

## Wednesday Walk in Kowen Travelling Stock Reserve (The Pound) – 23 January 2008

The Kowen TSR is on the Kings Highway between Queanbeyan and Bungendore (NSW). It is small but has an interesting array of plants and a good floral display in spring. It is open woodland with some fine specimens of *Eucalyptus bridgesiana*, *Eucalyptus nortonii* and *Eucalyptus rossii*. This year there was a good display of Blue Devils – *Eryngium rostratum* – and *Bursaria spinosa* ssp. *lasiophylla* and an unknown daisy bush was flowering (probably *Cassinia hewsoniae*). *Lotus australis*, *Calotis scabiosifolia* var. *integrifolia* and *Desmodium brachypodum* are found in the Reserve – plants not often seen on our walks.
