Nightjar Ridge Natives

we grow Australian natives | cut flowers | revegetation projects

What we do:
Native nursery: We are located in the hinterland of the Gold Coast where we grow & sell selected Australian natives plants. Predominantly: Standard grafted Grevillea's, and grafted Australian plants. We also do contract growing for wholesale, individuals and nurseries.

Cut flowers arrangements: All grown at our property specialising in weddings, everyday, funerals and wholesale buckets.

Revegetation/soft landscaping projects:
We can design, plant and grow your native only garden or bushland restoration work carried out on your property.

Why plant standard Grevilleas:

A standard Grevillea is a grafted plant where a lower growing, or difficult to grow species or hybrid is grafted, generally onto a Silky Oak (Grevillea robusta) at height. But don't worry; your plant is basically at maximum height. The smaller plant grafted on top now "makes the rules" and there is never any chance of the plant achieving the size, or extensive root system of a silky oak.

The purpose of a standard Grevillea is not only to display the plant and flowering at eye level, but can add another dimension to your garden by allowing the placement of smaller growing plants underneath in limited space. They are ideal for prickly type shrubs because it makes the chore of weeding underneath them so much easier.

Standard Grevilleas make great hedges, perfect for small gardens, amazing to add instant height and colour to your garden and great for Grevillea enthusiasts as we grow hard to get and rare varieties.

Stocklist as of April 2020

Standard Grevilleas

If you don't see what you want on our list ask us as it just might not be ready yet, or we can graft to order with a deposit.

All 1.8 meter grafted standard Grevillea's are \$100 each (10th one free) Interstocked plants are generally \$150 each (2 grafts).

If buying wholesale in larger numbers we can provide a quote.

The photo's below are not all 'standard Grevillea's – they are to illustrate what each species flower colour, foliage and shape to make it easier for buyers to decide what they are wanting. Not all the photo's are taken by us.

We have many more species growing in our greenhouse that are not ready or that have sold out. Dave has grafted more and we are just waiting for them to grow. So if you don't see what you want let us know and we can put you on waiting list. These plants take years to get to sale quality so we appreciate your patients while we are figuring out what people are wanting and we get the right numbers ready.

Cultivars - \$100 each with the exception of * species (“*” indicates interstocked plants –generally \$150 each, some really specialized variety \$175 each.)

Alex Pink

Amber Blaze

Bigfoot

Billy Bonkers (none available right now)

Boongala Spinebill*

Bronze Rambler

Canning Kumquat

Copper Crest

Crowning Glory

Fanfare

Droopy Drawers

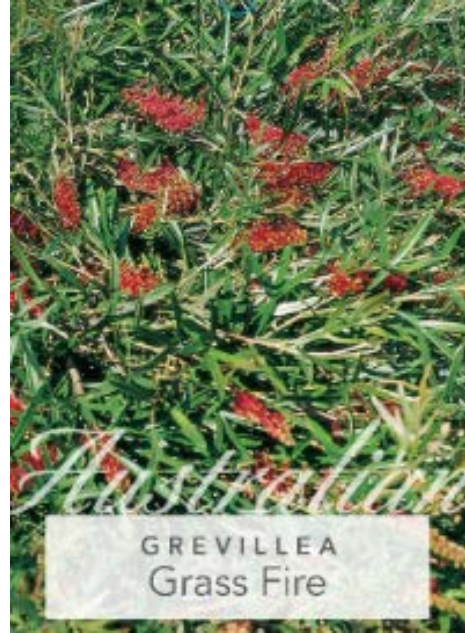

Flame 'n' Beauty

Granya Glory

Grassfire

Hot Lips*

Katydid

Lana Maree

Lime n Soda

Loopy Lou

Ninderry Gold – none ready at the moment (there aren't any photos of the flowers yet) Big golden flower – similar to Formosa (hardier and faster growing).

Photo to come.

Ninderry Sunrise

Ochre Pokers

Orange Wow

Royal Mantle

Ruby Red

Shaggy Gold

Silva Sulfa

Soopa Doopa*

Sunkissed Waters

Tango

Thorny Devil

Wakiti Gem

Wakiti Sunrise

Ivory Whip (none available at the moment – waiting list)

Standard Grevillea Species - \$100 each (“*” indicates interstocked plants, price on cultivar heading)

acropogon

aquifolium

banksii prostrate (forms)

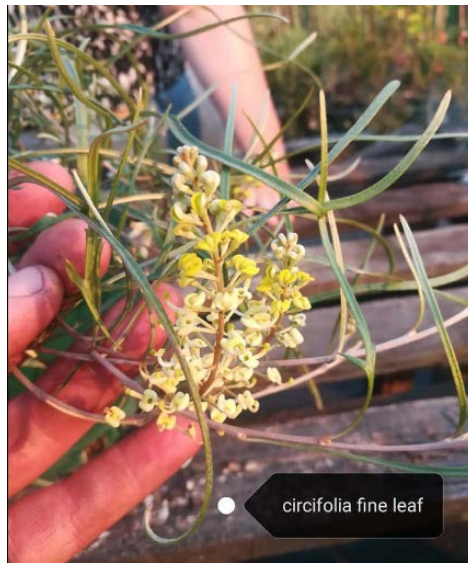

beardiana

Bedgoodiana – pink through to orange flowers

cirsiifolia (very difficult to maintain, for enthusiasts plant collectors only)

Concinna

confertifolia

crithmifolia

*crowleyae**

curviloba ssp *curviloba*

curviloba ssp *incurva*

depauperata prostrate – red spider flowers

diffusa ssp *filipendula*

dryandroides ssp *hirsuta**

Florida – white/cream flowers

fastigiata

floripendula

formosa

humifusa

goodii

infundibularis

*involucrata**

laurifolia

leptobotrys (forms)*

leptopoda

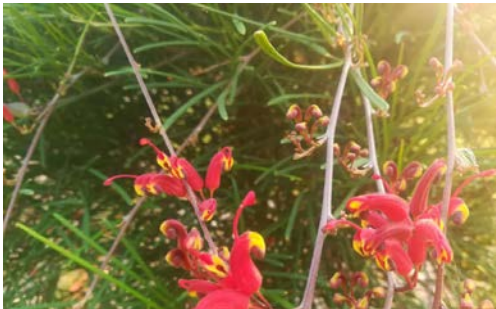

maxwellii*

nivea

nudiflora (forms)

plurijuga 1 fine leaf left at least 2.4m (\$150 in 300mm pot)
(it will be spectacular at that height)

pilosa

obtusifolia

polybractea*

prostrata

pteridifolia prostrate*

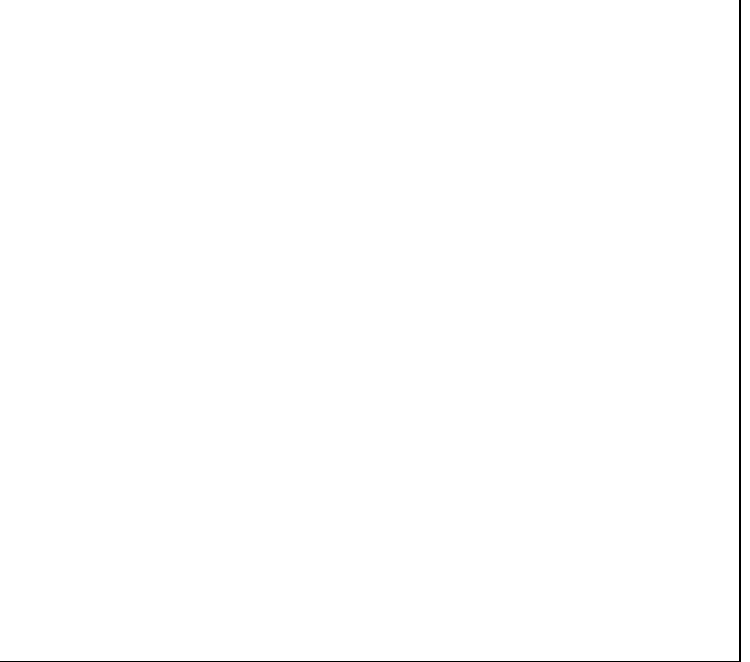

quercifolia*

repens (red) – Deep red flower

repens (yellow) – Similar to red foliage with yellow/red flower (photo's to come)

rudis

scapigera* (this photo is birds eye view)

scortechinii

synapheae (forms)

tenuiloba

thyrsoides ssp pustulata* - Pink furry flowers

stenomera

georgeana

thyrsoides ssp thyrsoides

variifolia
very rare - for enthusiasts plant collectors only
