	0.6	Low	15.0	50.4	719	1029	51.8	496	15.0	8.84	Sandy Clay Loam

Performance Evaluation

Photos and plant and flower data were collected on a bi-weekly basis from May to late September. Dead plants in the trial were not considered in the bi-weekly evaluation; thus, the ratings given only reflect the live plants. Perennial Trial Subcommittee members also evaluated monthly and provided comments for each plant in June, July, August and September. Evaluations were given based on a 0 to 5 scale:

0 = Dead/No flowers

1 = Poor: Plants are very sick or dying, extremely few flowers

2 = Below Average: Plants are unattractive in some form, i.e. – leggy growth habit, chlorotic or low vigor, flowers are few and occurring sporadically

3 = Average: Plant appearance with growth characteristics that would be expected for the time of season; flowers would be few but uniform across the plants

4 = Good: Plants look attractive (foliage, growth habit, etc.); flowers are blooming strong and showy

5 = Excellent: Plants are very healthy and uniform; flowering is impressive

“Top Performers” Selection

On November 9th, 2023, a virtual meeting was convened with CSU staff and the Perennial Trial Garden Subcommittee. Pictures of entries from the 2021, 2022, and 2023 growing seasons were shared with the committee. Data from the growing season was compiled and emailed to each evaluator prior to the conference call for review. After discussion and looking at the photo data taken throughout each season, each plant was voted on by committee members in attendance, to determine if it should be designated as a “Top Performer”.

“Top Performers” for 2023
Class of 2021 Grown 3 Summers and 2 Winters

Brunnera ‘Alexandria’

TERRA NOVA® Nurseries

Beautiful silver, cordate leaves were very attractive all growing season creating dependable, bright spot of color in shady areas. Foliage was described as having less veining and were relatively thick giving it substance and creating a strong mat of silver leaves, great for contrasting with other plants, like darker leaved heucheras. During the early summer a delicate cloud of blue flowers creates a unique look in the garden.

Echinacea ‘SunMagic Vintage Fuschia’

Flamingo Holland / Bull Breeding

This coneflower was noted for their impressive ‘flower power’, providing showstopping color for two solid months. The attractive flowers were a bright and intense fuschia-pink color, with the ray flowers being held horizontal topped with an intensely colored big “Hershey Kiss cone on top”. The darker cone and dark stems made a great contrast with the bright blooms. Plants had a very uniform growth habit and showed great winter survival.

Eupatorium ‘Little-Pye’

Dümmen Orange

“Little” is somewhat relative with this native plant! Really, only in the first year, expect this plant to be ‘little’ and short at just over a foot tall. *However, once established in the garden, one should expect ‘Little-Pye’ to grow to make a statement in the garden, reaching upwards of 6 feet tall.* So, we wouldn’t recommend putting this in the front of the border...place it somewhere where it can fill out and reach for the sky. ‘Little-Pye’ makes for a beautiful show in late summer landscape, with blooms covering the canopy at its peak. And the inflorescences remained attractive after flowering, offering winter interest or potential use as a dried flower. Plants were very uniform with strong stems that held the impressive inflorescences from lodging. There was no evidence of any disease or insect problems. All this combined, makes the case for this plant being a low maintenance garden plant. Oh... and not to forget, this was a bee-magnet...They loved it!

Heuchera ‘Big Top Caramel Apple’

Darwin Perennials

Who doesn’t like caramel apples?! This coral bell lives up to its name. The foliage changes color, as it matures through the season, providing early shades of green, almost Granny Smith Apple green, to hints of red and ultimately, overtones of caramel. Interest is also created with contrasting colors on the underside of the leaf which is a distinct burgundy color. Plants are vigorous and relatively large creating a big canopy hence the name. Small flowers gave it a more naturalized appearance great for use in a woodland garden. Winter survival was perfect after Colorado 2 winters. Are you hungry for this plant yet?

Lupinus x ‘Beefeater’

Gulley Greenhouse and Eason Horticulture Resources

Just like the guards at the Tower of London, you can’t miss the vibrant colors of this garden classic. The intense, vibrant cherry red color that holds up well in the sun with no fading, along with the large spires easily make this a “Wow” plant from across the garden! The sheer number

of blooms set this apart from other lupines and the flower stems were sturdy, without any lodging over the flowering periods. This selection bloomed more profusely in full sun. Don't miss out on this one.

***Phlox paniculata* 'Ka-Pow® Soft Pink'**

Darwin Perennials

Can one have a perennial border without a phlox? Here's another great, reliable performer from the 'Ka-Pow®' series. Other selections from the series have been noted for their flower power and 'Soft Pink' was no different. The flower panicles covered the foliage with a beautiful canopy of medium soft pink florets with a deeper pink eye, creating an impressive display with a long bloom season. The less than two-foot-tall plants had excellent branching without any pinching necessary. This selection also proved to be very resistant to powdery mildew. If you want to pack a punch in your perennial border, certainly consider 'Ka-Pow® Soft Pink'!

***Sedum* 'Rock 'N Grow® Back in Black'**

Proven Winners® and Walters Gardens

Crank up the volume with this sedum. The foliage on this sedum is so dark at times, it almost appears black. That dark foliage makes for a great contrast to the late summer, deep red and cream flower heads. This is a great resource for sustaining pollinators late in the season. The uniform plants are attractive as well as being low maintenance and a good water conserving choice for the western garden. During 2023 it tolerated unusually heavy rains and was adaptable to multiple sites. Use this plant in the border to contrast with the other foliage and flowers in the landscapes. Put some beat into your landscape with 'Back in Black.'"

Entries that Failed to Overwinter

Some plants had extreme winter losses but if at least one plant survived through the winter they were included in the data even if it died later in the season. Plants listed below are varieties that had a 0% survival rate for the 2022-2023 winter.

Genus and species	Cultivar	Company	Year
<i>Artemisia gmelinii</i>	SunFern™ Olympia	Darwin Perennials	2021
<i>Buddleia davidii</i>	Chrysalis™ Cranberry	Darwin Perennials	2021
<i>Delphinium elatum</i>	Paramo Black Velvet ® 'Barthirty'	Eason Horticulture Resources/Gulley Greenhouse	2022
<i>Dianthus</i>	Rock White	Dümmen Orange	2021
<i>Dianthus</i>	Sunflor® Skylar	Dümmen Orange	2022
<i>Dianthus</i>	SP 15 FC 7	Dümmen Orange	2021
<i>Dianthus</i>	Sunflor® Harper	Dümmen Orange	2022
<i>Dianthus</i>	Sunflor® 'Hailey'	Dümmen Orange	2022
<i>Gaura</i>	Grace White	Danziger	2022
<i>Lavandula</i>	Lavenzine Elegance	Pacific Plug and Liner	2021
<i>Lavandula angustifolia</i>	Scent™ Blue	Benary+	2021
<i>Leucanthemum maximum</i>	Western Star™ Scorpio	Syngenta	2021
<i>Penstemon</i>	'Flock Of Flamingos'	Terra Nova Nurseries	2022
<i>Perovskia *</i>	Bluesette	Kieft Seed	2022
*now known as <i>Salvia</i>			

Class of 2021 Size, Data and Comments for 2023

Genus	Common Name	Company	Color	Height and Width* on 10/24	Year Planted
<i>Achillea ptarmica</i>	'Marshmallow'	Benary+	White	H: 12 W: 30	2021
	Plant/Flower Rating June:	3.3 / 2.0	Comments:	very large plants, lodging	
	Plant/Flower Rating July:	2.8 / 4.0	Comments:	inconsistent plant sizes, lodging , vigorous, little lodging, very inconsistent plant heights, lodging	
	# Planted: 18	Plant/Flower Rating Aug:	4.0 / 3.5	Comments:	some weirdly tall flower stalks, has to be cut back, good regrowth
	Survival: 88.9%	Plant/Flower Rating Sept:	3.7 / 2.3	Comments:	very vigorous grower
<i>Arabis caucasica</i>	'Catwalk White'	Benary+	White	H: 4 W: 20	2021
	Plant/Flower Rating June:	3.5 / 0.0	Comments:	stopped blooming last week, nice carpet of plants	
	Plant/Flower Rating July:	4.5 / 0.0	Comments:	nice carpet of plants, covered in seed pods, vigorous, done blooming, great ground cover	
	# Planted: 18	Plant/Flower Rating Aug:	4.5 / 4.5	Comments:	seed pods are almost completely hidden now, dense covering
	Survival: 50.0%	Plant/Flower Rating Sept:	4.1 / 0.0	Comments:	done blooming, vigorous grower
<i>Brunnera</i>	'Alexandria'	TERRA NOVA® Nurseries	Light blue	H: 18 W: 28	2021
	Plant/Flower Rating June:	4.5 / 3.5	Comments:	huge leaves, eye catching	
	Plant/Flower Rating July:	4.5 / 0.5	Comments:	huge leaves, no longer blooming, very vigorous, done blooming, huge foliage	
	# Planted: 18	Plant/Flower Rating Aug:	4.3 / 0.0	Comments:	some insect damage
	Survival: 100.0%	Plant/Flower Rating Sept:	4.1 / 0.3	Comments:	vigorous and full plants
<i>Buddleia davidii</i>	Chrysalis™ 'Blue'	Darwin Perennials	Purple w/ orange eye	H: 34 W: 36	2021
	Plant/Flower Rating June:	3.8 / 0.0	Comments:	coming out the ground well	
	Plant/Flower Rating July:	4.0 / 0.8	Comments:	plants are getting big. buds started forming this week, growth has picked up a lot recently, flowering starting	
	# Planted: 18	Plant/Flower Rating Aug:	3.0 / 3.5	Comments:	very large plants, smell is great, some chlorosis
	Survival: 44.4%	Plant/Flower Rating Sept:	4.0 / 3.0	Comments:	plants fairly healthy but some with slight chlorosis, some getting crowded by nearby "dwarf" eupatorium
<i>Buddleia davidii</i>	Chrysalis™ 'Pink'	Darwin Perennials	Purple w/ orange eye	H: 30 W: 36	2021
	Plant/Flower Rating June:	2.0 / 0.0	Comments:	stunted growth	
	Plant/Flower Rating July:	2.5 / 0.0	Comments:	some plants are still coming out of dormancy, 4 plants alive, irregular flowering and size	
	# Planted: 18	Plant/Flower Rating Aug:	3.3 / 2.8	Comments:	large size variations
	Survival: 11.1%	Plant/Flower Rating Sept:	3.5 / 2.8	Comments:	more purple
<i>Buddleia davidii</i>	Chrysalis™ 'Purple'	Darwin Perennials	Lavender w/ orange eye	H: 30 W: 30	2021
	Plant/Flower Rating June:	3.3 / 0.0	Comments:	inconsistent plant size, appears to have ~50% survival	
	Plant/Flower Rating July:	3.5 / 0.3	Comments:	short plants, dwarfer in size, not flowering just yet, growth is picking up	
	# Planted: 18	Plant/Flower Rating Aug:	3.3 / 2.8	Comments:	slight chlorosis, few plants
	Survival: 33.3%	Plant/Flower Rating Sept:	3.1 / 2.7	Comments:	uneven habit, appears to have about 50% survival

*Height and width measurements in centimeters.

Rating Scale: 5=Excellent, 4=Good, 3=Average, 2=Below Average, 1=Poor, 0=Dead/None.

Average ratings based on evaluations by Perennial subcommittee members.

Percent survival is based on plants surviving from initial planting.

Class of 2021 Size, Data and Comments for 2023

Genus	Common Name	Company	Color	Height and Width* on 10/24	Year Planted
<i>Buddleia davidii</i>	Chrysalis™ 'White'	Darwin Perennials	White	H: 26 W: 30	2021

Class of 2023 Size, Data and Comments for 2023

Genus	Common Name	Company	Color	Height and Width* on 10/24	Year Planted
<i>Agastache</i>	'Pink Pearl'	TERRA NOVA® Nurseries	Pink	H: 18 W: 34	2023
	Plant/Flower Rating June:	3.0 / 1.5	Comments:	recently planted so plants are small but flowers are attractive	
	Plant/Flower Rating July:	3.3 / 2.8	Comments:	looking more established, chlorosis is starting to go away, little pink/orange flowers, good flower colors pink/orange, good vegetative growth	
	# Planted: 9	Plant/Flower Rating Aug:	3.8 / 3.3	Comments:	some inconsistent plant sizes, color bleaches in sun
	Survival: 100.0%	Plant/Flower Rating Sept:	4.6 / 4.2	Comments:	nice vigor and abundant flowers, impressive flower power
<i>Alstroemeria</i>	Colorita® 'Amina'	Van Zanten Breeding B.V.	Orange w/ yellow speckled center	H: 12 W: 24	2023
	Plant/Flower Rating June:	3.0 / 4.0	Comments:	lodging but with many flowers	
	Plant/Flower Rating July:	4.0 / 4.0	Comments:	good form, lots of flowers and good growth habit, prolific flowers, upright stems	
	# Planted: 15	Plant/Flower Rating Aug:	3.4 / 3.8	Comments:	some yellowing appearing, less flowers than a week ago, uniform growth with many vibrant flowers, some chlorosis, great display of color
	Survival: 100.0%	Plant/Flower Rating Sept:	3.1 / 3.5	Comments:	some disease, 5 plants died
<i>Alstroemeria</i>	Colorita® 'Claire'	Van Zanten Breeding B.V.	White w/ pale yellow speckled center	H: 14 W: 24	2023
	Plant/Flower Rating June:	3.0 / 3.5	Comments:	starting to bloom, lodging	
	Plant/Flower Rating July:	4.3 / 4.3	Comments:	very good size and flowers, good white flowers, very good form, dense with upright stems, flowers age well	
	# Planted: 15	Plant/Flower Rating Aug:	3.5 / 3.5	Comments:	some die back on one plant, big mounding growth habit, full of flowers, many flowers with some chlorosis, most color is around the outside
	Survival: 100.0%	Plant/Flower Rating Sept:	3.9 / 4.0	Comments:	full lots of flowers
<i>Alstroemeria</i>	Colorita® 'Elaine'	Van Zanten Breeding B.V.	Pink w/ yellow speckled center	H: 14 W: 18	2023
	Plant/Flower Rating June:	3.3 / 4.0	Comments:	plants are freestanding well, many blooms	
	Plant/Flower Rating July:	4.3 / 4.3	Comments:	upright stems, many blooms, nice overall habit, some yellowing foliage, vigorous, prolific flowers	
	# Planted: 15	Plant/Flower Rating Aug:	3.9 / 4.3	Comments:	some yellowing, upright, still holding onto a ton of flowers, unique and vibrant flowers, uniform with many flowers, great color on so-so plants
	Survival: 100.0%	Plant/Flower Rating Sept:	3.3 / 3.8	Comments:	some chlorosis
<i>Alstroemeria</i>	Colorita® 'Fabiana'	Van Zanten Breeding B.V.	White w/ speckled center	H: 12 W: 16	2023
	Plant/Flower Rating June:	3.0 / 3.5	Comments:	great foliage, few blooms	
	Plant/Flower Rating July:	4.5 / 4.4	Comments:	best of the Alstroemerias, self supporting, many blooms, variegated leaf, large full plants, great flowers that age well	
	# Planted: 15	Plant/Flower Rating Aug:	4.9 / 3.8	Comments:	definitive winner of the alstroemerias, huge, upright, dense, covered in amazing flowers that age gracefully, great foliage, many unique flowers, lovely variegated foliage, very nice, love the variegation, flowers are ok
	Survival: 100.0%	Plant/Flower Rating Sept:	3.0 / 3.3	Comments:	2 or 3 dying, two plants dying

*Height and width measurements in centimeters.

Rating Scale: 5=Excellent, 4=Good, 3=Average, 2=Below Average, 1=Poor, 0=Dead/None.

Average ratings based on evaluations by Perennial subcommittee members.

Percent survival is based on plants surviving from initial planting.

Class of 2023 Size, Data and Comments for 2023

Genus	Common Name	Company	Color	Height and Width* on 10/24	Year Planted
<i>Alstroemeria</i>	Colorita® 'Katiana'	Van Zanten Breeding B.V.	Red w/ white speckled center	H: 12 W: 18	2023
	Plant/Flower Rating June:	3.3 / 3.8	Comments:	great foliage	
	Plant/Flower Rating July:	4.5 / 4.5	Comments:	great foliage and blooms, nice deep red flower, foliage and flowers are attractive, red flowers age gracefully, slight bleaching near the petal dimple	
# Planted: 15	Plant/Flower Rating Aug:	3.1 / 4.3	Comments:	one plant is dying off but the rest are doing beautifully, great foliage, vibrant flowers, flowers show sun scorch	
Survival: 100.0%	Plant/Flower Rating Sept:	3.7 / 3.2	Comments:	variegated leaves	
<i>Alstroemeria</i>	Colorita® 'Lisa'	Van Zanten Breeding B.V.	Yellow w/ speckled center	H: 12 W: 20	2023
	Plant/Flower Rating June:	3.5 / 0.8	Comments:	no flowers, nicely mounded	
	Plant/Flower Rating July:	4.5 / 1.5	Comments:	great mounds, just starting to bloom, not many flowers, foliage good, started flowering about 10 days ago, many flowers and buds	
# Planted: 15	Plant/Flower Rating Aug:	4.3 / 3.5	Comments:	late bloomer but an absolute show stopper, stunning, uniform growth with many vibrant flowers, some chlorosis	
Survival: 100.0%	Plant/Flower Rating Sept:	3.4 / 4.0	Comments:	full, lots of flowers	
<i>Alstroemeria</i>	Colorita® 'Louise'	Van Zanten Breeding B.V.	Dark Pink w/ yellow speckled center	H: 13 W: 14	2023
	Plant/Flower Rating June:	3.0 / 3.5	Comments:	lodging	
	Plant/Flower Rating July:	2.6 / 3.3	Comments:	struggles to stay upright, a little more open habit, much more upright than in the past, good amount of blooms	
# Planted: 15	Plant/Flower Rating Aug:	2.6 / 3.0	Comments:	die back on a few plants, great rose/purple flowers, vibrant flower color, flowers show sun scorch, yellowing foliage, flowers tall above foliage	
Survival: 100.0%	Plant/Flower Rating Sept:	3.4 / 3.7	Comments:	lots of yellowing leaves	
<i>Alstroemeria</i>	Colorita® 'Tamara'	Van Zanten Breeding B.V.	Purple w/ speckled center	H: 10 W: 14	2023
	Plant/Flower Rating June:	3.3 / 3.5	Comments:	mounded growth	
	Plant/Flower Rating July:	3.4 / 3.6	Comments:	consistent size and blooms, not as vigorous growth habit, some yellowing, dense carpet of flowers	
# Planted: 15	Plant/Flower Rating Aug:	2.0 / 3.3	Comments:	yellowing and die back on a few plants, some chlorosis, flowers show sun scorch, yellowing foliage, good display	
Survival: 100.0%	Plant/Flower Rating Sept:	2.8 / 3.0	Comments:	lots are dying, two plants dying	
<i>Alstroemeria</i>	Colorita® 'Yentl'	Van Zanten Breeding B.V.	White w/ yellow speckled center	H: 14 W: 24	2023
	Plant/Flower Rating June:	3.0 / 4.0	Comments:	great flowers. frilly. starting to stand more upright ,SLUGS?	
	Plant/Flower Rating July:	3.4 / 3.3	Comments:	doing worse, less blooms, one plant dying, not many flowers, growth tips coming out of the one that died off, flowers age well	
# Planted: 15	Plant/Flower Rating Aug:	2.9 / 3.0	Comments:	not in flower so much anymore, die back on 1/3 of plants, great white flowers w/yellow throat, fewer flowers than others, not bad, just less color	
Survival: 100.0%	Plant/Flower Rating Sept:	3.4 / 3.8	Comments:	dwarfer, 5 plants appear to be dying	

*Height and width measurements in centimeters.
