We offer a wide selection of quality field grown hedge plants. Wherever possible these are from English stock, in the event of shortages other approved EU supplies may have to be used.

Small quantities can be supplied, but less than 25 per variety may be subject to a 50% surcharge.

For larger quantities, varieties or different sizes not listed, please contact us for a quotation.

Our native hedging can be lifted from November through to March as 1 yr plants which can be protected with a spiral and cane. We recommend planting a single row at 3 per metre or a double row at 5 per metre.

A typical native hedge would consist of 70% Hawthorn and 30% made up from the selection below.
