MICRO, MINIATURE AND SMALL ORCHIDS

## PORROGLOSSUM RODRIGOI

**Origin:** Colombia

**Temperatures:** Intermediate to cold growing miniature orchid species

**Light:** Bright shade or filtered LED light

**Watering & Fertilizing:** Regular watering and fertilizing year-round

**General care:** This very rare miniature size Porroglossum species is restricted to very small single location north of Medellin in Colombia. One of the smallest Porroglossum species with beautiful marbled leaves and super cute blooms. We grow ours under intermediate conditions and they do bloom constantly. Grows best under cold to intermediate conditions, in bright shade, good air movement and high humidity. Only good quality water. Can be grown potted or mounted. Great plant for terrariums, vivariums, glass orbs, vases, indoor growing on windowsills or greenhouses and outdoors.
