Extinct in the wild (EW) - survives only in captivity, cultivation and/or outside native range, as presumed after exhaustive surveys. Critically endangered (CR) - in a particularly and extremely critical state. Endangered (EN) - very high risk of extinction in the wild, meets any of criteria A to E for Endangered. Vulnerable (VU) - meets one of the 5 red list criteria and thus considered to be at high risk of unnatural (human-caused) extinction without further human intervention. Near threatened (NT) - close to being at high risk of extinction in the near future. Least concern (LC) - unlikely to become extinct in the near future. Data deficient (DD) Not evaluated (NE) © Mongabay 1995-2018
