

LEGENDS OF THE FIGURES

N.B. The illustrations of the habit of the plant are all made after herbarium specimens. The position of the inflorescence and flowers is not always natural.

Fig. 1. *Pholidota clemensii* Ames.

a-plant; b-bract; c-flower; d-flower analysis, below from left to right: median sepal, lateral sepal, above from left to right: petal, lip; e- lip and column, lateral view; f-lip from above; g-column. (a-b. & d. SF (Moulton) 6651; c. & e-g. Leiden, cult. Hort. 22055).

Fig. 2. *Pholidota mediocris* de Vogel.

a-plant; b-bract; c-flower; d-flower analysis, below from left to right: median sepal, lateral sepal, above from left to right: petal, lip; e- lip and column, lateral view; f-lip from above; g-column. (a-d. & g. Burt & Martin 5199; e-f. Geesink 9108).

Fig. 3. *Pholidota nervosa* (Blume) Rchb. f.

a-plant; b-bract; c-flower; d-flower analysis, below from left to right: median sepal, lateral sepal, above from left to right: petal, lip; e- lip and column, lateral view; f-lip from above; g-column. (a. Bakhuizen v.d. Brink 5043; b-g. Bogor, cult. Hort. 152).

Fig. 4. *Pholidota pectinata* Ames

a-plant; b-bract; c-flower; d-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; e-lip and column, lateral view; f- lip from above; g-column; h-anther; i pollinium. (a. Vermeulen & Duistermaat 1061; b-h. Vermeulen & Duistermaat 1003).

Fig. 5. *Pholidota schweinfurthiana* L.O. Williams.

a-plant; b-bract; c-flower; d-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; e-lip and column, lateral view; f- lip from above; g-column. (a-g. J.J. Wood 647).

Fig. 6. *Pholidota sulcata* J.J. Smith.

a-plant; b-flower; c-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; d-lip and column, lateral view; e-lip from above; f-column. (a. & c. Bogor, cult. Hort. (Hallier) s.n.; b. & d-g. Bogor, cult. Hort. (?Hallier) 97).

Fig. 7. *Pholidota advena* (Par. & Rchb. f.) Hooker f.

a-plant; b-bract; c-flower; d-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; e-lip and column, lateral view; f- column. (a. Parish 296; b-f. Rule 5348).

Fig. 8. *Pholidota articulata* Lindley.

a-plant; b-flower; c-flower analysis, from left to right: median sepal, petal, lateral

sepal, lip; d-lip and column, lateral view; e-column. (a. Bogor, cult. Hort. (Backer) s.n.; b-e. de Vogel 1132).

Fig. 9. *Pholidota guibertiae* Finet.

a-plant; b-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; c-lip and column, lateral view. (a-c. Guibert 18).

Fig. 10. *Pholidota recurva* Lindley.

a-plant; b-bract; c-flower; d-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; e-lip and column, lateral view; f- column. (a. Larsen, Smitinand & Warncke 34; b-f. Cumberlege 1009).

Fig. 11. *Pholidota camelostalix* Rchb. f. var. *camelostalix*.

a-plant; b-flower; c-flower analysis, below from left to right: median sepal, lateral sepal, above from left to right: petal, lip; d-lip and column, lateral view; e-column. (a-e. Backer 15865).

Fig. 12. *Pholidota camelostalix* Rchb. f. var. *vaginata* (Carr) de Vogel.

a-plant; b-flower; c-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; d-lip and column, lateral view; e-column. (a-e. Buennemeijer 8914).

Fig. 13. *Pholidota globosa* (Blume) Lindley.

a-plant; b-flower; c-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; d-lip and column, lateral view; e-column. (a-e. Blume s.n., Herb. Lugdunum Batavorum 904,44-199).

Fig. 14. *Pholidota longibulba* Holttum.

a-plant; b-flower; c-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; d-lip and column, lateral view; e-column. (a. Holttum s.n. (type); b-e. Carr 272).

Fig. 15. *Pholidota longilabra* de Vogel.

a-plant; b-bract; c-flower; d-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; e-lip and column, lateral view; f- lip from above; g-column. (a-g. de Wilde & de Wilde-Duyfjes 16302).

Fig. 16. *Pholidota gibbosa* (Blume) de Vriese.

a-plant; b-bract; c-flower; d-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; e-lip and column, lateral view; f- column; g-pollinia. (a. Blume s.n., Herb. Lugdunum Batavorum 903,16-2444; b-f. Leiden, cult. Hort. (de Vogel) 19947, g. Leiden, cult. Hort. 20613).

Fig. 17. *Pholidota ventricosa* (Blume) Rchb. f.

a-plant; b-bract; c-flower; d-flower analysis, below from left to right: median sepal, lateral sepal, above from left to right: petal, lip; e- lip and column, lateral view; f- column; g-pollinia. (a-f. de Vogel 5564, g. Leiden, cult. Hort. 21522).

Fig. 18. *Pholidota chinensis* Lindley.

a-plant; b-flower with bract; c-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; d-lip and column, lateral view; e- lip from above; f-column. (a. Kwangtung 78; b. & d-f. Leiden, cult. Hort. (Cribb) 23146; c. Poilane 4350).

Fig. 19. *Pholidota leveilleana* Schltr.

a-plant; b-flower; c-flower analysis, below from left to right: median sepal, lateral sepal, above from left to right: petal, lip; d-lip and column, lateral view; e-column. (a-e. Poilane 32058).

Fig. 20. *Pholidota roseans* Schltr.

a-plant; b-bract; c-flower; d-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; e-lip and column, lateral view; f- lip from above; g-column. (a-g. Feng 13589).

Fig. 21. *Pholidota rubra* Lindley.

a-plant; b-bract; c-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; d-lip and column, lateral view; e-lip from above; f-column. (a-f. Bor 20928).

Fig. 22. *Pholidota aidiolepis* Seidenf. & de Vogel.

a-plant; b-flower; c-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; d-lip and column, lateral view; e-column. (a-e. GT 6338, a. after the fig. in Bot. Tidsskr. 65 (1969) 122).

Fig. 23. *Pholidota carnea* (Blume) Lindley var. *carnea*.

a-plant; b-bract; c-flower; d-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; e-lip and column, lateral view; f- column. (a. Blume 271 (left), Sarip 432 (right); b-f. Leiden, cult. Hort. (Franken & Roos 448) 21126).

Fig. 24. *Pholidota carnea* (Blume) Lindley var. *parviflora* (Hooker f.) de Vogel.

a. Flower.-*Pholidota carnea* (Blume) Lindley var. *pumila* (Ridley) de Vogel
b-plant; c-bract; d-flower; e-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; f-lip and column, lateral view; g-column. (a. Sinclair 9944; b-g. S.F. (Holttum) 28609).

Fig. 25. *Pholidota protracta* Hooker f.

a-plant; b-bract; c-flower; d-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; e-lip and column, lateral view; f- column. (a-f. Hara et al 6307224).

Fig. 26. *Pholidota imbricata* W.J. Hooker.

a-plant; b-bract; c-flower; d-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; e-lip and column, lateral view; f- column. (a. Chin see Ching 459; b-g. de Vogel 1085).

Fig. 27. *Pholidota pallida* Lindley

a-plant; b-c-bract; d-e-flower; f-flower analysis, below from left to right: petal, lip, above from left to right: median sepal, lateral sepal; g - lip and column, lateral view; h-column. (a. Geesink & Phengkhlai 6182; b. Tixier XIX; c. Leiden, cult. Hort. d-g. A.D. Kerr 3309).

Fig. 28. *Pholidota cantonensis* Rolfe.

a-plant; b-flower; c-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; d-lip and column, lateral view; e-column. (a. Kitamura s.n. (1932); b-g. Lodewijk 319).

Fig. 29. *Pholidota convallariae* (Rchb. f.) Hooker f. var. *convallariae*.

a-plant; b-bract; c-flower; d-flower analysis, below from left to right: median sepal, lateral sepal, above from left to right: petal, lip; e- lip and column, lateral view; f-column. (a. Docters van Leeuwen 3038; b-g. GT 8062).

Fig. 30. *Pholidota missionariorum* Gagnep.

a-plant; b-bract; c-flower; d-flower analysis, from left to right: median sepal, petal, lateral sepal, lip; e-lip and column, lateral view; f- column. (a-g. Martin 2976).

Fig. 31. *Pholidota yunnanensis* Rolfe.

a-plant; b-bract; c-flower; d-flower analysis, below from left to right: median sepal, lateral sepal, above from left to right: petal, lip; e- lip and column, lateral view; f-column. (a-g. Cavalerie & Fortunat 2338).

ADDENDUM

After completing the manuscript a copy was received of an article by C. Sing-chi & Tsi Zhan-huo: *Duae Species Novae Orchidacearum Sinicarum*; Bull. Bot. Res. 8 (1988) p. 7-12. The authors describe *Pholidota wenshanica* from a plant cultivated in the Hortus Botanicus Beijingensis, collected in Yunnan, Wen Shan. I have not seen the holotype, Tsi 223 (PE), but the description and the line drawings do agree so very well with *Pholidota leveilleana* Schltr. that I am convinced that it is conspecific with that species.
