Abstract: Encompassing 1.69% land area of India, Uttarakhand State sustains more than 25% species of flowering plants of India reflecting richness of flora. Large numbers of species in the state are threatened and several sources have come up with their own lists of threatened species using different threat categories leading to ambiguity. This communication attempts to compile a complete list of threatened Angiosperm species from eleven authentic sources with updated nomenclature, systematic position, original sources, threat assessment, elevational and global distribution. A total of 290 species belonging to 176 genera, 63 families, and 29 orders are listed which represent about 6% of the total flora. Elevational distribution of species shows that the 2–3 km elevation zone harbors more than half of the threatened flora (52.14%) and more than 44% endemic species despite the fact that maximum species richness is known in the 1–2 km elevation zone. Perusal of literature shows that selection of species for micropropagation is skewed towards medicinal plants rather than only threat status of a species. A disparity exists in two important sources (IUCN Red List 2020–21 and Indian Red Data Book) listing threatened taxa with only six species common to both. Eight additional species in IUCN Red List 2020–21 and 49 additional species in Indian Red Data Book are not included and vice versa. 267 species listed as threatened in various sources are not even evaluated by recent IUCN Redlist guidelines and thus warrant their immediate assessment to understand their correct present status in nature.

Keywords: Angiosperms, assessment, Indian Red Data Book, IUCN Red List, micropropagation, plants.

Editor: Afroz Alam, Banasthali Vidyapith, Rajasthan, India.

Author details: DR D.S. RAWAT has been working on different aspects of flora of Uttarakhand since 1987 and has trekked extensively in Uttarakhand for collection and photographing the plants. He has described four new species, several new records to India and western Himalaya, together with many rediscoveries. DR SATISH CHANDRA is working as assistant professor in the Department of Botany, Government Degree College Tyuni, Dehradun, Uttarakhand, India. He completed his PhD in plant taxonomy by working on the family Caryophyllaceae and his research interests include plant nomenclature, biodiversity and ethnobotany. DR P. CHATURVEDI is professor & head, Department of Biological Sciences, G.B. Pant University of Agriculture & Technology, Pantnagar. In vitro morphogenesis, conservation biology of threatened medicinal plants, plant biodiversity and bioprospecting of bryophytes are key research areas of her interest. She has successfully developed micropropagation protocols of several medicinal plants viz., *Centella asiatica*, *Aconitum baileya*, *Picrorhiza kurroa*, *Polygonatum verticillatum* and *Rheum emodi*.

Author contributions: Concept of work and compilation of data: DSR; writing article: DSR, SC, PC.

INTRODUCTION

The actual number of all extant living species on Earth is yet not exactly known but we are now beginning to understand this enormous diversity of life on Earth (Wilson 1999). Though, the estimates range from 8.6 million to 15 millions of eukaryotes and trillions of prokaryotes (bacteria and archaea) living on Earth (Mora et al. 2011; Hinchliff et al. 2015; Locey & Lenon 2016; Larsen et al. 2017), only about 1.8 million are named and listed in Catalogue of Life 2020 (Roskov et al. 2020). The Earth's biosphere has already entered into the sixth mass extinction, majorly because of human impact. With a 1,000 fold increase in the natural rate of extinction of species (Pimm et al. 2014; De Vos et al. 2015) it is no exaggeration to state that a large number of species will disappear from Earth without even getting any name. Among the estimated described 21,37,939 species 31,030 species are already facing the threat of extinction owing to various natural and anthropogenic factors (IUCN Redlist 2020). Following the IUCN data, perhaps about 20% of all existing species might become extinct within the next few decades and 40% or more by the end of the present century (Pimm et al. 2014; Kew 2016; Pimm & Raven 2017).

Green Plants (*Viridiplantae*) are among the better known groups of organisms and dominated by more than 0.36 million Angiosperms (flowering plants) of which 38,445 species have been assessed for threat categories. The results show that 148 are already extinct from the wild, 15,624 are threatened and 2,594 do not have adequate data to assess threats to them as per IUCN Red List 2020–21 (<https://www.iucnredlist.org/search>). India is one of the top 10 species-rich nations of the world and 18,666 species of flowering plants are known within its territory (Mao & Dash 2019). Till date, 2020 species of flowering plants of India have been assessed as per the IUCN Redlist criteria according to which six species are extinct, two are extinct from the wild, 411 are threatened (84 Critically Endangered, 180 Endangered, 147 Vulnerable), 1601 are not threatened while 93 do not have adequate data today to assess threat (<https://www.iucnredlist.org/search>).

Uttarakhand is a small (53,483 km²), mountain dominated state of India, located in the Himalayan global biodiversity hot spot and constitutes the easternmost part of the western Himalayan phytogeographical province of India (Balakrishnan 1996). Following Takhtajan (1986) and Welk (2016) Uttarakhand embraces two floristic kingdoms- 'Holarctic' (above 1–1.5 km elevation) and 'Paleotropic' (below 1km elevation) and

surrounded by western Tibetan provinces in the north and the Gangetic province in the south. Three major floristic regions represented in Uttarakhand are western Himalayan province at the higher elevation, eastern Himalayan province in mid-elevations, and the Gangetic province at lower elevations and plains, while the arid western Tibetan province also finger-in at the head of anterior valleys (Welk 2016).

Uttarakhand is enriched with 24,303 km² of forests covering 45.44% of its total geographical area and about 4800 wild taxa of seed plants within 1,400 genera of 215 families (Uniyal et al. 2007; Pusalkar & Srivastava 2018; India State of Forest 2019). Representation of different phytogeographical elements, extensive elevation gradient (ca. 200–7,817 m), mountain dominated terrain, and enormous diversity in microclimatic conditions have resulted in a high diversity of angiosperm flora which accounts for nearly 25% of total Indian flora in only 1.69% geographical area of the country. Owing to its high species richness of Angiosperms, the flora of Uttarakhand can also be assumed to having many threatened species (Images 1–24). In addition to these species, 107 species, endemic to Uttarakhand (Singh et al. 2015; Pusalkar & Srivastava 2018) are also important for conservation due to their restricted distribution in the nature.

It has already been pointed out by Pimm et al. (2014) and reiterated by Raven & Wackernagel (2020) that the species most likely to become extinct are by definition the rare ones, and most undescribed species are relatively rare. Obviously, the first step towards conservation is to know which species are rare ones (threatened species). Considering the risk of extinction of the species IUCN has prepared categories and criteria for classification of species under different threat categories (IUCN 2012). It played a pivotal role in prioritizing the threatened species and in the drafting of their conservation plans. IUCN Redlist of Threatened Species is revised and updated thrice in each calendar year and country-wise lists are available in it.

Biodiversity of India is confronting various threats due to climate change, global temperature rise, habitat destruction, poor land use practices, invasive alien species, over-exploitation of the resources and environmental pollutions (Barik et al. 2018) and flora of Uttarakhand is no exception to this (Pusalkar and Srivastava 2018). Red Data Book of Indian Plants (Nayar & Sastry 1987–90) is an incomplete document wherein data on some threatened vascular plants were provided on the basis of herbarium history of these species. Later, Rao et al. (2003) listed 1,255 species of

threatened Indian vascular plants on the basis of the 1997 IUCN Red List of Threatened Plants. While these lists or data are available at country level, an updated list of threatened and endemic species of the species-rich state of Uttarakhand is yet to be compiled. Various scientific publications (Singh et al. 2010; Balakrishna et al. 2012; Bisht et al. 2013) often mention different species as threatened without correctly justifying their threat categories by appropriate source references. The present work is an attempt to provide a recent and complete list of threatened Angiosperm species with updated nomenclature and systematic position with original sources.

MATERIALS AND METHODS

The earliest holistic endeavour of publishing available data on threatened vascular species of India was attempted by the Botanical Survey of India, Ministry of Environment and Forests, Gol and published as 'Indian Red Data Books volume-1–3' (Nayar & Sastry 1987–90) wherein important data on 602 species were published. The species listed in these volumes and occurring in Uttarakhand are included in our list of threatened species (Table 1, column 1) with threat status (indicated by superscript '1' with threat status in column 2 of Table 1; e.g., R¹). Similarly, distribution of all 1,215 angiosperm species listed in Rao et al. (2003) was studied carefully and all species known in Uttarakhand were included in table-1 and shown by superscript '2' (e.g., E²). The species listed in recent IUCN Red List 2020–21 (<https://www.iucnredlist.org/>) of threatened species for India known to be occurring in Uttarakhand are included and status listed in IUCN Red List is shown by superscript '3' (e.g., CR³). Data Deficient species (DD) in this red list are also included here on account of their rarity due to which adequate data is not available for their assessment. The recent version of IUCN Red List (IUCN Red List 2020) now has the facility to search threatened species of a particular state of India and the species found in this list are also included with their status shown by superscript '3A' (e.g., CR^{3A}). Though, IUCN Red List for India and IUCN Red List of Uttarakhand are obtained from the same data source, they show a few differences due to which these two search results are shown differently. Ved et al. (2003) have published threatened medicinal plant species of Indian western Himalaya after threat assessment based on IUCN criteria. Those species which are listed in it and known in Uttarakhand are included in table-1 and threat assessment is shown by superscript '4' (e.g.,

EN⁴). Internationally, appendices of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) play an important role in regulated trade of threatened species. All the species listed in CITES appendices (2019) and known in Uttarakhand are also included in Table 1. Since no specific threat status is mentioned in CITES appendices, in column 2 status is shown as '1A' (for species listed in Appendix 1) or '2A' (species listed in appendix-2) with superscript '5' (e.g., 2A⁵).

The first volume of Flora of Uttarakhand (Pusalkar & Srivastava 2018) has also provided a list of threatened species and endemic species, separately, with threat status following IUCN Red List, and these are also included in Table 1. Endemic species are included in our list with 'VU' status, following Pusalkar & Srivastava (2018), based on their small area of occurrence in the world. Uniyal et al. (2007) also listed threatened species of Uttarakhand with checklist of seed plants of Uttarakhand and these species are included and shown by the superscript '7' (e.g., R⁷). Similarly, the species indicated as threatened in Uttarakhand by National Biodiversity Authority at <http://nbaindia.org/uploaded/pdf/notification/4.4%20%20Uttarakhand.pdf> (shown as VoE⁸, VoE= verge of extinction), Uttarakhand Biodiversity Board at https://sbb.uk.gov.in/files/act/4.4_Uttarakhand.pdf (shown as HT⁹, HT= high threat), ebook by Uttarakhand State Biodiversity Board at <https://sbb.uk.gov.in/pages/display/88-books> (edited by Shah; shown as HT¹⁰), and ENVIS Centre, Botanical Survey of India at http://www.bsienvis.nic.in/Database/E_3942.aspx (shown by superscript '11' with threat status in column-2, e.g., R¹¹) are also included in Table 1. All the sources have not followed IUCN criteria so the statuses mentioned are not comparable. Species endemic to Uttarakhand are also marked by '*'. Species names are given in bold case and synonyms are in italicized normal case. If names used in original sources have changed these are given as synonyms. Names of all species are mainly checked in Plants of the World Online POWO (2019), Singh et al. (2019) and Catalogue of Life 2020 (Roskov et al. 2020) for nomenclatural updates. Synonyms, basionym wherever required (considering use in regional or national flora) are also given. After the scientific name, habit of the plant is given in column-1. In the second column threat status as given in original documents is mentioned. In the third column distribution of species in India/Himalayas and global distribution based on different sources is given. In the fourth column, elevational distribution of species compiled from various authentic sources is given. Wherever information is not available

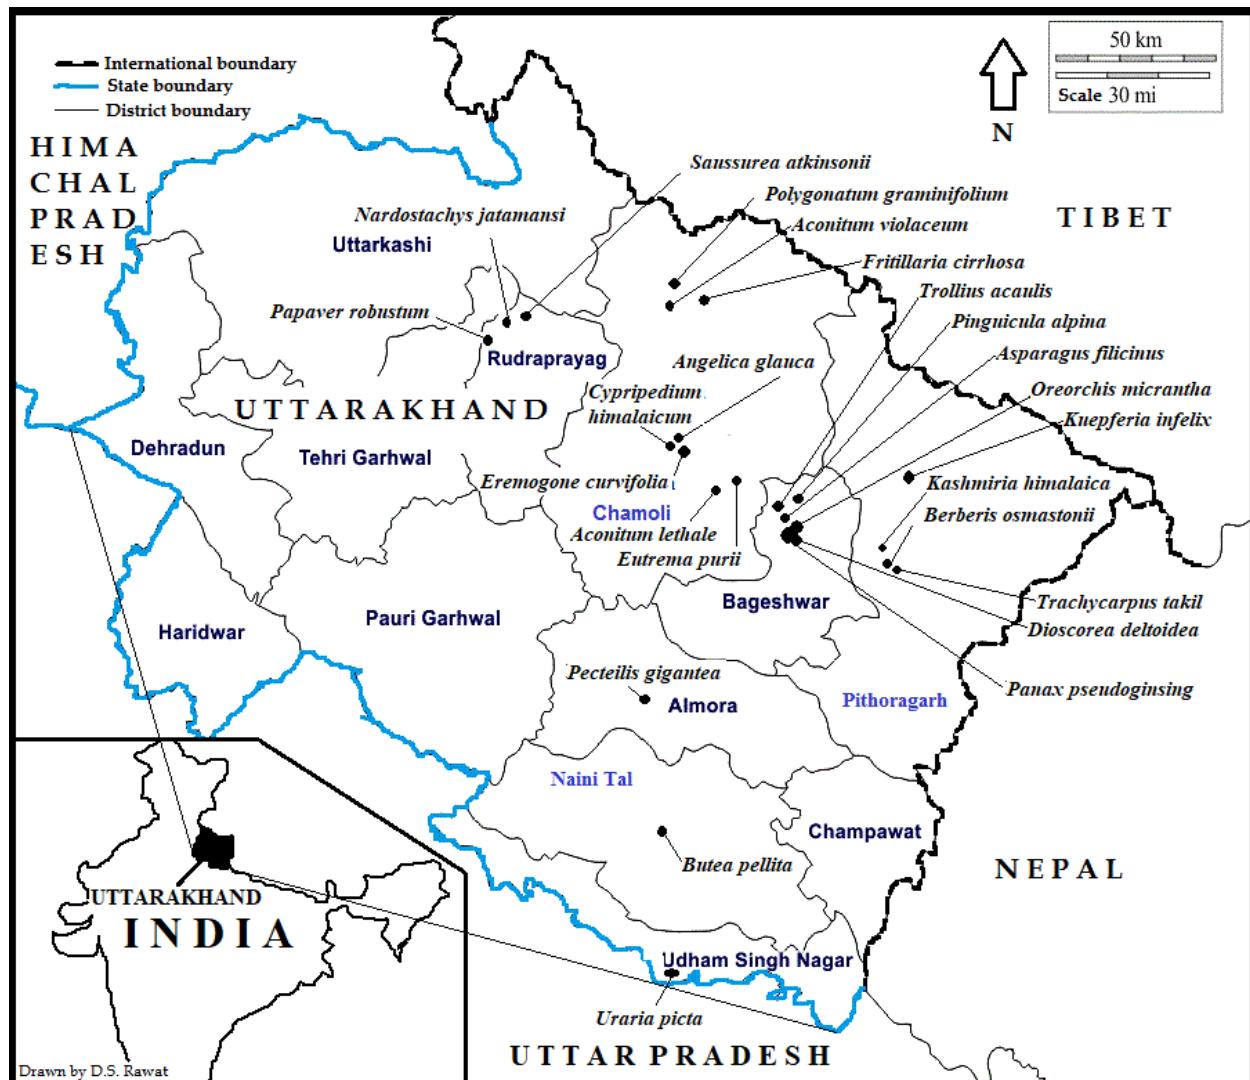

Figure 1. Location map of photographed species.

it is indicated by '?'.

All the threatened species listed in Table 1 are arranged order and family wise following arrangement and circumscription of families given in Angiosperm Phylogeny Group classification (APG IV 2016). Abbreviations used in Table 1 for different geographical areas (Indian states, Himalayan areas, Countries) are detailed out below Table 1. Some of the species listed in original documents are dropped from Table-1 on account of various reasons elaborated in results and discussion part (Table 2).

RESULTS AND DISCUSSION

The compiled list of threatened species shows the presence of 290 threatened species (211 herbs, 43 shrubs, 24 trees, 12 climbers) belonging to 29 orders, 63 families and 176 genera. This number of species is about 6% of the total wild flora of the state. Some of the species listed as threatened in different sources are not included in it on account of clearly being synonyms of other common species, wrong identification, variety being not recognized in recent works or international databases, invasive species, or being cultivated species (Table 3). More than 100 species are endemic to the state. Source wise number of species included in Table 1 is depicted in table-2 which shows that maximum numbers of species are based on Pusalkar & Srivastava (2018) which is a

recent document on flora of Uttarakhand.

Family wise, Orchidaceae (27⁺ genera and 47⁺ spp.) contains the largest number of threatened species followed by Fabaceae (15 genera, 26 spp.), Poaceae (14 genera, 19 spp.), Apiaceae (12 genera, 16 spp.), Rosaceae (8 genera, 16 spp.), Asteraceae (8 genera, 14 spp.), Balsaminaceae (1 genus, 10 spp.), and Ranunculaceae (7 genera, 10 spp.). Rest of the families contain less than 10 threatened species. The genus *Impatiens* L. has 10 threatened species and *Berberis* L. has eight species threatened out of total 30 spp. each, known in Uttarakhand while seven species of *Spiraea* L. out of 18 total known in Uttarakhand are threatened (Uniyal et al. 2007; Pusalkar & Srivastava 2018).

Elevational distribution of 280 species compiled from different sources shows that the maximum number of threatened species (146 spp., 52.14%) are distributed in the 2.0–3.0 km elevation zone, followed by the 3.0–4.0 km zone (126 spp., 45.0%), 1.0–2.0 km zone (99 spp., 35.35%), 4.0–5.0 km zone (66 spp., 23.57%) and up to 1.0km (58 spp., 20.71%). The lowest number of threatened species (11 spp., 3.92%) is found in the 5.0–6.0 km zone which is obvious being a species poor zone. On elevation gradient, maximum forest cover (India State of Forest Report 2019) and highest species richness across all habits was recorded in the 1–2 km zone (1.4–1.6 km) by Kharkwal et al. (2005) while Oommen & Shanker (2005) found the 1.0–2.3 km zone with the highest diversity of woody elements. Threatened species, however, are more concentrated in the 2–3 km zone and then in the 3–4 km zone, thus not directly influenced by high forest cover or species richness. Elevation distribution of 96 endemic species also shows a similar pattern with a maximum of 43 species (44.79%) in the 2–3 km zone, followed by 36 species (37.5%) in the 3–4 km zone, 28 species (29.16%) in the 1–2 km zone, 16 species (16.6%) in the 0.2–1 km zone, and 14 species (14.58%) in the 4–5 km zone. Species richness is expected to reduce with increasing elevation but in the Himalayas it is noticed highest in mid hills (1,500–2,500 m) above which it starts decreasing making a hump-shaped pattern (Grytnes & Vetaas 2002; Kharkwal et al. 2005). The species richness of threatened species as well as endemic species more or less also follows this pattern with moderate richness at lower elevations which increases to highest value in mid elevation (2–3 km elevation zone) and then starts reducing. It is apparent that species with limited elevation range (<500 m) require special attention as these are either narrow range endemics (e.g., *Eremogone curvifolia* (Majumdar) Pusalkar & D.K. Singh) or rarely collected (e.g., *Rubus*

almorensis Dunn).

Today, threat statuses accepted by IUCN only are considered correct and valid in international literature. As of the recent IUCN Red List 2020–21, only 54 species known in Uttarakhand have been evaluated, within which only 14 species are threatened. Critically Endangered (CR) species are *Aucklandia costus* Falc. (=*Saussurea costus* (Falc.) Lipsch.), *Gentiana kurroo* Royle, *Lilium polyphyllum* D. Don and *Nardostachys jatamansi* (D.Don) DC. Endangered species (EN) are *Aconitum heterophyllum* Wall. ex Royle, *Angelica glauca* Edgew., *Cypripedium elegans* Rchb.f., *C. himalaicum* Rolfe, and *Pittosporum eriocarpum* Royle. Vulnerable species (VU) are *Aconitum violaceum* Jacquem. ex Stapf, *Cypripedium cordigerum* D. Don, *Dalbergia latifolia*, *Dienia muscifera* Lindl. (=*Malaxis muscifera* (Lindl.) Kuntze), and *Ulmus wallichiana* Planch. Thirty-one species are evaluated but not found threatened and accordingly categorized as Least Concern (LC, 30 spp.) or Near Threatened (NT, 01 sp.). Nine species could not be evaluated for lack of sufficient data and categorized as Data Deficient (DD). A clear disparity can be seen in two important sources (IUCN Red List 2020-21 and Indian Red Data Book) where only six species (*Nardostachys jatamansi* (D.Don) DC, *Aucklandia costus* Falc., *Cypripedium cordigerum* D. Don, *C. elegans* Rchb.f., *C. himalaicum* Rolfe, *Pittosporum eriocarpum* Royle) are common. Eight additional species listed as threatened in IUCN Red List 2020-1 and 49 additional species listed as threatened in Indian Red Data Book are not included vice versa. IUCN Red List has also not assessed 256 species listed as threatened in various sources which warrant their immediate assessment by recent IUCN guidelines to understand their correct status in nature.

One of the important tools for conservation of plant species is micropropagation (Fay 1992). Reasons for selection of species for micropropagation may be various but one of them is the threatened status of a species. It is found in this study that out of 14 threatened species listed in IUCN Red List and known in Uttarakhand, successful tissue culture protocols have been developed for nine only. As per the list of threatened species by Indian Red Data Book, however, 55 species are known in Uttarakhand and only 10 species have been micropropagated. In all, tissue culture protocols are available for only 16 species (Grewal & Atal 1976; Lal et al. 1988; Mathur 1992; Sharma et al. 1993; Sharma & Seth 2001; Pandey et al. 2004, 2005; Jabeen et al. 2006; Pandey et al. 2011; Radha et al. 2011; Bhandari et al. 2013; Mishra- Rawat et al. 2013; Sharma et al. 2014; Kumari et al. 2015; Gondval et al. 2016; Gupta

Order 1- AUSTROBAILEYALES Takht. ex Reveal			
Family 1- SCHIZANDRACEAE Blume			
1. <i>Schisandra grandiflora</i> (Wall.) Hook.f. & Thomson [= <i>Kadsura grandiflora</i> Wall.]; Cl	I ² , NE ³ , I ⁷ , I ¹¹	HP, UK, S; Nep, Bhu, Chi	1500-3500
2. <i>Schisandra propinqua</i> (Wall.) Baill. [= <i>Kadsura propinqua</i> Wall.]; Cl	I ² , NE ³ , I ⁷ , I ¹¹	UK, S; Nep, Bhu, Chi	1200-3000
Order 2- MAGNOLIALES Juss. ex Bercht. & J.Presl			
Family 2- Magnoliaceae Juss.			
3. <i>Magnolia doltsopa</i> (Buch.-Ham. ex DC.) Filger [= <i>Michelia doltsopa</i> Buch.-Ham. ex DC.]; T	DD ³	UK, WB, S, AP, MN, MG; Ba, Mya, Chi	900-2200
4. <i>Magnolia kisopha</i> (Buch.-Ham. ex DC.) Filger [= <i>Michelia kisopha</i> Buch.-Ham. ex DC.]; T	DD ³	UK, S; Nep; Tib	1500-2300
Order 3- LAUREL Juss. ex Bercht. & J. Presl			
Family 3- LAURACEAE Juss.			
5. <i>Alseodaphne himalayana</i> Kosterm.; Sh	NE ³ , VU ⁶	UK; Nep	?
6. <i>Cinnamomum glanduliferum</i> (Wall.) Meisn. [= <i>Laurus glandulifera</i> Wall.]; T	I ² , LC ³	UK; Nep, Ban, Bhu, Mal, Chi	1200-2150
7. <i>Cinnamomum tamala</i> T. Nees & Eberm.; T	LC ³ , VU ⁴	Himal, A; Mya, Lao, Viet	450-2150
Order 4- DIOSCOREALES R. Br. ex Mart.			
Family 4- DIOSCOREACEAE R. Br.			
8. <i>Dioscorea belophylla</i> (Prain) Voigt ex Haines [= <i>Dioscorea nummularia</i> var. <i>belophylla</i> Prain]; Cl	I ² , NE ³	Himal, NE India, Pen India	300-1800
9. <i>Dioscorea deltoidea</i> Wall. ex Griseb.; Cl (Image-1)	V ¹ , NE ³ , EN ⁴ , 2A ⁵ , EN ⁶	Himal, NE India	900-3500
Order 5- LILIALES Perleb			
Family 5- MELANTHIACEAE Batsch ex Borkh.			
10. <i>Paris polyphylla</i> Sm. [= <i>Daiswa polyphylla</i> (Sm.) Raf.]; H	NE ³ , EN ⁴ , EN ⁶ , HT ⁹	HP, UK, WB, S, AP, A, NL, MN, MG; Pak, Nep, Bhu, Mya, Chi, Jap	2000-3000
11. <i>Trillium govanianum</i> Wall. ex D.Don [= <i>Trillidium govanianum</i> (Wall. ex D.Don) Kunth.]; H	NE ³ , EN ⁶ , HT ⁹	J&K, HP, UK, S, WB; Paki, Nep	2500-4000
Family 6- COLCHICACEAE DC.			
12. <i>Gloriosa superba</i> L.; H	LC ³ , VU ⁴	India; Nep, Ban, Bhu, Chi, Mya, Lao, Mal, Africa	300-1500
Family 7- SMILACEAE Vent.			
13. <i>Smilax wightii</i> A.DC.; Cl	R ¹ , R ² , NE ³	UK, E & C Himal, TN	Upto 500
Family 8- LILIACEAE Juss.			
14. <i>Fritillaria cirrhosa</i> D. Don [= <i>F. roylei</i> Hook.]; H (Image-2)	NE ³ , EN ⁴ , EN ⁶	J&K, HP, UK, S, WB; Afg, Pak, Nep, Bhu, Chi, Mya	2400-4500
15. <i>Lilium polyphyllum</i> D.Don; H	CR ^{3A} , CR ³ , CR ⁴ , CR ⁶ , HT ⁹	J&K, HP, UK; Afg, Pak, Nep	2000-4000
16. <i>Lilium wallichianum</i> Schult. & Schult.f.; H	I ² , NE ³ , EN ⁶ , I ⁷ , HT ⁹ , I ¹¹	UK, S; Nep, Bhu, Mya	1200-2400
Order 6- ASPARAGALES Link			
Family 9- ORCHIDACEAE Juss.			
17. <i>Aphyllorchis gollanii</i> Duthie; H	E ¹ /PEx ¹ , Ex ² /E ² , NE ³ , 2A ⁵ , VU ⁶ , Ex ⁷ , Ex ¹¹	UK; China	2400-3000
18. <i>Bulbophyllum reptans</i> (Lindl.) Lindl. ex Wall. [= <i>Bulbophyllum rauii</i> Arora; <i>Tribrachia reptans</i> Lindl.]; H	I ² , NE ³ , 2A ⁵ , I ¹¹	UK, S, AP, NG, MN, MG, MZ, WB; Nep, Ban, Mya, Chi, Thai, Lao, Viet	500-1500
19. <i>Calanthe alismifolia</i> Lindl.; H	I ² , NE ³ , 2A ⁵ , I ⁷ , I ¹¹	UK, S, AP, MG, NG, WB; Bhu, Chi, Mya, Jap, Lao, Tai, Viet	1500-2000
20. <i>Calanthe alpina</i> Hook.f. ex Lindl.; H	R ¹ , R ² , NE ³ , 2A ⁵ , R ⁷ , R ¹¹	UK, S, AP, NG, WB; Nep, Bhu, Mya, Chi, Tai, Jap	2500-3500
21. <i>Calanthe davidii</i> Franch. [= <i>Calanthe pachystalix</i> Reichb.f. ex Hook.f.]; H	E ¹ , NE ³ , 2A ⁵	UK, AP; Nep, Chi, Tai, Viet, Jap	1500-2000
22. <i>Calanthe mannii</i> Hook.f.; H	R ¹ , NE ³ , 2A ⁵ , R ¹¹	UK, S, AP, MZ, MN, MG; Nep, Bhu, Mya, Chi, Viet, Jap	1300-2200
23. <i>Coelogyne cristata</i> Lindl.; H	R ² , NE ³ , 2A ⁵	HP, UK, S, AP, A, MN, MG, WB; Nep, Bhu, Ban, Chi	1000-2000
24. <i>Coelogyne flaccida</i> Lindl.; H	I ² , NE ³ , 2A ⁵	UK, S, AP, A, MN, MG, NG; Nep, Bhu, Ban, Mya, Lao, Thai	1000-2100
25. <i>Coelogyne nitida</i> (Wall. ex D.Don) Lindl. [= <i>Cymbidium nitidum</i> Wall. ex D.Don]; H	R ² , NE ³ , 2A ⁵	UK, S, AP, MN, MZ, MG, NG, WB; Nep, Bhu, Mya, Chi, Lao, Thai, Viet	1500-2300

ORDER, FAMILY Species Name; Habit	Threat Assessment	Geographical Distribution INDIA; Outside India	Elev. Distr. (m) in UK
26. <i>Crepidium acuminatum</i> (D.Don) Szlach. [=Malaxis acuminata D.Don]; H	NE ³ , 2A ⁵ , VU ⁶	HP, UK, S, AP, A, MP, MG, MZ, WB, KN, KR, TN; Nep, Bhu, Thai, Viet, Lao, Ban, Chi, Mya, Phi, Australia	600-3000
27. <i>Cymbidium eburneum</i> Lindl.; H	V ¹ , NE ³ , 2A ⁵	UK, S, AP, A, MN, MG, MN, WB; Nep, Mya, Chi, Viet	1000-1500
28. <i>Cymbidium goeringii</i> (Rchb.f.) Rchb.f. [=Cymbidium mackinnonii Duthie; <i>Maxillaria goeringii</i> Rchb.f.]; H	NE ³ , 2A ⁵ , VU ⁶	UK, S, AP; Bhu, Chi, Kor, Jap	1700-1800
29. <i>Cymbidium hookerianum</i> Rchb.f.; H	V ¹ , NE ³ , 2A ⁵	UK, S, AP, MG, MN, MZ; Bhu, Nep, Mya, Chi, Viet	1500-2500
30. <i>Cypripedium cordigerum</i> D.Don; H	R ¹ , VU ^{3A} , VU ³ , 2A ⁵ , EN ⁶ , HT ⁹ , R ¹¹	J&K, HP, UK, S; Pak, Nep, Bhu, Chi	2100-4000
31. <i>Cypripedium elegans</i> Rchb.f.; H	R ¹ , EN ^{3A} , EN ³ , 2A ⁵ , EN ⁶ , HT ⁹	UK, S; Nep, Bhu, Chi	2500-4000
32. <i>Cypripedium himalaicum</i> Rolfe; H (Image-3)	R ¹ , EN ³ , 2A ⁵ , EN ⁶ , HT ⁹ , R ¹¹	J&K, HP, UK, S; Nep, Bhu, Mya, Chi	2700-4300
33. <i>Dactylorhiza hatagirea</i> (D.Don) Soo [=Orchis hatagirea D.Don]; H	NE ³ , CR ⁴ , 2A ⁵ , EN ⁶ , HT ⁹	J&K, HP, UK, S; Pak, Nep, Bhu, Chi, Mon	2500-4400
34. <i>Dendrobium macrostachyum</i> Lindl. [=Dendrobium gamblei King & Pantl.]; H	I ² , LC ³ , 2A ⁵ , I ¹¹	Throughout India; Nep, Ban, Mya, Borneo, Java, Malaya, Sri Lanka, Sumatra, Thai, Viet	300-800
35. * <i>Dendrobium normale</i> Falc.; H	I ² , NE ³ , 2A ⁵ , I ⁷ , I ¹¹	UK	900-2700
36. <i>Dienia muscifera</i> Lindl. [=Malaxis muscifera (Lindl.) Kuntze, <i>Microstylis muscifera</i> (Lindl.) Ridl.]; H	VU ³ , 2A ⁵ , EN ⁴ , EN ⁶ , HT ⁹	J&K, HP, UK, S, AP, WB; Pak, Nep, Bhu, Mya, Chi	1800-4000
37. <i>Diplomeris hirsuta</i> (Lindl.) Lindl. [=Diplochilos hirsutus Lindl.]; H	V ¹ , NE ² , 2A ⁵ , EN ⁶ , VoE ⁸ , HT ⁹ , HT ¹⁰ , V ¹¹	UK, S, AP, MG, NG, WB; Nep, Chi	800-1200
38. * <i>Eria occidentalis</i> Seidenf. [= <i>Pinalia occidentalis</i> (Seidenf.) Schuit., Y.P. Ng & H.A. Pedersen]; H	R ¹ , R ² , NE ³ , 2A ⁵ , VU ⁶ , R ⁷ , R ¹¹	UK	1200-1500
39. <i>Eulophia mackinnonii</i> Duthie; H	R ¹ , R ² , NE ³ , 2A ⁵ , R ⁷ , R ¹¹	UK, UP, JR, CG, MP; Nep, Ban	300-800
40. <i>Eulophia obtusa</i> (Lindl.) Hook.f. [= <i>Cyrtopera obtusa</i> Lindl.]; H	I ² , NE ³ , 2A ⁵ , VU ⁶ , I ⁷ , I ¹¹	UK, UP; Nep	250-900
41. <i>Flickingeria hesperis</i> Seidenf. [= <i>Dendrobium hesperis</i> (Seidenf.) Schuit. & Peter B.Adams]; H	E ¹ , E ² , NE ³ , 2A ⁵ , VU ⁶ , E ⁷ , HT ⁹ , E ¹¹	UK, MN	1500-2000
42. <i>Galeola falconeri</i> Hook.f. [= <i>Cyrtosia falconeri</i> (Hook.f.) Aver.]; H	I ² , NE ³ , 2A ⁵ , I ⁷ , I ¹¹	UK, S, AP, MN, MG, MZ, WB; Nep, Bhu, Thai, Viet, Chi	1200-2000
43. <i>Galeola lindleyana</i> (Hook.f. & Thomson) Rchb.f. [= <i>Cyrtosia lindleyana</i> Hook.f. & Thomson]; H	I ² , NE ³ , 2A ⁵	HP, UK, AP, MN, MG, MZ, NG, WB; Nep, Chi, Viet, Sumatra	1200-2400
44. * <i>Gastrochilus garhwensis</i> Z.H.Tsi; H	NE ³ , 2A ⁵ , VU ⁶	UK	1000
45. <i>Habenaria edgeworthii</i> Hook.f. ex Collett [= <i>Herminium edgeworthii</i> (Hook.f. ex Collett) X.H. Jin, Schuit., Raskoti & Lu Q. Huang]; H	NE ³ , 2A ⁵ , VU ⁶	J&K, HP, UK, S, AP, WB; Pak, Nep, Bhu, Chi	1500-3000
46. <i>Habenaria intermedia</i> D.Don; H	NE ³ , EN ⁴ , 2A ⁵ , VU ⁶	J&K, HP, UK, CG; Nep Paki, Chi	1500-3000
47. * <i>Herminium kumaunense</i> Deva & H.B.Naithani; H	NE ³ , 2A ⁵ , VU ⁶	UK	3300-3600
48. <i>Neottia acuminata</i> Schltr. [= <i>Aphyllorchis parviflora</i> King & Pantl.]; H	R ¹ , LC ³ , 2A ⁵ , R ¹¹	UK, S, AP; Nep, Chi, Rus, Mon, Kor, Jap, Tai	3300-3600
49. * <i>Neottia mackinnonii</i> Deva & H.B.Naithani; H	NE ³ , 2A ⁵ , DD ⁶ , VU ⁶	UK	1500-1800
50. * <i>Neottia microglossa</i> (Duthie) Schltr. [= <i>Archineottia microglossa</i> (Duthie) S.C.Chen; <i>Listera microglossa</i> Duthie]; H	R ¹ , R ² , NE ³ , 2A ⁵ , VU ⁶ , R ⁷ , R ¹¹	UK	1500-4000
51. * <i>Neottia nandadeviensis</i> (Hajra) Szlach. [= <i>Listera nandadeviensis</i> Hajra]; H	NE ³ , 2A ⁵ , VU ⁶	UK	2400-3500
52. * <i>Nervilia gleadowii</i> A.N.Rao; H	NE ³ , 2A ⁵ , VU ⁶	UK	1000
53. <i>Nervilia mackinnonii</i> (Duthie) Schltr. [= <i>Pogonia mackinnonii</i> Duthie]; H	I ² , NE ³ , 2A ⁵ , VU ⁶ , I ⁷ , I ¹¹	UK; Nep, Mya, Chi	1500-1800
54. * <i>Nervilia pangteyanana</i> Jalal, Kumar & G.S.Rawat; H	NE ³ , 2A ⁵ , VU ⁶	UK	800-1000
55. <i>Nervilia plicata</i> (Andrews) Schltr. [= <i>Nervilia biflora</i> (Wight) Schltr.; <i>Arethusa plicata</i> Andrews]; H	I ² , NE ³ , 2A ⁵ , I ¹¹	Throughout India; Pak, Nep, Ban, Bor, Jawa, Lao, Mya, Phil, Tai, Viet, Aus	300-1500
56. <i>Oreorchis foliosa</i> (Lindl.) Lindl. var. <i>indica</i> (Lindl.) N. Pearce & P.J. Cribb [= <i>Corallorrhiza indica</i> Lindl., <i>Oreorchis indica</i> (Lindl.) Hook.f.]; H	I ² , NE ³ , 2A ⁵ , I ⁷ , I ¹¹	HP, UK, S; Nep, Bhu, Chi, Jap	2000-2700
57. <i>Oreorchis micrantha</i> Lindl.; H (Image-4)	I ² , NE ³ , 2A ⁵	J&K, HP, UK, S, Ap, WB; Nep, Bhu, Mya, Chi	2400-3300
58. <i>Pecteilis gigantea</i> (Sm.) Raf. [= <i>Orchis gigantea</i> Sm.]; H (Image-5)	NE ³ , 2A ⁵ , VoE ⁸ , HT ⁹ , HT ¹⁰	Throughout India; Pak, Nep, Mya, Chi	300-2000
59. <i>Peristylus elisabethae</i> (Duthie) R.K.Gupta [= <i>Peristylus kumaonensis</i> Renz]; H	NE ³ , 2A ⁵ , VU ⁶	HP, UK, S, WB; Nep, Bhu, Mya, Chi	2000-2200

ORDER, FAMILY Species Name; Habit	Threat Assessment	Geographical Distribution INDIA; Outside India	Elev. Distr. (m) in UK
60. <i>Phaius tankervilleae</i> (Banks) Blume [= <i>Limodorum tankervilleae</i> Banks]; H	NE ³ , 2A ⁵ , VU ⁶ , VoE ⁸ , HT ⁹ , HT ¹⁰	UK, S, AP, MN, MG, MZ, WB, NG, TR, KL, OD; Nep, Bhu, Ban, Mya, Chi, Jap, Viet, Sri etc	300-500
61. * <i>Ponerorchis renzii</i> Deva & H.B.Naithani; H	NE ³ , 2A ⁵ , VU ⁶	UK	3200-3400
62. <i>Satyrium nepalense</i> D.Don; H	NE ³ , 2A ⁵ , VU ⁶	Himal, NE India, South India; Pak, Chi, Mya, Sri Lanka	1500-4000
63. <i>Tipularia cunninghamii</i> (King & Prain) S.C.Chen, S.W.Gale & P.J.Cribb [= <i>Didiccia cunninghamii</i> King & Prain]; H	E ¹ , E ² , NE ³ , 2A ⁵ , E ⁷ , E ¹¹	UK, S; Tai	2000-3100
Family 10- IRIDACEAE Juss.			
64. <i>Iris milesii</i> Baker ex Foster; H	I ² , NE ³	W Himal; Chi	1600-2700
Family 11- AMARYLLIDACEAE J.St.-Hil.			
65. <i>Allium auriculatum</i> Kunth; H	E ² , NE ³	J&K, HP, UK; Nep	3300-5500
66. <i>Allium loratum</i> Baker; H	E ² , NE ³	J&K, HP, UK; Afg, Chi	2600-3700
67. <i>Allium roylei</i> Stearn; H	E ² , NT ³	J&K, UK; Afg, Pak	1900-3200
68. <i>Allium stracheyi</i> Baker; H	V ¹ , V ² , NE ³ , VU ⁴ , VU ⁶ , V ⁷ , V ¹¹	J&K, HP, UK; Pak, Nep	2000-3800
Family 12- ASPARAGACEAE Bercht. & J. Presl			
69. <i>Asparagus filicinus</i> Buch.-Ham. ex D.Don; H (Image-6)	DD ³	Himal; Ban, Mya, Chi, Tai, Viet	2100-3000
70. * <i>Dipcadi reidii</i> Deb & S. Dasgupta; H	PEX ¹ , Ex ² , NE ³ , CR ⁶ , VU ⁶ , Ex ⁷ , Ex ¹¹	UK; Nep(?)	1500-2500
71. <i>Polygonatum cirrhifolium</i> (Wall.) Royle [= <i>Convallaria cirrhifolia</i> Wall.]; H	NE ³ , VU ⁴ , VU ⁶	J&K, HP, UK, S; Pak, Nep, Bhu, Chi	1200-4500
72. <i>Polygonatum graminifolium</i> Hook.; H (Image-7)	I ² , NE ³ , I ⁷ , I ¹¹	J&K, HP, UK; Nep, Bhu	2600-4650
73. <i>Polygonatum verticillatum</i> (L.) All. [= <i>Convallaria verticillata</i> L.]; H	VU ⁴ , VU ⁶	Himal	1500-4500
Order 7- ARECALES Bromhead			
Family 13- ARECACEAE Bercht. & J. Presl (PALMAE Juss.)			
74. <i>Phoenix rupicola</i> T. Anderson; T	R ¹ , V ² , NT ³	UK, NE India	Up to 800
75. * <i>Trachycarpus takil</i> Becc.; T (Image-8)	R ¹ , NE ³ , CR ⁶ , VU ⁶ , VoE ⁸ , HT ⁹ , HT ¹⁰ , R ¹¹	UK	1800-2550
Order 8- ZINGIBERALES Griseb			
Family 14- ZINGIBERACEAE Martinov			
76. <i>Cautleya spicata</i> (Sm.) Baker [= <i>Cautleya petiolata</i> Baker]; H	I ² , LC ³ , I ⁷ , I ¹¹	Himal; Chi, Mya	1800-2800
77. <i>Hedychium spicatum</i> Sm. ; H	NE ³ , VU ⁶	Himal; Chi, Mya, Thai	1500-2800
Order 9- POALES Small			
Family 15- ERIOCaulaceae Martinov			
78. <i>Eriocaulon nepalense</i> J.D. Prescott ex Bong. var. <i>luzulifolium</i> (Mart.) Praj. & J.Parn. [= <i>Eriocaulon pumilio</i> Hook.f.]; H	I ² , NE ³ , DD ⁶ , I ⁷ , I ¹¹	W Himal, NE India; Nep, Chi, Thai, New Guinea	900-2000
Family 16- CYPERACEAE Juss.			
79. <i>Carex clavispica</i> S.R. Zhang [= <i>Kobresia duthiei</i> C.B. Clarke]; H	I ² , NE ³	Himal	3600-4500
80. <i>Carex esenbeckii</i> Kunth [= <i>Kobresia esenbeckii</i> (Kunth) Noltie; <i>Kobresia trinervis</i> var. <i>foliosa</i> (C.B.Clarke) Kuekenth.]; H	I ² , NE ³	Himal; Bhu, Chi, Tib	3300-5000
81. * <i>Carex nandadeviensis</i> Ghildyal, U.C.Bhattach. & Hajra; H	NE ³ , VU ⁶	UK	3000-4000
Family 17- POACEAE Barnhart (GRAMINEAE Juss.)			
82. <i>Cymbopogon microstachys</i> (Hook.f.) Soenarko [= <i>Cymbopogon flexuosus</i> var. <i>microstachys</i> (Hook.f.) Bor]; H	R ² , NE ³ , R ⁷ , R ¹¹	N, E & NE India, Indian plains; Chi, Indochina	300-1000
83. * <i>Cymbopogon osmastonii</i> R. Parker; H	V ² , NE ³ , VU ⁶	UK, N India	300-500
84. * <i>Dendrocalamus somdevae</i> H.B. Naithani; Sh	NE ³ , END ¹¹	UK	600-1500
85. <i>Digitaria duthieana</i> Henrard ex Bor; H	DD ³	UK, UP, MP	300
86. <i>Elymus duthieae</i> (Melderis) G.Singh [= <i>Agropyron duthiei</i> Melderis]; H	I ² , NE ³ , I ⁷ , I ¹¹	W&E Himal	1000-2000
87. * <i>Eulalia madkotiensi</i> Kandwal, B.K. Gupta & S.K. Srivast.; H	NE ³ , VU ⁶	UK	1200-1500
88. * <i>Festuca lucida</i> Stapf; H	I ² , NE ³ , I ⁷ , I ¹¹	UK	2300-3000
89. * <i>Festuca nandadevica</i> Hajra; H	NE ³ , VU ⁶	UK	3300-3600
90. * <i>Helictotrichon uniyalii</i> Kandwal & B.K. Gupta; H	NE ³ , VU ⁶	UK	2500-3000

ORDER, FAMILY Species Name; Habit	Threat Assessment	Geographical Distribution INDIA; Outside India	Elev. Distr. (m) in UK
91. * <i>Microstegium falconeri</i> (Hook.f.) Clayton [= <i>Ischnochloa falconeri</i> Hook.f.]; H	I ² , NE ³ , VU ⁶ , I ⁷ , I ¹¹	NW & E Himal	1800-3000
92. <i>Piptatherum hilariae</i> Pazij [= <i>Oryzopsis humilis</i> Bor; <i>Oryzopsis hilariæ</i> (Pazij) Uniyal]; H	I ² , NE ³ , I ⁷ , I ¹¹	W Himal; Taj, Afg, Pak, Tib, Chi	2000-2500
93. * <i>Poa garhwalensis</i> D.C. Nautiyal & R.D. Gaur; H	NE ³ , VU ⁶	UK	3900-4200
94. <i>Poa pseudamoena</i> Bor; H	I ² , NE ³ , I ⁷ , I ¹¹	W Himal; Tib, China	3000-3800
95. * <i>Poa rhadina</i> Bor; H	E ² , NE ³ , VU ⁶ , E ⁷ , E ¹¹	UK	2600-4100
96. * <i>Poa royleana</i> Nees ex Steud.; H	NE ³ , END ¹¹	UK	2000-3300
97. * <i>Pseudodanthonia himalaica</i> (Hook.f.) Bor & C.E.Hubb. [= <i>Danthonia himalaica</i> Hook.f.]; H	I ² , NE ³ , VU ⁶ , VU ⁶	W Himal	2000-2300
98. <i>Puccinellia thomsonii</i> (Stapf ex Hook.f.) R.R. Stewart [= <i>Glyceria thomsonii</i> Stapf ex Hook.f.]; H	I ² , NE ³	W Himal; Tib	4000-4500
99. * <i>Sehima notatum</i> (Hack.) A. Camus [= <i>Ischaemum notatum</i> Hack.]; H	NE ³ , VU ⁶	UK	1200-2100
100. <i>Trisetum micans</i> (Hook.f.) Bor [= <i>Avena micans</i> Hook.f.]; H	I ² , NE ³ , I ⁷ , I ¹¹	W Himal, Indian plains	2400-3800
Order 10- RANUNCULALES Juss. ex Bercht. & J. Presl			
Family 18- PAPAVERACEAE Juss.			
101. <i>Corydalis cashmeriana</i> Royle; H	E ² , NE ³	J&K, HP, UK, S; Pak, Nep, Chi	2800-4700
102. * <i>Corydalis devendrae</i> Pusalkar; H	NE ³ , VU ⁶	UK	3800-5000
103. <i>Papaver guileimi-waldemarii</i> (Klotzsch) Christenh. & Byng [= <i>Meconopsis guileimi-waldemarii</i> Klotzsch; <i>Meconopsis aculeata</i> Royle]; H	E ² , NE ³ , EN ⁴	J&K, HP, UK, S; Pak, Nep, Bhu	3500-5200
104. * <i>Papaver robustum</i> (Hook.f. & Thomson) Christenh. & Byng [= <i>Meconopsis robusta</i> Hook.f. & Thomson]; H (Image-9)	NE ³ , VU ⁶	UK; Nep	2500-4300
Family 19- BERBERIDACEAE Juss.			
105. * <i>Berberis affinis</i> G. Don; Sh	R ¹ , R ² , NE ³ , VU ⁶ , VU ⁶ , R ⁷ , R ¹¹	UK	2200-3000
106. * <i>Berberis ahrendtii</i> R.R.Rao & Uniyal; Sh	NE ³ , EN ⁶ , VU ⁶	UK	2000-3000
107. * <i>Berberis garhwalensis</i> C.K.Schneid.; Sh	NE ³ , DD ⁶ , VU ⁶	UK	3000-4000
108. * <i>Berberis jaunsarensis</i> (Ahrendt) Laferr. [= <i>Mahonia jaunsarensis</i> Ahrendt]; Sh	I ² , NE ³ , VU ⁶ , I ⁷ , I ¹¹	UK	1500-2600
109. * <i>Berberis lambertii</i> R. Parker; Sh	V ¹ /E ¹ , V ² , NE ³ , CR ⁶ , VU ⁶ , V ¹¹ /E ¹¹	UK	2650-2900
110. * <i>Berberis osmastonii</i> Dunn; Sh (Image-10)	R ¹ , R ² , NE ³ , VU ⁶ , R ⁷ , R ¹¹	UK	1700-3000
111. <i>Berberis pseudumbellata</i> R.Parker; Sh	I ² , NE ³ , I ⁷ , I ¹¹	J&K, HP, UK; Pak	2200-3800
112. * <i>Berberis rawatii</i> U.L.Tiwari & B.S.Adhikari; Sh	NE ³ , VU ⁶	UK	2200-2400
113. <i>Podophyllum hexandrum</i> Royle [= <i>Sinopodophyllum hexandrum</i> (Royle) T.S.Ying]; H	NE ³ , EN ⁴ , 2A ⁵ , EN ⁶	J&K, HP, UK, S, AP; Pak, Nep, Bhu, Chi	2000-4000
Family 20- RANUNCULACEAE Juss.

Table 2. Taxa excluded from Table 1 (Threatened flora of Uttarakhand) on account of various reasons.

Species/taxa excluded	Reason for exclusion (reference)
1. <i>Iris duthie</i> Foster (Iridaceae)	Synonym of <i>Iris kemaonensis</i> Wall. ex D.Don, a common species (POWO 2019)
2. <i>Microschoenus duthie</i> C.B. Clarke (Cyperaceae)	Synonym of <i>Juncus duthie</i> (C.B.Clarke) Noltie, a common species (POWO 2019)
3. <i>Berberis petiolaris</i> Wall. ex G. Don var. <i>garhwalana</i> Ahrendt (Berberidaceae)	Variety not recognized in recent works (Pusalkar & Srivastava 2018)
4. <i>Aconitum ferox</i> Wall. ex Ser.(Ranunculaceae)	Erroneous identification; species not known in Western Himalaya (Pusalkar & Srivastava 2018)
5. <i>Aconitum deinorrhizum</i> Stapf. (Ranunculaceae)	Erroneous identification; species not known in Western Himalaya (Pusalkar & Srivastava 2018)
6. <i>Caragana aegacanthoides</i> (R. Parker) L.B. Chaudhary & S.K. Srivast. (Fabaceae)	Not endemic to Uttarakhand (POWO 2019)
7. <i>Pueraria stracheyi</i> Baker (Fabaceae)	Synonym of <i>Apios carnea</i> (Wall.) Benth. ex Baker; a common species (POWO 2019)
8. <i>Saraca asoca</i> (Roxb.) W.J. de Wilde (Fabaceae)	Cultivated species in Uttarakhand
9. <i>Acer osmastonii</i> Gamble (Sapindaceae)	Erroneous identification (Pusalkar & Srivastava 2018)
10. <i>Acer oblongum</i> Wall. ex DC. var. <i>membranaceum</i> Banerji (Sapindaceae)	Variety not recognized in recent work (Pusalkar & Srivastava 2018)
11. <i>Santalum album</i> L. (Santalaceae)	Cultivated species in Uttarakhand
12. <i>Sagina purii</i> R.D. Gaur (Caryophyllaceae)	Synonym of <i>Sagina apetala</i> Ard. (Chandra 2015)
13. <i>Impatiens vexillaria</i> Hook.f. (Balsaminaceae)	Known by type only and described from Himachal Pradesh (Hooker 1910)
14. <i>Arnebia nandadeviensis</i> Chandra Sek. & R.S.Rawal (Boraginaceae)	Synonym of <i>Onosma bracteata</i> Wall. (Tiwari 2016)
15. <i>Ageratum haustorianum</i> Mill. (Asteraceae)	Common invasive species in Uttarakhand
16. <i>Nardostachys grandiflora</i> DC. (Valerianaceae)	Synonym of <i>N. jatamansi</i> (D.Don) DC. (POWO 2019)

Table 3. Original sources, threat status and number of species included in Table 1 (threatened flora of Uttarakhand) based on them.

Superscript number used in table-1; Original source	Threat statuses used	Threat statuses followed by original source	Number of species
¹ Nayar & Sastry (1987-90)	Ex, E, V, R, I	Lucas & Syngle (1978)	55
² Rao et al. (2003)	Ex, E, V, R, I	IUCN (1994)	115
³ IUCN Red List for India	EX, EW, CR, EN, VU, DD	IUCN (new)	34
^{3A} IUCN Red List for Uttarakhand	EX, EW, CR, EN, VU, DD	IUCN (new)	12
⁴ Ved et al. (2003)	EX, EW, CR, EN, VU, I	IUCN (older)	44
⁵ CITES Appendices (2019)	None	None	12 ^a
⁶ Pusalkar & Srivastava (2018)	EX, EW, CR, EN, VU, DD	IUCN (new?)	165 ^b
⁷ Uniyal et al. (2007)	Ex, E, V, R, I	Lucas & Syngle (1978)	55
⁸ National Biodiversity Authority list for Uttarakhand	Verge of Extinction (VoE)	None	15
⁹ Uttarakhand State Biodiversity Board, Annexure-2	Highly Threatened (HT)	None	27
¹⁰ Shah (ebook publ. by Uttarakhand State Biodiversity Board)	Highly Threatened (HT)	None	15
¹¹ Threatened Taxa list available at ENVIS Centre BSI	Ex, E, V, R, I	Lucas & Syngle (1978)	67

12^a= 12 listed species and all orchids in the area; 165^b= 165 listed species and all orchids in the area.

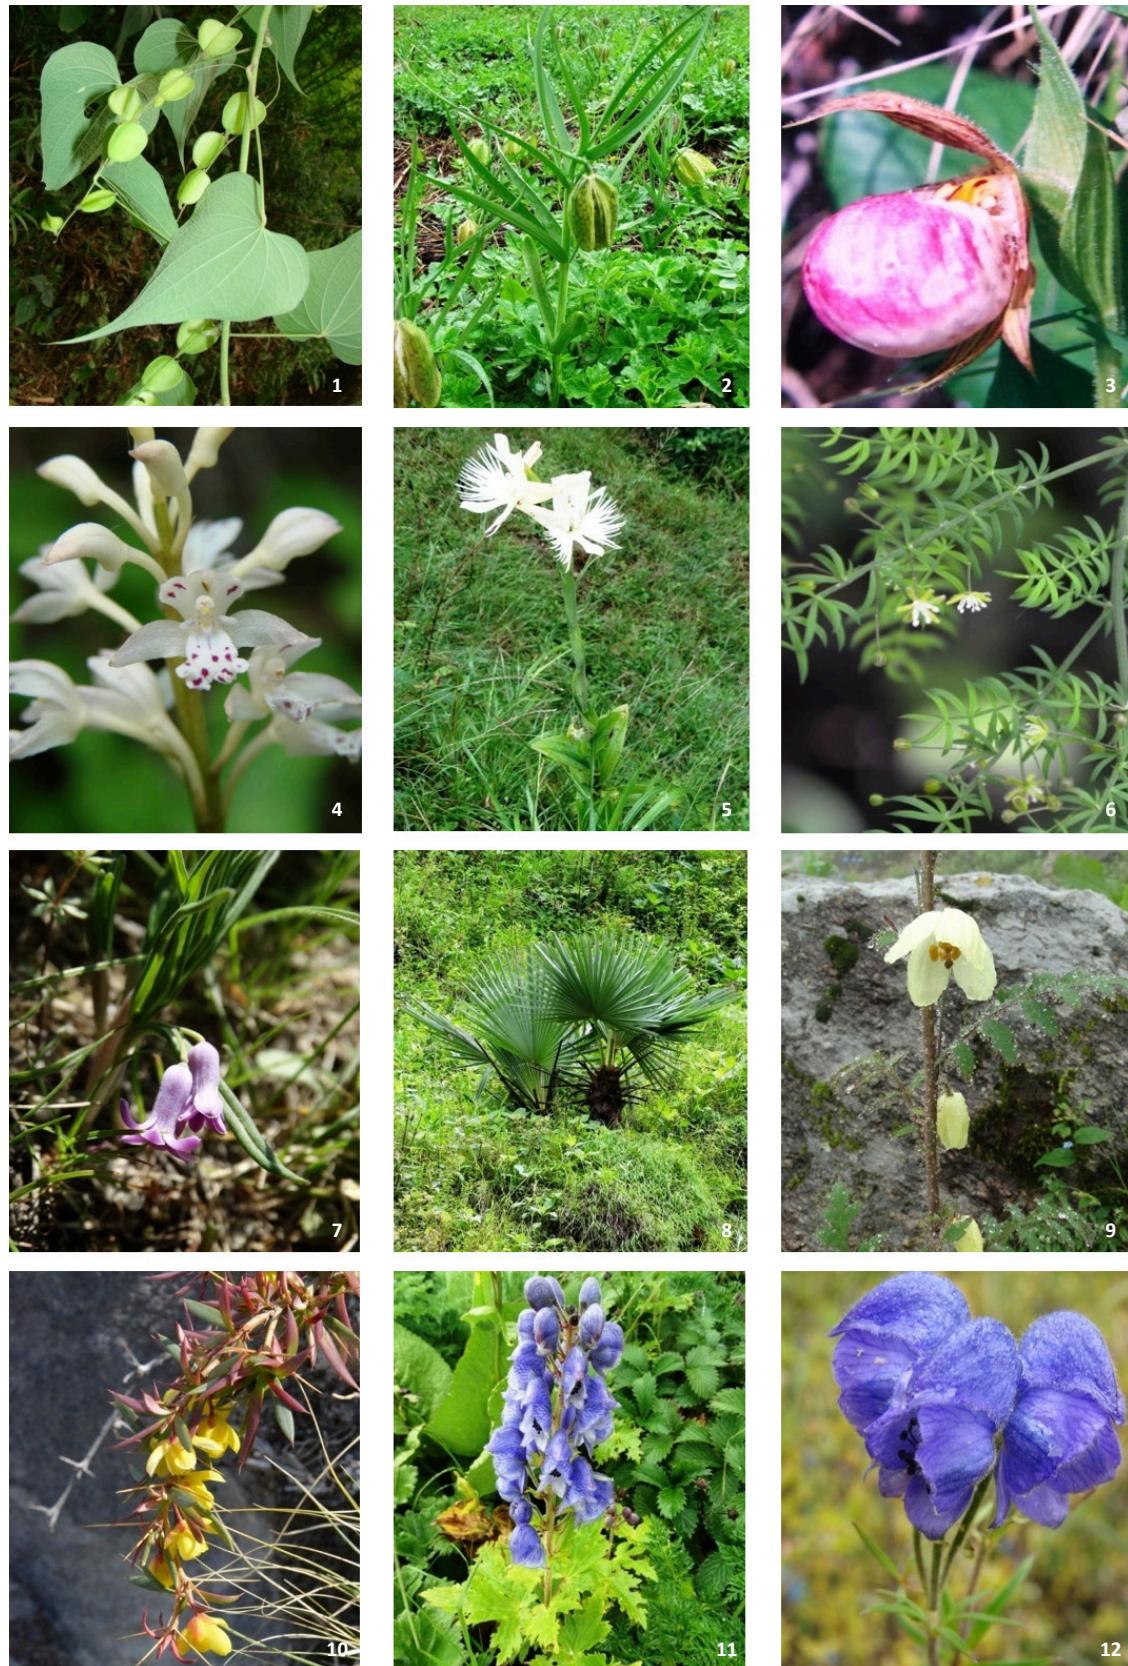

et al. 2016; Panwar et al. 2015, 2016, 2017; Thakur et al. 2016). This selection of species seems more skewed towards economically important species (12 species, mainly medicinal) than on only threatened species which suggests that only threatened status is considered a meagre reason for micropropagation.

It has been emphasized that for conservation of biodiversity we have to focus on biodiversity hotspots and documentation of distribution of biodiversity has to be improved (Myers et al. 2000; Raven & Wackernagel 2020). Uttarakhand is one of the important zones of the Himalayan biodiversity hotspot with more than 45% flowering plant species, 60% genera, 92% families, thus, sustaining rich flowering plant diversity interspersed with a large number of threatened species (Rana & Rawat 2017; Pusalkar & Srivastava 2018). Threat statuses of threatened plant species in entire India, including Uttarakhand, are ambiguous and require their correct assessment using categories and criteria suggested in recent IUCN Redlist to be globally acceptable (Barik et al. 2018). The information in this communication is an attempt to provide the current situation of threatened flora of Uttarakhand as identified by various official sources. Images of 24 threatened species and locations of individuals photographed are shown in Figure 1 to further facilitate conservation studies on these species. It is now crucial to assess these proposed threatened species (barring 34 already assessed) with modern IUCN threat categories to find the most threatened species for prioritized conservation by all available means. Such an assessment will restrict the unnecessary inflation of threatened plants list consequently reducing pressure

on the resources being spent for conservation. The given list of species will also be helpful to subsequent scientific publications for correctly referring to any species threatened in Uttarakhand, however, it should be used judiciously as all species listed in it are not threatened strictly according to the IUCN Red List criteria.

Reviewers 2019–2021

Due to paucity of space, the list of reviewers for 2018–2020 is available online.

The opinions expressed by the authors do not reflect the views of the Journal of Threatened Taxa, Wildlife Information Liaison Development Society, Zoo Outreach Organization, or any of the partners. The journal, the publisher, the host, and the partners are not responsible for the accuracy of the political boundaries shown in the maps by the authors.

Print copies of the Journal are available at cost. Write to:

The Managing Editor, JoTT,
c/o Wildlife Information Liaison Development Society,
43/2 Varadarajulu Nagar, 5th Street West, Ganapathy, Coimbatore,
Tamil Nadu 641035, India
ravi@threatenedtaxa.org

Journal of Threatened Taxa is indexed/abstracted in Bibliography of Systematic Mycology, Biological Abstracts, BIOSIS Previews, CAB Abstracts, EBSCO, Google Scholar, Index Copernicus, Index Fungorum, JournalSeek, National Academy of Agricultural Sciences, NewJour, OCLC WorldCat, SCOPUS, Stanford University Libraries, Virtual Library of Biology, Zootaxa, and Zoological Records.

NAAS rating (India) 5.64

OPEN ACCESS

The Journal of Threatened Taxa (JoTT) is dedicated to building evidence for conservation globally by publishing peer-reviewed articles online every month at a reasonably rapid rate at www.threatenedtaxa.org. All articles published in JoTT are registered under [Creative Commons Attribution 4.0 International License](#) unless otherwise mentioned. JoTT allows unrestricted use, reproduction, and distribution of articles in any medium by providing adequate credit to the author(s) and the source of publication.

Communications

A preliminary survey of moss flora of Chail Wildlife Sanctuary, Himachal Pradesh, India
– Meenal Sharma, Anju Rao & S.S. Kumar, Pp. 22207–22214

New distribution record and DNA barcoding of *Sapria himalayana* Griff. (Rafflesiaceae), a rare and endangered holoparasitic plant from Mizoram, India
– Laldinfeli Ralte, Hmingremhlua Sailo, Sagolshem Priyokumar Singh, Laldiniana Khiangte & Y. Tunginba Singh, Pp. 22215–22220

Species distribution modeling of a cucurbit *Herpetospermum darjeelingense* in Darjeeling Himalaya, India
– Debasruti Boral & Saurav Moktan, Pp. 22221–22231

An updated catalogue of true flies (Insecta: Diptera) from northern Pakistan
– Noor Fatima & Ding Yang, Pp. 22232–22259

Desert Carabidae (Insecta: Coleoptera) of India
– S.V. Akhil, Sabu K. Thomas & Sanjeev Kumar, Pp. 22260–22269

Photographic evidence of fish assemblage in artificial reef site of Palk Bay - an implication for marine resource management
– Koushik Sadhukhan, T. Shanmugaraj, Ramesh Chatragadda & M.V. Ramana Murthy, Pp. 22270–22276

Systematics of the enigmatic and narrowly endemic toad genus *Bufoides* Pillai & Yazdani, 1973: rediscovery of *Bufoides kempfi* (Boulenger, 1919) and expanded description of *Bufoides meghalayanus* (Yazdani & Chanda, 1971) (Amphibia: Anura: Bufonidae) with notes on natural history and distribution
– R.S. Naveen, S.R. Chandramouli, Gautam Kadam, S. Babu, P.V. Karunakaran, H.N. Kumara & N. Parthasarathy, Pp. 22277–22292

Avifaunal diversity in Indian Institute of Technology Guwahati Campus, Assam, India
– Umang H. Rathod & Rupam Bhaduri, Pp. 22293–22308

Reviews

Threatened flora of Uttarakhand: an update
– D.S. Rawat, Satish Chandra & Preeti Chaturvedi, Pp. 22309–22328

A systematic review on the feeding ecology of Sloth Bear *Melursus ursinus* Shaw, 1791 in its distribution range in the Indian subcontinent
– Vasantkumar Rabari & Nishith Dharaiya, Pp. 22329–22336

Short Communications

Mercury in tuna from the western equatorial Atlantic Ocean and health risk assessment
– Ana Paula Madeira Di Beneditto, Inácio Abreu Pestana, Igor David da Costa, Marcelo Gomes de Almeida, Braulio Cherene Vaz de Oliveira & Carlos Eduardo de Rezende, Pp. 22337–22340

First photographic record of Spotted Deer *Axis axis* (Erxleben, 1777) (Artiodactyla: Cervidae) in Great Indian Bustard Sanctuary, Maharashtra, India
– Shaheer Khan, S. Ramesh Kumar & Bilal Habib, Pp. 22341–22345

Comparative study of morphology and keratin levels in hair from deer and goat
– Sangeeta Patle, Divya Bagchi & K.P. Singh, Pp. 22346–22350

Response & Reply

Is trade the reason for the unusual colour morph of Cobra from Goa? Response to Sawant et al.
– Raju Vyas & Harshil Patel, Pp. 22351–22353

Corrections to ‘An unusual morph of *Naja naja* (Linnaeus, 1758) from Goa, India (Serpentes: Squamata)’
– Nitin Sawant, Amrut Singh, Shubham Rane, Sagar Naik & Mayur Gawas, P. 22354
