

Wednesday Walk in Six Mile Travelling Stock Reserve – 9 November 2011

Six Mile TSR is a small (10 hectare) reserve on the Bungendore-Hoskinstown Road. There is a ridge of grassy box woodland descending to a flat of secondary native grassland. We have visited the reserve several times and have a long list of species. We added several more on this visit including *Calotis anthemoides*, *Pultenaea microphylla*, *Diuris sulphurea*, *Glycine clandestina* and some grasses. We saw many things flowering. Highlights were *Podolepis jaceoides*, *Pultenaea subspicata*, *Leucochrysum albicans* var. *tricolor*, *Helichrysum scorpioides*, *Diuris sulphurea*, many different *Wahlenbergia*, *Velleia paradoxa*, *Calotis scabiosifolia* var. *integrifolia*, *Chrysocephalum apiculatum*, *C. semipapposum*, *Xerochrysum viscosum* and *Dillwynia sericea*. There were some magnificent old trees - a few damaged in the recent strong winds.
