Library of Congress Cataloging in Publication Data

Main entry under title:

Catalog of Hymenoptera in American north of Mexico.

"An outgrowth of . . . Hymenoptera of America north of Mexico, synoptic catalog (1951) including the first and second supplements (1958, 1967)"

Includes index.

CONTENTS: v.1. Symphyta and Apocrita (Parasitica). — v. 2. Apocrita (Aculeata)

1. Hymenoptera — North America. 2. Insects — North America. I. Krombein, Karl V.

Introduction

By

Karl V. Krombein,

Paul D. Hurd, Jr.,

and

David R. Smith

Preparation and production of this third volume containing various indexes has been tremendously facilitated and accelerated by computer technology. Manipulation of the data base already computerized for the catalog itself (Volumes 1 and 2) enabled us to obtain a listing of taxa in all hierarchies or data categories in numerical sequence. Page numbers were punched by hand, entered into the computer, and then separate programs were run for each index resulting in the arrangement of taxa in alphabetical sequence with pertinent page references. The final step was the conversion of the computerized data to a special magnetic tape capable of driving the phototypesetting unit, the VideoComp 500 Photo Composer, in the Government Printing Office.

Numbers of Genera and Species

The following tables are presented to answer one of the most frequently posed questions concerning a catalog—how many taxa? Table 1 gives the number of valid genera and species of each family and higher category in America north of Mexico. The taxa are arranged in sequence as they appear in the catalog. Subspecies and varieties of a polytypic species listed as valid entities are counted as only one species. For example, *alba alba* and *alba rufa*

are counted as only one species. However, if only one taxon of a polytypic species occurs in America north of Mexico, it is counted as a species. Species listed in unplaced categories are generally not included. Numbers in parentheses represent totals for categories above family level.

In Table 2 the superfamilies are arranged by size according to number of species and percent of the total species of Hymenoptera in America north of Mexico.

Table 1. Numbers of Hymenoptera taxa in America North of Mexico

	<i>Genera</i>	<i>Species</i>
HYMENOPTERA	(2,014)	(17,429)
Symphyla	(139)	(992)
Megalodontoidea	(9)	(101)
Xyelidae	5	29

16. Siricoidea	31	.17
17. Cephoidea	12	.06
18. Trigonoidea	4	.02
19. Pelecinoidea	1	.005
	17,429	99.95

Taxonomic and Nomenclatural Changes

A number of taxonomic and nomenclatural changes were proposed in Volumes 1 and 2. The changes included such categories as new genus, new species, new names to replace homonyms, new synonyms, new combinations and new status. The new genus, new species and new names were listed on pp. xii and xiii of both Volumes 1 and 2. The other taxonomic and nomenclatural changes with pertinent page numbers are listed in the sections which follow.

NEW SYNONYMS

There were some new synonyms at the generic level and numerous new synonyms at the specific level. These were indicated in the Catalog text by the abbreviation "N. syn." following the bibliographic citation of the taxon being synonymized. The synonymy is to be attributed to the author of the section unless the name of another specialist in parentheses follows "N. syn.". In the list which follows, the name of the authority for the synonymy follows the name of the author of the taxon. For example, in the first entry, "*Xyela coloradensis* Rohwer under *Xyela minor* Norton, Smith," Smith made the synonymy.

Xyelidae

<i>Xyela coloradensis</i> Rohwer under <i>Xyela minor</i> Norton, Smith	p. 8
<i>Megaxyela langstoni</i> Ross under <i>Megaxyela major</i> (Cresson), Smith	p. 10
<i>Pleroneura aviingrata</i> Dyar under <i>Megaxyela tricolor</i> (Norton), Smith	p. 10

Pergidae

<i>Acordulecera antennata</i> Rohwer under <i>Acordulecera dorsalis</i> Say, Smith	p. 19
<i>Acordulecera erythrogastra</i> Rohwer under <i>Acordulecera dorsalis</i> Say, Smith	p. 19
<i>Acordulecera parva</i> Rohwer under <i>Acordulecera dorsalis</i> Say, Smith	p. 19
<i>Acordulecera nigrata</i> Rohwer under <i>Acordulecera dorsalis</i> Say, Smith	p. 20
<i>Acordulecera basirufa</i> Rohwer under <i>Acordulecera dorsalis</i> Say, Smith	p. 20
<i>Acordulecera quercus</i> Rohwer under <i>Acordulecera dorsalis</i> Say, Smith	p. 20
<i>Acordulecera hicoriae</i> Rohwer under <i>Acordulecera dorsalis</i> Say, Smith	p. 20
<i>Acordulecera scutellata</i> Rohwer under <i>Acordulecera pellucida</i> (Konow), Smith	p. 20

Argidae

<i>Rhopalospiria</i> Enderlein under <i>Arge</i> Schrank, Smith	p. 21
<i>Hylotoma mentzeliae</i> Cockerell under <i>Arge clavicornis</i> (Fabricius), Smith	p. 21
<i>Hylotoma nigrescens</i> Rohwer under <i>Arge clavicornis</i> (Fabricius), Smith	p. 21
<i>Tenthredo rubiginosa</i> Beauvois under <i>Arge coccinea</i> (Fabricius), Smith	p. 21
<i>Hylotoma erythrosoma</i> Leach under <i>Arge coccinea</i> (Fabricius), Smith	p. 21
<i>Hylotoma sphinx</i> Kirby under <i>Arge coccinea</i> (Fabricius), Smith	p. 21
<i>Hylotoma scutellata</i> Say under <i>Arge humeralis</i> (Beauvois), Smith	p. 21
<i>Hylotoma grandis</i> Rohwer under <i>Arge humeralis</i> (Beauvois), Smith	p. 21

Diprionidae

<i>Monoctenus juniperinus</i> MacGillivray under <i>Monoctenus suffusus</i> (Cresson), Smith	p. 30
--	-------

Tenthredinidae

<i>Gonicerus</i> Malaise under <i>Stromboceridea</i> Rohwer, Smith	p. 42
<i>Dolerus agcistus</i> var. <i>maroa</i> Ross under <i>Dolerus agcistus</i> MacGillivray, Smith	p. 45
<i>Dolerus lesticus</i> MacGillivray under <i>Dolerus bicolor</i> (Beauvois), Smith	p. 45
<i>Dolerus graenicheri</i> MacGillivray under <i>Dolerus bicolor</i> (Beauvois), Smith	p. 45
<i>Dolerus bicolor</i> var. <i>nigrita</i> Ross under <i>Dolerus bicolor</i> (Beauvois), Smith	p. 45
<i>Pristiphora dyari</i> Marlatt under <i>Pristiphora bivittata</i> (Norton), Smith	p. 61

<i>Amauronematus vacalus</i> MacGillivray under <i>Pristiphora chlorea</i> (Norton), Smith . . . p.	61
<i>Pristiphora ortinga</i> Kincaid under <i>Pristiphora melanocarpa</i> (Hartig), Smith p.	63
<i>Pristiphora zella</i> Rohwer under <i>Pristiphora pallidiventris</i> (Fallen), Smith p.	64
<i>Pristiphora pallicoxa</i> Rohwer under <i>Pristiphora pallidiventris</i> (Fallen), Smith p.	64
<i>Pristiphora xanthotrachela</i> Rohwer under <i>Pristiphora pallidiventris</i> (Fallen), Smith p.	64
<i>Pristiphora ostiaria</i> MacGillivray under <i>Pristiphora pallidiventris</i> (Fallen), Smith p.	64
<i>Nematus circularis</i> Kincaid under <i>Pristiphora staudingeri</i> (Ruthe), Smith p.	65
<i>Pristiphora anaka</i> Kincaid under <i>Pristiphora sycophanta</i> Walsh, Smith p.	65
<i>Pteronus occidentalis</i> Marlatt under <i>Nematus iridescens</i> Cresson, Smith p.	67
<i>Pteronus californicus</i> Marlatt under <i>Nematus atriceps</i> (Marlatt), Smith p.	67
<i>Amauronematus coquilletti</i> Marlatt under <i>Nematus auratus</i> (Marlatt), Smith p.	67
<i>Nematus rufocinctus</i> Harrington under <i>Nematus latifasciatus</i> Cresson, Smith p.	67
<i>Amauronematus vacivus</i> MacGillivray under <i>Nematus pinguidorsum</i> Dyar, Smith p.	68
<i>Amauronematus californicus</i> Marlatt under <i>Nematus vancouverensis</i> (Marlatt), Smith p.	69
<i>Pachynematus vernalis</i> Rohwer under <i>Nematus vancouverensis</i> (Marlatt), Smith p.	69
<i>Amauronematus valerius</i> MacGillivray under <i>Nematus vancouverensis</i> (Marlatt), Smith p.	69
<i>Pteronus hyalinus</i> Marlatt under <i>Nematus viridescens</i> Cameron, Smith p.	69
<i>Pontania atra</i> Marlatt under <i>Amauronematus amentorum</i> (Foerster), Smith p.	78
<i>Pontania maura</i> Rohwer under <i>Amauronematus amentorum</i> (Foerster), Smith p.	78
<i>Amauronematus knabi</i> Rohwer under <i>Amauronematus brunneus</i> (Norton), Smith p.	78
<i>Amauronematus vescu</i> MacGillivray under <i>Amauronematus fallax</i> (Lepelletier), Smith p.	79
<i>Amauronematus veneficus</i> MacGillivray under <i>Amauronematus fallax</i> (Lepelletier), Smith p.	79
<i>Amauronematus magnus</i> MacGillivray under <i>Amauronematus isolatus</i> Kincaid, Smith p.	79
<i>Pteronidea egeria</i> MacGillivray under <i>Amauronematus leucolaenus</i> (Zaddach), Smith p.	80
<i>Amauronematus varians</i> MacGillivray under <i>Amauronematus nigriventris</i> (Holmgren), Smith p.	80
<i>Pteronidea melanostoma</i> Rohwer under <i>Amauronematus nigriventris</i> (Holmgren), Smith p.	80
<i>Lycaota bruneri</i> Rohwer under <i>Blennogeneris spissipes</i> (Cresson), Smith p.	89
<i>Parazarca</i> Ashmead under <i>Waldheimia</i> Brulle, Smith p.	98
<i>Calozarca</i> Ashmead under <i>Waldheimia</i> Brulle, Smith p.	98

Braconidae

<i>Chaonia</i> Cresson under <i>Macrocentrus</i> Curtis, Marsh p.	186
<i>Hymenochaonia</i> Dalla Torre under <i>Macrocentrus</i> Curtis, Marsh p.	186
<i>Agathis liberator</i> Brulle under <i>Cremnops haematodes</i> (Brulle), Marsh p.	197
<i>Coelinus nigripes</i> Ashmead under <i>Coelinidea meromyzae</i> (Forbes), Marsh p.	215
<i>Brachistes strigitergum</i> Cushman under <i>Allodorus crassigaster</i> (Provancher), Marsh p.	270

Aphidiidae

<i>Ephedrus aestivalis</i> Viereck under <i>Ephedrus californicus</i> Baker, Marsh p.	296
<i>Aphidius pulcher</i> Baker under <i>Aphidius nigripes</i> Ashmead, Marsh p.	306

Ichneumonidae

<i>Scambus</i> (<i>Scambus</i>) <i>tecumseh</i> Viereck under <i>Scambus hispae</i> (Harris), Carlson p.	324

NEW COMBINATIONS

Numerous generic transfers were made. These were indicated by the abbreviation "n. comb." following the author of the species-level name. The authority for the transfer is the author of that section unless the name of another specialist appears in parentheses fol-

lowing "n. comb." In the list which follows, the authority making the transfer follows the name of the author of the taxon. For example, in the first entry, "*Neodiprion abdominalis* (Say), Smith," Smith made the transfer.

Diprionidae	
<i>Neodiprion abdominalis</i> (Say), Smith	.p. 37
Tenthredinidae	
<i>Pachynematus luteipes</i> (Cresson), Smith	.p. 58
<i>Nematus excavatus</i> (Marlatt), Smith	.p. 68
<i>Nematus kukukiana</i> (Kincaid), Smith	.p. 68
<i>Nematus subpallidus</i> (MacGillivray), Smith	.p. 69
<i>Phyllocolpa nigripicta</i> (Rohwer), Smith	.p. 75
<i>Phyllocolpa nigrita</i> (Marlatt), Smith	.p. 75
<i>Phyllocolpa stipata</i> (MacGillivray), Smith	.p. 75
<i>Phyllocolpa utensis</i> (Rohwer), Smith	.p. 75
<i>Tenthredo cinctitibiis abdominalis</i> (Smulyan), Smith	.p. 118
Braconidae	
<i>Doryctobracon anastrephilum</i> (Marsh), Marsh	.p. 200
<i>Doryctobracon cereus</i> (Gahan), Marsh	.p. 200
<i>Orthostigma crassinervus</i> (Fischer), Marsh	.p. 223
<i>Orthostigma sheldoni</i> (Fischer), Marsh	.p. 224
<i>Orthostigma terryvillensis</i> (Fischer), Marsh	.p. 224
<i>Hypomicrogaster schizurae</i> (Muesebeck), Marsh	.p. 256
Hybrizontidae	
<i>Hybrizon flavocinctus</i> (Ashmead), Marsh	.p. 313
<i>Hybrizon rileyi</i> (Ashmead), Marsh	.p. 313
Ichneumonidae	
<i>Indovia maculithorax</i> (Ashmead), Carlson	.p. 397
<i>Neopimpla bicarinata</i> (Riley), Carlson	.p. 398
<i>Polyaulon erythrope</i> (Ashmead), Carlson	.p. 401
<i>Gelis virginiensis</i> (Ashmead), Carlson	.p. 410

<i>Trypargilum orizabense</i> (Richards), Krombein	p.1649

NEW STATUS

The abbreviation "n. status" was used following the author of a species-level name when a taxon formerly considered to be a subspecies was raised to specific rank in the Catalog, or when a taxon previously recognized as a species was reduced to subspecific rank. The author of the section was responsible for making the change unless the

name of another specialist in parentheses follows the "n. status". In the list which follows, the name of the authority who made the change follows the name of the author of the taxon. For example, in the first entry, "*Ephialtes annulicornis comptonotus* (Davis), Carlson," Carlson made the change.

Ichneumonidae

<i>Ephialtes annulicornis comptonotus</i> (Davis), Carlson	p. 342
<i>Cosmoconus vallis</i> Townes, Carlson	p. 375
<i>Tryphon</i> (<i>Symboethus</i>) <i>foraminatus</i> Townes, Carlson	p. 376
<i>Pygocryptus cruentus</i> Torgerson, Carlson	p. 410
<i>Trychosis peratra</i> Townes, Carlson	p. 454
<i>Chromocryptus vandykei</i> Townes, Carlson	p. 458
<i>Phaeogenes maculicornis hariolus</i> (Cresson), Carlson	p. 490
<i>Diphys euxoae</i> Heinrich, Carlson	p. 511
<i>Trogus pennator</i> var. <i>fulvipes</i> Cresson, Carlson	p. 539
<i>Cryptopimpla blanda jocosa</i> (Cresson), Carlson	p. 573
<i>Cryptopimpla genalis obscurella</i> (Cresson), Carlson	p. 573
<i>Syzeuctus epischniae sigmoidalis</i> Cushman, Carlson	p. 574
<i>Exetastes albitarsis concavus</i> Cushman, Carlson	p. 576
<i>Exetastes albitarsis crassisculptus</i> Cushman, Carlson	p. 576
<i>Perilissus filicornis decoloratus</i> (Cresson), Carlson	p. 589
<i>Parania obscura</i> (Schmid), Carlson	p. 620

Mymaridae

<i>Anagrus nigriceps</i> Girault, Burks	p.1023
<i>Anagrus nigriventris</i> Girault, Burks	p.1023

Pemphredonidae

<i>Passaloeus annulatus annulatus</i> (Say), Krombein	p.1605
<i>Passaloeus monilicornis ithacae</i> Krombein, Vincent	p.1606

Larridae

<i>Liris panamensis muesebecki</i> (Krombein), Krombein	p.1619
<i>Liris panamensis panamensis</i> (Cameron), Krombein	p.1619
<i>Tachysphex apicalis apicalis</i> Fox, Pulawski	p.1630
<i>Tachysphex apicalis fusus</i> Fox, Pulawski	p.1630
<i>Trypargilum clavatum clavatum</i> (Say), Coville	p.1646
<i>Trypargilum clavatum johannis</i> (Richards), Coville	p.1646

Indexes

The bulk of this volume consists of separate indexes to the taxa of North American Hymenoptera and to their hosts, parasites, prey, pollen and nectar sources, and predators. Author names are used only in the index to taxa of Hymenoptera.

There is only a single page reference to the majority of taxa of Hymenoptera; however, two page numbers are given where the heading for the typical subgenus is separated by more than a page from the entry for the generic name. Multiple page numbers are used for many of the taxa of hosts, parasites, and so forth, because so many species of animals and plants may be associated with more than a single species of Hymenoptera. Occasionally the same host or parasite may appear more than once on the same page; in this case a number in parentheses follows the page number to indicate the number of times one will find that name on the page. Each index has individual marginal coding to facilitate usage.

Index to Taxa of Hymenoptera

This index contains both superspecific and species-group names. Supergeneric names are set in capital letters, valid names in Roman, synonyms and homonyms in italics. Entries for valid subspecies, races and varieties are denoted by [s], [r] or [v] following the generic name.

Index to Hosts

Included here are the names of the organisms, both animal and plant, which serve as the source of developmental nutrition for Hymenoptera during at least one stage of their development. Excluded are the nectar and pollen sources which are treated in a separate index.

Index to Parasites

This index lists the parasites of Hymenoptera Aculeata only. The term is used broadly because the nature of the relationship is not always clear. Accordingly, the taxa listed here may be ecto- or endoparasites, social parasites, cleptoparasites, or other associates such as symbionts,inquilines or scavengers.

Index to Prey

Included here are the taxa of Arthropoda which are stored as larval food by the more advanced aculeate wasps.

Index to Pollen and Nectar Sources

Since in addition to the established nectar and pollen sources much of the known information on the intrafloral relationships of aculeate Hymenoptera pertains to floral visitation records of unspecified or even unknown

purpose, this index embraces all the plant taxa listed in the category labeled pollen. In some entries the abbreviations aff. (related to) and cf. (compare) are used to preserve the original literature citations.

Index to Predators

This brief index lists the taxa in several genera of higher wasps which store other species of Hymenoptera in their nests as food for their larvae. Also included are various vertebrate and invertebrate predators of species of Hymenoptera.

Acknowledgments

Preparation of the indexes in such a brief time would have been impossible without the technical expertise of Smithsonian personnel in computer services and applications. We are most grateful to D. Bridge, Operations Manager, Office of Automatic Data Processing, and to J. J. Crockett, Manager, and W. L. Lawson, Computer Specialist, Software Systems and Services, Office of Computer Services, Smithsonian Institution, for their wizardry in developing programs to extract the taxa, add page numbers and alphabetize the entries for production of the indexes.

We are greatly indebted to P. R. Brown, clerk typist for the Hymenoptera Project, for her careful, accurate checking of computer

printouts and entry of page numbers.

The following hymenopterists on the staff of the Smithsonian Institution (SI), Systematic Entomology Laboratory (SEL) of the U.S. Department of Agriculture, and University of California, Riverside (UCR), checked computer printouts of the indexes in the groups following their names: R. W. Carlson (SEL) (Ichneumonidae, Stephanidae, Evanioidea, Trigonaloidea), G. Gordh (UCR) (Encyrtidae), P. D. Hurd, Jr. (SI) (Apoidea), K. V. Krombein (SI) (Bethyloidea, Scolioidea, Vespoidea, Pompiloidea, Sphecoidea), P. M. Marsh (SEL) (Braconidae, Aphidiidae, Hybrizontidae), C. F. W. Muesebeck (SI) (Chalcidoidea, Cynipoidea, Pelecinoidea, Proctotrupeoidea, Ceraphronoidea), and D. R. Smith (SEL) (Symphyta, Formicoidea).

J. F. Mello, Assistant Director, National Museum of Natural History (SI), has given constant encouragement since his analysis of the 1951 catalog and development of the matrix for catalog computerization. His foresight provides an opportunity for future enhancement of the computer base by addition of relevant information such as keys to taxa, type depositories, and so forth.

Finally, it is a pleasure to acknowledge the continued and enthusiastic support of Porter M. Kier, Director, National Museum of Natural History (SI) and of Lloyd V. Knutson, Chairman, Insect Identification and Beneficial Insect Introduction Institute, U.S. Department of Agriculture.

 2075(2), 2141, 2142, 2166, 2173(2), 2174,
 2179, 2185
Acamptopappus..... 1761, 2167
 sphaerocephalus... 1752, 1990, 2025, 2027,
 2153, 2162, 2167
 sphaerocephalus var. *hirtellus*..... 1874
acanthodes, *Echinocactus*..... 1935
acanthodes, *Ferocactus*..... 1847, 1885, 1910, 2028
acanthodes, *Ferrocactus*..... 2065
acaulis, *Actinea*..... 2152
acaulis, *Anisocoma*... 1789, 1791, 1792(2), 1793,
 1814, 1861, 1935, 1938
acaulis, *Cymopterus*..... 1809
acaulis, *Haplopappus*..... 1813
Acer... 1755, 1762, 1802, 1819, 1821, 1824, 1830,
 1836, 1839(2), 1842, 1949, 2032
 apicatum..... 1768
 grandidentatum..... 1832
 macrophyllum..... 1796, 1843
 negundo..... 1828, 1835
 platynoides..... 1832
 rubrum..... 1827
 saccharinum..... 1839
Acerates..... 1848, 2051, 2053, 2054
acerifolium, *Viburnum*..... 1755, 1802
acerosa, *Gilia*..... 1878, 1894, 1918
Achillea... 1754, 1762, 1768, 1799(2), 1831, 1867,
 1943, 1950, 1951(2), 2050, 2068, 2134, 2155
 borealis arenicola..... 1754, 1766, 2179
 lanulosa... 1761, 1764, 1765(2), 1767, 1785,
 1825, 1829, 1831, 2008, 2052, 2054, 2072
 millefolium... 1761, 1762, 1764, 1765, 1767,
 1768, 1785, 1829, 1830, 1837, 1838, 1907,
 1987, 1994, 1997, 2018, 2052, 2065, 2073,
 2148, 2181
 achilleaeifolia, *Gilia*..... 1820, 1938(2), 2181
Achyranthes..... 2070
acradenius, *Haplopappus*... 1751, 1754, 1763, 1887,
 1892, 1894, 1899, 1900, 1901, 1902, 1905,
 1943, 1944, 2024, 2025, 2053, 2064, 2071,
 2145(2), 2147, 2149(2), 2150, 2151, 2153,
 2164, 2167
acre, *Sedum*..... 1831
acris, *Ranunculus*..... 1782, 1828
Actinea..... 1780, 1821, 1823, 1902, 2128, 2153
 acaulis..... 2152
 richardsonii..... 2152
Actinella..... 2066
Actinomeris
 alternifolia..... 1857
actoni, *Encelia*... 1814, 1928, 2022, 2035, 2065,
 2151, 2153, 2166
aculeata, *Parkinsonia*... 1771, 1942, 2034, 2050,
 2125, 2142, 2157, 2173, 2175, 2184,
 2185(2), 2187
acuminatum, *Allium*..... 2179
acuta, *Sida*..... 2141
adenocaulum var. *parishii*,
Epilobium..... 1991
Adenostegia..... 2155
 filifolia..... 2075
 pilosa..... 1987
 villosa..... 2073
Adenostoma..... 1821, 1930, 1979
 fasciculatum... 1751, 1761, 1762(2), 1764,
 1765(2), 1767, 1820, 1832, 1834, 1907,
 1910(2), 1928, 2008, 2024, 2155
 sparsifolium..... 1751, 1910, 2025
adoratus, *Rubus*..... 1837
adpressa, *Brassica*..... 1832, 2134, 2142, 2150, 2181
adscendens, *Aster*... 1754, 1892, 1997, 1999, 2026,
 2067, 2073, 2149, 2151, 2179
adscendens delectabilis, *Aster*..... 1767, 2008, 2149
adscendens var. *yosemitanus*, *Aster*..... 2026
Aesculus... 1798, 1950, 1951, 2036, 2039, 2125,
 2126, 2127, 2128, 2159, 2165, 2183
 californica..... 2185
 glabra sargentii..... 1755, 1836, 2177, 2178
aestivale, *Benzoin*..... 1828, 1838, 2178
aff fremontii, *Phacelia*..... 1940, 2013
affinis, *Lithophragma*..... 1797, 1824
affinis, *Mentzelia*..... 1913, 1923, 1940
affinis, *Phacelia*..... 1756, 1776, 1832, 1936, 1990
affinis, *Sophora*..... 2181
Azelia..... 1988, 1998, 1999, 2052, 2054, 2133

- cassinoides*..... 2074
Agastache... 1949, 1950, 1951, 1999, 2033, 2052, 2053, 2067
breviflora..... 2141, 2177, 2179, 2182
foeniculum..... 1936
nepetoides..... 2139
occidentalis..... 2060
urticifolia..... 1803, 2047, 2185
Agave..... 1751, 2053, 2182
consociata..... 1906
deserti... 1761, 1906, 1908, 1910(2), 1927, 1931, 2054
nevadensis..... 2180, 2185
palmeri..... 1907, 2157
ageratoides, Eupatorium..... 2177
Ageratum..... 2181
aggregata, Gilia..... 1880
agnatus, Aster..... 2153
agnus-castus, Vitex..... 2139, 2145, 2179, 2180
Agoseris... 1790, 1791, 1816, 1825, 1951(2), 2010, 2066, 2126
aparagoides..... 1766
aurantiaca..... 1810, 1928, 1934
glauca... 1789, 1791, 1792, 1795, 1816, 1861, 2146, 2180
glauca var. monticola..... 1791
grandiflora..... 1790(2)
heterophylla... 1789(2), 1790(3), 1791(2), 1792, 1793(2), 1831, 1928, 1937, 2035, 2125
retrorsa..... 1791
agrifolia, Quercus..... 1795, 1797
Ailanthus..... 1950
altissima..... 1867
ajugoides, Stachys..... 1994, 2142, 2182, 2184
alata, Sphaeralcea..... 1757
