^bMerellaan 13, 5552BZ Valkenswaard, The Netherlands

Abstract – 377 bryophyte species (four hornworts, 198 liverworts, and 175 mosses) are reported from Jamaica, among these 57 new records for the island (two hornworts, 53 liverworts and two mosses). Eight species are for the first time attributed to the West Indies, and eight genera (*Notothylas*, *Alobiellopsis*, *Colura*, *Fossombronia*, *Jensenia*, *Otigonialejeunea*, *Leptophascum*, and *Rauiella*) are added to the bryophyte flora of Jamaica. A total of 692 species of bryophytes are now known to occur in Jamaica (367 liverwort and hornwort species; 325 moss species).

Neotropics / Jamaica / new records / West Indies

INTRODUCTION

The island of Jamaica is the third largest island in the Caribbean, with a land mass of about 11.000 km². It is situated south of Cuba and west of Hispaniola the two largest islands in this region. Jamaica is a member of the Commonwealth of Nations (a 53 member state organisation that previously were mostly territories of the former British Empire). The island is politically divided into 3 counties and 14 parishes.

Originally Jamaica was completely forested (Berke & Beatly, 1995) and supported a great diversity of ecosystems. Large areas that were suitable for bryophytes have disappeared in favour of agricultural activities, mainly coffee plantations, especially on the southern slopes of the Blue Mountains. In spite of its large loss in woodland area Jamaica still has a remarkably rich bryophyte flora.

There is a recent checklist of the liverworts and hornworts of Jamaica (Söderström *et al.*, 2011) that reported 332 taxa in 314 species, 14 of which are invalid, illegitimate or in orphaned genera. The last published report of any significance on the mosses of Jamaica was “A survey of the moss flora of Jamaica” by H.Crum and E.B. Bartram (1958).

In order to address the apparent knowledge gaps in the bryophyte flora of Jamaica the authors investigated the bryophyte flora of Jamaica for three weeks focusing mainly on the montane cloud forests as well as scrublands, coffee plantations and ruderal sites. Field work was conducted from the end of November to middle of December 2013. The field work began near Montego Bay in the north-west part of the island and continued clockwise to the bryophyte-rich Blue Mountains (including Blue Mt-Peak, 2257 meters).

* Corresponding author: moos.alfons@kabelbw.de

During this trip more than 1500 samples were collected. At first analysis these collections appeared to belong to about 200 liverwort and hornwort species and 175 moss species.

In the following treatment notes are given on the geographical distribution of the species reported new to Jamaica with special reference to their range in the West Indies.

Nomenclature follows Söderström *et al.* (2016) for liverworts and hornworts, Buck (1998) for pleurocarpous and recent treatments or generally accepted names for acrocarpous mosses (Allen, 1994, 2002; Pursell, 2007). Additional names given in brackets are used in the Jamaican checklist by Söderström *et al.* (2011) or have been in use for a long time.

List of collection sites (the coordinates are based on WGS 84).

Cornwall County, Parish of Trelawny

- 1 Cockpit Country, region around Windsor southeast of Falmouth, coffee plantation and secondary woody vegetation, 120 m alt., 18°22.0' S, 77°38.8' W, 28 Nov. 2013.
- 2 Cockpit Country, surroundings of The Alps north of Albert Town, steep limestone formations, secondary vegetation along road, 360 m alt., 18°20.1' N, 77°30.8' W, 29 Nov. 2013.
- 3 Small brook in wooded valley north of Jackson Town, 235-250 m alt., 18°25.6' N, 77°29.1' W, 29 Nov. 2013.

Middlesex County, Parish of Saint Ann

- 4 Ocho Rios, secondary vegetation along road to Shaw Park Botanical Garden, 80-120 m alt., 18°24.0' N, 77°06.4' W, 30 Nov. 2013.
- 5 Road between Ocho Rios and Ewarton, secondary woody vegetation north of Moneague, 440-480 m alt., 18°18.7' N, 77°05.6' W, 30 Nov. 2013.
- 6 Road between Ocho Rios and Ewarton, secondary vegetation along edge of forest and cattle fence, 410 m alt., 18°18.5' N, 77°06.1' W, 30 Nov. 2013.

Middlesex County, Parish of Saint Mary

- 7 Road (A 3) between Annotto Bay and Castleton, park-like vegetation around Hotel Tapioca Village, 65-70 m alt., 18°12.5' N, 76°48.8' W, 1 Dec. 2013.

Surrey County, Parish of Saint Andrew

- 8 Castleton Botanical Garden, 150 m alt., 18°10.2' N, 76°49.3' W, 1 Dec. 2013.

Surrey County, Parish of Portland

- 9 Northwestern part of Blue Mountains, humid secondary vegetation along road (B 1) from Buff Bay to Newcastle, shortly above Silver Hill, 680-700 m alt., 18°06.2' N, 76°43.0' W, 2 Dec. 2013.
- 10 Northwestern part of Blue Mountains, humid secondary vegetation along road (B 1) from Buff Bay to Newcastle, shortly above Silver Hill, 1150-1170 m alt., 18°05.3' N, 76°43.0' W, 2 Dec. 2013.

Surrey County, Parish of Saint Andrew

- 11 Blue Mountains, road B 1 between Buff Bay and Newcastle, rocky slopes at Gap Cafe, 1220 m alt., 18°04.991' N, 76°43.517' W, 2 Dec. 2013.

Surrey County, Parish of Portland

- 12 Blue Mountains, rocky slopes, road cuts and rain forest north of Hardwar Gap, 1200-1240 m alt., 18°05.2' N, 76°43.3' W, 3 Dec. 2013.

Surrey County, Parish of Saint Andrew

- 13 Blue Mountains, Newcastle, secondary (open and woody) vegetation along road to the top of Catherine's Peak, 1140-1525 m alt., 18°04.5-7' N, 76°42.2-9' W, 4 Dec. 2013.
- 14 Blue Mountains, Hollywell Recreation Area northwest of Hardwar Gap, low forest and shrubby vegetation along Oatley Mountain Trail, 1250-1345 m alt., 18°05.2-3' N, 76°43.6-7' W, and primary rain forest along (upper part of) trail to waterfall, 1200-1250 m, 5 Dec. 2013.
- 15 Southern slopes of Blue Mountains between Gordon Town and Worlds End, secondary vegetation along road, 540 m alt., 18°02.256' N, 76°42.243' W, 6 Dec. 2013.
- 16 Southern slopes of Blue Mountains, N-exposed slope along road at Content Gap, 1100 m alt., 18°02.366' N, 76°40.912' W, 6 Dec. 2013.
- 17 Southern slopes of Blue Mountains, boulders along road near Mavis Bank, 730 m alt., 18°01.521' N, 76°39.854' W, 6 Dec. 2013.

Surrey County, Parish of Portland

- 18 Blue Mountains, northern slopes between Section and Silver Hill Gap, rain forest, 1080 m alt., 18°05.2' N, 76°41.8' W, 7 Dec. 2013.
- 19 Blue Mountains, secondary vegetation around Silver Hill Gap, 1065 m alt., 18°05.3' N, 76°41.3' W, 7 Dec. 2013.

Surrey County, Parish of Saint Andrew

- 20 Blue Mountains, rocky slopes along road B 1 near (below) Newcastle, 1100 m alt., 18°04.5' N, 76°42.6' W, 8 Dec. 2013.
- 21 Blue Mountains, rocky slopes along road B 1 near (above) Newcastle, 1170 m alt., 18°04.7' N, 76°42.9' W, 8 Dec. 2013.
- 22 Blue Mountains, rocky slopes along road B 1 near south of Hardwar Gap (including Greenwich Drive), 1170-1220 m alt., 18°04.6' N, 76°43.3' W, 8 Dec. 2013.

Surrey County, Parish of Portland

- 23 Blue Mountains, road B 1 S of Buff Bay, secondary vegetation around Birnamwood Primary School, 400-410 m alt., 18°07.9' N, 76°43.0' W, 9 Dec. 2013.
- 24 Rio Grande Valley S of Port Antonio, Moore Town, *Citrus* trees and ornamental shrubs along road, 140 m alt., 18°03.948' N, 76°25.226' W, 10 Dec. 2013.
- 25 Port Antonio, Titchfield Peninsula, old walls and trees, 20 m alt., 18°10.0' N, 76°27.1' W, 10 Dec. 2013.
- 26 Port Antonio, peninsula E of the town, solitary trees, 2 m alt., 18°11.1' N, 76°26.5' W, 11 Dec. 2013.
- 27 Fairy Hill SE of Port Antonio, forest trees, 80 m alt., 18°08.200 N, 76°27.023 W, 11 Dec. 2013.
- 28 NE coast, Sherwood Forest above Fairy Hill, secondary vegetation, 210 m alt., 18°08.4' N, 76°22.3' W, 11 Dec. 2013.
- 29 Rio Grande Valley S of Port Antonio, secondary vegetation around Aligator Church, 90-100 m alt., 18°04.8' N, 76°27.0' W, 12 Dec. 2013.
- 30 Blue Mountains, humid rocky slopes along road B 1 between Buff Bay and Hardwar Gap, 800 m alt., 18°05.785' N, 76°43.001' W, 13 Dec. 2013.

Surrey County, Parish of Saint Thomas

- 31 Blue Mountains, secondary vegetation and rain forest on southern slopes between Wildflower Lodge above Epping Farm and Portland Gap, 1220-1675 m alt., 18°02.9-03.2' N, 76°36.0-37.3' W, 14 Dec. 2013.
- 32 Blue Mountains, primary rain forest around Portland Gap, 1675 m alt., 18°03.215' N, 76°35.982' W, 15 Dec. 2013.

33 Blue Mountains, primary rain forest and elfin forest between Portland Gap and Blue Mountain Peak, 1675-2250 m alt., 18°03.215-02.785' N, 76°34.770-35.982' W, 15 Dec. 2013.

Surrey County, Parish of Saint Andrew

34 Blue Mountains, rocky slopes along road B 1 between Newcastle and Hardwar Gap, 1200 m alt., 18°04.765' N, 76°43.479' W, 17 Dec. 2013.

LIST OF SPECIES (* = new to Jamaica)

LIVERWORTS AND HORNWORTS

ANTHOCEROTOPHYTA

Anthoceros punctatus L.

St. Andrew: Loc. 13, on soil, HvM 216599.

Nothoceros vincentianus (Lehm. & Lindenb.) J.C.Villarreal [= *Megaceros vincentianus* (Lehm. & Lindenb.) Campb.; = *Megaceros jamaicensis* Steph.]

St. Andrew: Loc. 14, on soil, HvM 216688.

A widespread tropical American species. In Jamaica previously known only from the type of *Megaceros jamaicensis* Steph. which was recently synonymized with *Nothoceros vincentianus* (Villarreal *et al.*, 2015).

**Notothylas breutelii* (Gottsche) Gottsche

St. Ann: Loc. 4, on soil, HvM 216474. **St. Mary:** Loc. 7, on soil, HvM 216508.

A widespread tropical American species, reaching as far north as Mexico and Louisiana (Pagán, 1939; Schuster, 1992). Also reported from Hawaii (Miller, 1967) and the Philippines (Hasegawa & Tan, 1986) where it probably has been introduced by man. From the West Indies known from St. Croix, Virgin Islands (type), Puerto Rico, Cuba (also as *N. cubana* Steph.), Dominican Republic, and Guadeloupe (Frahm, 2012; Lavocat Bernard & Schäfer-Verwimp, 2011; Pagán, 1939).

**Phaeoceros carolinianus* (Michx.) Prosk. [= *Phaeoceros laevis* subsp. *carolinianus* (Michx.) Prosk.]

St. Andrew: Loc. 11, ASV 34957; Loc. 13, HvM 216637; Loc. 16, HvM 216383, ASV 35165. **Portland:** Loc. 19, HvM 216771. **St. Thomas:** Loc. 31, HvM 216892 – all on soil.

A nearly cosmopolitan species, widespread also in the West Indies.

MARCHANTIOPHYTA

Acanthocoleus aberrans (Lindenb. & Gottsche) Kruijt

St. Ann: Loc. 6, epiphytic, ASV 34884. **St. Andrew:** Loc. 15, on rocky slope, ASV 35160. **Portland:** Loc. 19, on shady wall, ASV 35213/B.

The above cited specimens are without perianth, assignment to varietal level was therefore not possible.

Acanthocoleus aberrans (Lindenb. & Gottsche) Kruijt var. *aberrans*

St. Thomas: Loc. 31, on rock, c. per., 1220 m, ASV 35316, HvM 216860.

****Acrobolbus antillanus* R.M.Schust.**

St. Thomas: Loc. 33, epiphytic in elfin forest, 2250 m, ASV 35420.

An uncommon Caribbean-Andean species, known from Dominica (type), Costa Rica, Venezuela, northern Andes (Schuster, 1983: 567), Colombia (Gradstein & Uribe, 2015); new to the Greater Antilles.

***Acrobolbus laxus* (Lehm. & Lindenb.) Briscoe [= *Tylimanthus laxus* (Lehm. & Lindenb.) Spruce]**

St. Thomas: Loc. 31, on soil, 1580 m, HvM 216915, ASV 35350; Loc. 32, on soil, HvM 216947.

****Adelanthus carabayensis* (Mont.) Grolle**

St. Thomas: Loc. 33, on humid slope, 1950 m, ASV 35381/A.

A widespread tropical American species (Costa Rica to Bolivia and Brazil), from the West Indies reported from Cuba, Dominica and the Dominican Republic (Schäfer-Verwimp & Pócs, 2009).

***Adelanthus pittieri* (Steph.) Grolle**

St. Thomas: Loc. 33, epiphytic, with *Bazzania* sp., HvM 216916, on soil, 1850 m, ASV 35369.

****Alobiellopsis dominicensis* (Spruce) Fulford**

Portland: Loc. 10, on rocky slope over soil, only a few plants mixed with *Paracromastigum bifidum*, ASV 34947 p.p.

A scattered tropical American species (Costa Rica to Ecuador including Galápagos Islands); known in the West Indies from Cuba, Puerto Rico, Dominica, Martinique and Guadeloupe as well as Trinidad (Fulford, 1968; Gradstein, 1993; Grolle, 1975).

***Anoplolejeunea conferta* (C.F.W.Meissn. ex Spreng.) A.Evans**

Portland: Loc. 12, epiphytic, HvM 216556, epiphytic, ASV 34977 (c. per.); Loc. 19, on bark of *Pinus*, ASV 35199/B. **St. Andrew:** Loc. 14, epiphytic, HvM 216659. **St. Thomas:** Loc. 33, epiphyllous, 1675 m, ASV 35449/C (c. per.).

Observations of Evans (1908) concerning the occurrence of ocelli in *Anoplolejeunea* (mentioned also by Gradstein & Costa, 2003) could not be confirmed.

***Bazzania aurescens* Spruce**

St. Andrew: Loc. 14, epiphytic, HvM 216279, conf. S.R. Gradstein.

***Bazzania* aff. *cubensis* (Gottsche ex Steph.) Pagán**

St. Andrew: Loc. 14, epiphytic, HvM 216713.

***Bazzania cuneistipula* (Gottsche & Lindenb.) Trevis.**

St. Andrew: Loc. 14, HvM 216661. **St. Thomas:** Loc. 31, HvM 216862; Loc. 32, HvM 216918; Loc. 33, 2250 m, ASV 35416/A. All collections epiphytic.

***Bazzania gracilis* (Hampe & Gottsche) Steph.**

St. Andrew: Loc. 13, at base of tree fern and on forest floor, ASV 35062, 35065.

St. Thomas: Loc. 32, epiphytic, HvM 216919; Loc. 33, on humid slope, 1950 m, ASV 35381/B, pendent from *Podocarpus* branches, 2240 m, ASV 35401/B.

***Bazzania hookeri* (Lindenb.) Trevis.**

St. Andrew: Loc. 14, epiphytic, on rotting wood, HvM 216662, ASV 35112.

***Brachiolejeunea laxifolia* (Taylor) Schiffn.**

St. Thomas: Loc. 33, epiphytic, c. per., 2250 m, ASV 35411/A.

Brachiolejeunea leiboldiana (Gottsche & Lindenb.) Schiffn.

Portland: Loc. 30, on ornamental shrub, c. per., ASV 35314/B.

Bryopteris diffusa (Sw.) Nees

St. Ann: Loc. 5, epiphytic, HvM 216489, ASV 34868.

Calypogeia peruviana Nees & Mont.

Portland: Loc. 12, on shady soil, ASV 34976. **St. Andrew:** Loc. 13, on soil, HvM 216603, ASV 35061, 35067, 35073, on rocky slope, ASV 35037; Loc. 22, on soil, ASV 35243/A. **St. Thomas:** Loc. 31, on soil, HvM 216865, ASV 35352, 35364; Loc. 33, on rotting wood, mixed with *Leptoscyphus amphibolioides*, 1950 m, ASV 35439 p.p.

Caudalejeunea lehmanniana (Gottsche) A.Evans

Trelawny: Loc. 1, epiphytic, HvM 216397, ASV 34808/A, on branchlets in crown of fallen tree, ASV 34816 (c. per.).

Cephaloziella granatensis (J.B.Jack ex Steph.) Fulford

St. Andrew: Loc. 22, on shady soil, ASV 35243/B. **Portland:** Loc. 23, epiphytic, HvM 216777.

Ceratolejeunea brevinervis (Spruce) A.Evans

St. Andrew: Loc. 14, epiphytic, on root and rotting wood, HvM 216667, ASV 35088/B, 35110/A.

Ceratolejeunea cornuta (Lindenb.) Steph.

Portland: Loc. 12, epiphytic, HvM 216557, ASV 34971; Loc. 18, epiphytic, ASV 35178.

Ceratolejeunea cubensis (Mont.) Schiffn.

St. Andrew: Loc. 14, epiphytic, HvM 216668, ASV 35110/B, 35143.

**Ceratolejeunea filaria* (Taylor) Steph.

St. Andrew: Loc. 14, epiphytic, HvM 216669, ASV 35123.

A widespread neotropical species known from Mexico to Bolivia and Brazil; in the West Indies reported from Cuba, Haiti, Puerto Rico, Dominica, Guadeloupe, Martinique, St. Kitts (Dauphin, 2003).

**Ceratolejeunea laetefusca* (Austin) R.M.Schust.

St. Andrew: Loc. 8, epiphytic, HvM 216416, ASV 34907.

Widely distributed in the Neotropics: southeastern United States to Bolivia and Brazil. In the West Indies known from Cuba and Guadeloupe (Dauphin, 2003).

**Ceratolejeunea rubiginosa* Steph.

St. Andrew: Loc. 13, epiphytic, 1400 m, ASV 35079/A, mixed with *Cyclolejeunea luteola*.

A widely distributed Caribbean species: Florida, Bahamas, Costa Rica, Cocos Island, Cuba (type), Puerto Rico (Dauphin 2003), and Guyana (Gradstein 1997).

Ceratolejeunea spinosa (Gottsche) Steph.

St. Andrew: Loc. 14, epiphytic, HvM 216281, ASV 35111/A.

Cheilolejeunea adnata (Kunze ex Lehm.) Grolle

Portland: Loc. 12, epiphyllous on fern frond, ASV 34994/B (mixed with *Cololejeunea papilliloba*, *Microlejeunea epiphylla* and *M. acutifolia*). **St. Andrew:** Loc. 13, epiphyllous of fern frond, 1420 m, ASV 35047, and on rotting root, ASV 35063; Loc. 14, epiphytic, ASV 35152/A. **St. Thomas:** Loc. 31, epiphytic and epiphyllous on fern frond,

1550-1600 m, ASV 35343/B, 35351, 35356/A (with caducous leaves and marginal rhizoides, mixed with *Radula grevilleana* and *Lejeunea laetevirens*).

****Cheilolejeunea aneogyna* (Spruce) A.Evans**

Trelawny: Loc. 1, in crown of fallen tree, ASV 34818/A (with caducous leaves).
St. Andrew: Loc. 8, epiphytic, HvM 216442, ASV 34914/B. **Portland:** Loc. 19, on bark of solitary tree, HvM 216751, ASV 35221 (c. per. + andr., autoicous).

Widespread but scattered in the Neotropics (Brazil, Surinam, Venezuela), recently reported from Colombia, Bolivia, Ecuador, and Panama (Bastos, 2012; Campos *et al.*, 2014; Schäfer-Verwimp, 2014; Schäfer-Verwimp *et al.*, 2013); new to the West Indies.

***Cheilolejeunea clausa* (Nees & Mont.) R.M.Schust.**

Trelawny: Loc. 2, on limestone, ASV 34825/A, det. C. J. P. Bastos. **St. Andrew:** Loc. 34, epilithic, on rock, HvM 216261. **St. Ann:** Loc. 5, on limestone in forest, ASV 34863/A.

***Cheilolejeunea filiformis* (Sw.) W.Ye, R.L.Zhu & Gradst. [= *Omphalanthus filiformis* (Sw.) Nees]**

Portland: Loc. 10, epiphytic, HvM 216544. **St. Andrew:** Loc. 13, epiphytic, HvM 216628, ASV 35042 (c. per.); Loc. 34, epiphytic, HvM 216953, on rock, ASV 35466.

****Cheilolejeunea inflexa* (Hampe) Grolle**

St. Andrew: Loc. 14, epiphytic and on slope, ASV 35093, 35111/B, 35117/B, 35146.

A widespread but scattered tropical American species; in the West Indies known from Cuba, Guadeloupe, Dominica, Martinique, and St. Kitts (Grolle, 1979; Lavocat Bernard & Schäfer-Verwimp, 2011; Mustelier Martínez, 2012).

***Cheilolejeunea oncophylla* (Ångstr.) Grolle & M.E.Reiner**

St. Thomas: Loc. 33, on dead *Pogonatum*, c. per., 1900 m, ASV 35442.

****Cheilolejeunea ovalis* (Lindenb. & Gottsche) W.Ye, R.L.Zhu & Gradst. [= *Omphalanthus ovalis* (Lindenb. & Gottsche) Gradst.]**

Portland: Loc. 10, epiphytic, HvM 216545, on rock, ASV 34953. **St. Andrew:** Loc. 14, epiphytic, HvM 216697, on slope, ASV 35144.

Widespread in Central America and northern Andes (Costa Rica and Guatemala to Bolivia). There is a single record from the West Indies (Bartram & Arnell, 1961, as *Peltolejeunea ovalis*), however, no collection was cited.

****Cheilolejeunea quinquecarinata* (R.M.Schust.) W.Ye, R.L.Zhu & Gradst. [= *Aureolejeunea quinquecarinata* R.M.Schust.]**

St. Thomas: Loc. 33, epiphytic in elfin forest, 2240 m, c. per., ASV 35400/B.

A scattered high Andean species known from Venezuela (type), Colombia, Ecuador, and from the Dominican Republic (Schäfer-Verwimp & Pócs, 2009; Schäfer-Verwimp *et al.*, 2013; Uribe & Gradstein, 1998).

Recent phylogenetic investigations show that *Aureolejeunea* is nested in *Cheilolejeunea* (Schäfer-Verwimp *et al.*, 2014; Ye *et al.*, 2015).

***Cheilolejeunea rigidula* (Nees ex Mont.) R.M.Schust.**

Trelawny: Loc. 2, epiphytic, HvM 216443. **St. Andrew:** Loc. 8, epiphytic, HvM 216417; Loc. 14, epiphytic, HvM 216670. **Portland:** Loc. 12, epiphytic, ASV 34980/B, conf. C. J. P. Bastos; Loc. 19, on bark of *Pinus*, HvM 216288, epiphytic, ASV 35208.

St. Thomas: Loc. 31, epiphytic, ASV 35334, and on rock, HvM 216867, ASV 35336 (c. per. + andr., dioicous).

****Cheilolejeunea trifaria*** (Reinw., Blume & Nees) Mizut.

Trelawny: Loc. 2, epiphytic, HvM 216444. **St. Ann:** Loc. 6, epiphytic, HvM 216490, ASV 34879 (c. per. + andr., autoicous). **St. Andrew:** Loc. 14, epiphytic, HvM 216671, and on dead wood partly covered with soil, ASV 35088/C (c. per. + andr., autoicous). **Portland:** Loc. 9, epiphytic, HvM 216491; Loc. 19, epiphytic, HvM 216752.

This appears to be the first confirmed report of this common pantropical species from Jamaica (Söderström *et al.*, 2011).

****Cheilolejeunea unciloba*** (Lindenb.) Malombe [= *Leucolejeunea unciloba* (Lindenb.) A.Evans]

St. Andrew: Loc. 13, epiphytic, 1525 m, ASV 35058/B. **St. Thomas:** Loc. 33, epiphytic, 2200 m, ASV 35397/B.

A widespread but scattered Afro-American species; in the West Indies known from Cuba, Dominican Republic, and Guadeloupe (Grolle, 1975; Schäfer-Verwimp & Pócs, 2009; Schäfer-Verwimp & Reiner-Drehwald, 2009; all as *Leucolejeunea*).

Cheilolejeunea xanthocarpa (Lehm. & Lindenb.) Malombe [= *Leucolejeunea xanthocarpa* (Lehm. & Lindenb.) A.Evans]

St. Andrew: Loc. 14, epiphytic, ASV 35103/A. **St. Thomas:** Loc. 31, epiphytic, HvM 216868; Loc. 33, epiphytic in elfin forest, 2250 m, ASV 35413.

Cololejeunea appressa (A.Evans) Benedix

Portland: Loc. 12, epiphyllous, ASV 34997/C, 35006/C; Loc. 18, epiphyllous, ASV 35197/C.

Cololejeunea camillii (Lehm.) A.Evans

Trelawny: Loc. 1, ASV 34813/C. **Portland:** Loc. 9, ASV 34932/B; Loc. 28, ASV 35296/A, all epiphyllous.

Cololejeunea cardiocarpa (Mont.) A.Evans

Trelawny: Loc. 2, epiphyllous, ASV 34843. **St. Ann:** Loc. 5, epiphyllous, ASV 34867/B; Loc. 6, epiphyllous, ASV 34877/A (c. per.). **St. Andrew:** Loc. 8, epiphyllous, ASV 34903; Loc. 22, on bark of solitary tree, ASV 35259. **Portland:** Loc. 19, on bark of planted trees, ASV 35202/B; Loc. 28, epiphyllous, ASV 35299/A; Loc. 30, epiphyllous on fern frond, ASV 35309/B.

****Cololejeunea diaphana*** A.Evans

St. Andrew: Loc. 14, epiphyllous on fern frond, ASV 35140/A. **St. Thomas:** Loc. 31, epiphyllous on fern frond, 1640 m, ASV 35362/E; Loc. 33, epiphyllous, 1675 m, ASV 35449/A, 35452/C.

Nearly pantropical and widespread in tropical America and Asia; in Oceania reported from Samoa, often known as *Aphanolejeunea truncatifolia* Horik. (Eggers & Pócs, 2010; Pócs & Bernecker, 2009); in the West Indies known from Cuba, Guadeloupe, Martinique, and (questionably) Puerto Rico (Grolle, 1975; Lavocat Bernard & Schäfer-Verwimp, 2011; Evans, 1911).

Cololejeunea microscopica (Taylor) Schiffn. var. **africana** (Pócs) Pócs & Bernecker

St. Andrew: Loc. 14, on shrub in summit region, ASV 35101/A.

Cololejeunea obliqua (Nees & Mont.) Schiffn.

Portland: Loc. 28, epiphyllous, ASV 35296/B.

****Cololejeunea papilliloba*** (Steph.) Steph.

Portland: Loc. 12, epiphyllous, mixed with *Anoplolejeunea conferta* and *Cololejeunea papillosa*, ASV 34995/A, epiphyllous on fern frond, ASV 35006/B, 35007/B;

Loc. **18**, epiphyllous, c. per., ASV 35198/C. **St. Andrew:** Loc. **14**, epiphyllous, ASV 35129/C. **St. Thomas:** Loc. **31**, epiphyllous on fern frond, 1620 m, ASV 35357/A; Loc. **33**, epiphyllous on fern frond, 1850 m, c. spor., ASV 35371/A, epiphyllous, 1675 m, ASV 35452/A.

An Afro-American species, widespread but scattered in the Neotropics: Mexico, Costa Rica, Panama, Colombia, Ecuador, Brazil (Eggers in Eggers *et al.*, 2001, as *Aphanolejeunea pustulosa* (Ast) Bernecker & Pócs; Equihua & Pócs, 1999, as *A. pustulosa*; Parolly *et al.*, 2003, as *Aphanolejeunea kunertiana* Steph.; Schäfer-Verwimp, 2014; Uribe & Gradstein, 1998, as *A. kunertiana*). Recently reported from Africa: Bioko Island (Müller & Pócs, 2007). This is the first record for the species in the West Indies.

***Cololejeunea papillosa* (K.I.Goebel) Mizut.**

Portland: Loc. **12**, epiphyllous, HvM 216559, ASV 34996, 35005; Loc. **18**, epiphyllous, ASV 35197/A. **St. Thomas:** Loc. **31**, epiphyllous of fern frond, 1600 m, ASV 35356/C.

***Cololejeunea sicifolia* (Gottsche ex A.Evans) Pócs & Bernecker subsp. *jamaicensis* (R.M.Schust.) Bernecker & Pócs**

St. Thomas: Loc. **31**, 1620 m, ASV 35357/D; Loc. **33**, 1850 m, ASV 35371/C, both epiphyllous on fern frond.

****Cololejeunea sintenisii* (Steph.) Pócs**

St. Andrew: Loc. **14**, epiphyllous on fern frond, ASV 35140/C.

A nearly pantropical species, known from Asia, Australia, Réunion, Macaronesia, and the Neotropics: Florida and Costa Rica to Ecuador and Brazil (Pócs & Bernecker, 2009; Ah-Peng *et al.*, 2010). In the West Indies reported from Cuba, Haiti, Dominican Republic, Puerto Rico, Guadeloupe, and Dominica (Schäfer-Verwimp & Pócs, 2009).

***Cololejeunea spathulata* Jovet-Ast [= *Cololejeunea parallelifolia* R.M.Schust.]**

St. Thomas: Loc. **31**, epiphyllous on fern frond, 1640 m, ASV 35362/D; Loc. **33**, epiphyllous on fern frond, 1850 m, ASV 35371/D, and on living leaves, 2150 m, ASV 35393/C, 1675 m, ASV 35449/B.

****Cololejeunea subcardiocarpa* Tixier**

St. Andrew: Loc. **14**, epiphyllous on fern frond, ASV 35140/B.

A widespread but scattered tropical American species (Mexico, Panama, Ecuador, French Guiana, Brazil) with only a few recent records from the West Indies: Guadeloupe and the Dominican Republic (Schäfer-Verwimp & Reiner-Drehwald, 2009; Schäfer-Verwimp & Pócs, 2009).

****Colura calyptrifolia* (Hook.) Dumort.**

St. Thomas: Loc. **33**, epiphyllous and epiphytic, 2100-2150 m, c. per., ASV 35392/B, 35426.

Widespread but scattered bipolar species, known from South America, Africa including East African Islands, Subantarctic, atlantic Europe up to Scandinavia, and Asia (Sri Lanka, Nepal); in the West Indies known only from Cuba and the Dominican Republic (Hassel *et al.*, 2014; Mustelier Martínez, 2012; Schäfer-Verwimp & Pócs, 2009; Cykowska *et al.* in Ellis *et al.*, 2012, with detailed distribution).

****Colura rhynchophora* Jovet-Ast**

St. Andrew: Loc. **14**, epiphyllous on bromeliad, c. per., mixed with *Drepanolejeunea inchoata*, ASV 35108.

Known from Cuba, the Lesser Antilles (Guadeloupe, Dominica, Martinique), Guyana, Suriname, and Costa Rica (Mustelier Martínez, 2005; Eggers in Eggers *et al.*, 2004; Gradstein, 1997; Schäfer-Verwimp, 1999).

****Colura tenuicornis*** (A.Evans) Steph.

St. Andrew: Loc. **14**, epiphytic, *HvM 216673*. **Portland:** Loc. **30**, epiphytic, *HvM 216817*, and epiphyllous on fern frond, ASV 35309/A.

A widespread and common pantropical species, in the West Indies reported from Puerto Rico, Cuba, Dominican Republic, Martinique, Dominica, and Guadeloupe (Lücking, 1995; Schäfer-Verwimp & Pócs, 2009; Schubert, 1978).

****Colura tortifolia*** (Nees & Mont.) Trevis.

Trelawny: Loc. **1**, epiphytic on shrub in coffee plantation, *HvM 216398*, ASV 34804; Loc. **2**, epiphytic, *HvM 216445* (with *Leptolejeunea elliptica*), ASV 34828, and epiphyllous, ASV 34834/B. **St. Ann:** Loc. **5**, epiphyllous, *HvM 216477*, ASV 34861/A, 34870/A; Loc. **6**, on branches of shrub and epiphyllous, ASV 34873/A, 34875/A. **St. Andrew:** Loc. **8**, at base of tree fern, *HvM 216418*, ASV 34895. **Portland:** Loc. **28**, epiphytic on edge of fence, *HvM 216799* (with *Diplasiolejeunea rudolphiana*), ASV 35291, on burnt ferns, ASV 35292/B, and epiphyllous, ASV 35297/B.

A widespread neotropical species (Mexico to Peru and Brazil, Caribbean Islands); the most common member of *Colura* in Jamaica.

Cryptolophocolea martiana (Nees) L.Söderstr., Crand.-Stotl. & Stotler
[= *Chiloscyphus martianus* (Nees) J.J.Engel & R.M.Schust.]

St. Andrew: Loc. **13**, epiphytic, *HvM 216605*. **St. Thomas:** Loc. **31**, on rotting wood, *HvM 216869*.

Cyclolejeunea chitonia (Taylor) A.Evans

Portland: Loc. **28**, epiphyllous, ASV 35299/B.

Cyclolejeunea convexistipa (Lehm. & Lindenb.) A.Evans

St. Andrew: Loc. **14**, epiphyllous on bromeliad, ASV 35107/A.

Cyclolejeunea luteola (Spruce) Grolle

Portland: Loc. **12**, epiphytic, *HvM 216561*, ASV 34973, 35010; Loc. **13**, epiphytic, *HvM 216607*, ASV 35079. **St. Thomas:** Loc. **31**, epiphyllous on fern frond, 1630 m, ASV 35361/C; Loc. **33**, epiphytic, 1675 m, ASV 35450.

Dicranolejeunea axillaris (Nees & Mont.) Schiffn.

Portland: Loc. **10**, epiphytic, *HvM 216537*, on shady wall, ASV 34939; Loc. **12**, epiphytic, *HvM 216563*.

Diplasiolejeunea brunnea Steph.

St. Thomas: Loc. **31**, epiphyllous on fern frond, ASV 35361/A; Loc. **33**, epiphyllous, 1675 m, ASV 35448/A.

Diplasiolejeunea cavifolia Steph.

Portland: Loc. **12**, epiphyllous on fern frond, ASV 34994/D; Loc. **19**, on bark of solitary tree, ASV 35225/C.

****Diplasiolejeunea grolleana*** Reyes Montoya

Portland: Loc. **19**, on bark of planted trees, ASV 35201/A, and epiphytic on solitary tree, ASV 35225/B. **St. Andrew:** Loc. **14**, on shrub in summit region, with *Cheilolejeunea xanthocarpa* and *Colura tenuicornis*, ASV 35101. **St. Thomas:** Loc. **31**, epiphytic at edge of coffee plantation, 1300 m, ASV 35327.

Known only from the type (Cuba) and a collection from Costa Rica (Eggers in Eggers *et al.*, 2001; Reyes, 1983).

Diplasiolejeunea johnsonii A.Evans

St. Thomas: Loc. 31, epiphytic, 1550 m, ASV 35343/A.

Diplasiolejeunea pellucida (C.F.W.Meissn. ex Spreng.) Schiffn.

Portland: Loc. 18, epiphyllous, *HvM* 216738, ASV 35196/A. **St. Thomas:** Loc. 31, epiphyllous on fern frond, 1600 m, ASV 35356/B; Loc. 32, epiphyllous, *HvM* 216922.

Diplasiolejeunea rudolphiana Steph.

Trelawny: Loc. 1, in crown of fallen tree, ASV 34817; Loc. 2, epiphytic, *HvM* 216447, epiphyllous, ASV 34831, ASV 34834/A, 34842 (c. per. + andr., autoicous), on dead branchlets, ASV 34835/A (c. per. + andr., autoicous); Loc. 3, epiphytic, ASV 34849/C. **St. Ann:** Loc. 5, epiphytic, *HvM* 216478, ASV 34859/A; Loc. 6, on branchlets, ASV 34874 (c. per.), on palm stem, ASV 34880/B. **St. Mary:** Loc. 7, epiphytic, *HvM* 216502, ASV 34887. **Portland:** Loc. 28, epiphytic, *HvM* 216813, ASV 35285, on burnt ferns, ASV 35293 (c. per. + andr., autoicous), epiphyllous, ASV 35299/C.

Diplasiolejeunea unidentata (Lehm. & Lindenb.) Schiffn.

Portland: Loc. 12, epiphytic, ASV 34974; Loc. 19, epiphytic, *HvM* 216754, 216755, 216756, ASV 35201/B, 35203/B, 35205, 35225/A; Loc. 30, on ornamental shrub, ASV 35314/A. **St. Andrew:** Loc. 14, epiphytic, ASV 35103/B, 35153; Loc. 22, epiphytic, *HvM* 216842, ASV 35258.

Drepanolejeunea anoplantha (Spruce) Steph.

Portland: Loc. 12, epiphytic, *HvM* 216564, ASV 34972 (+ *Rectolejeunea versifolia*). **St. Thomas:** Loc. 33, epiphytic, 2150 m, ASV 35391/C, epiphytic in elfin forest, 2240 m, ASV 35402, on rotting wood, 1950 m, ASV 35440.

**Drepanolejeunea araucariae* Steph.

St. Thomas: Loc. 33, epiphytic, 2150 m, ASV 35424/B.

A widespread neotropical species; in the West Indies reported from Puerto Rico and the Dominican Republic (Evans, 1903; Schäfer-Verwimp & Pócs, 2009).

Drepanolejeunea bidens (Prantl) A.Evans

Trelawny: Loc. 2, epiphyllous, *HvM* 216448, ASV 34834/C. **St. Ann:** Loc. 5, epiphyllous, ASV 34861/B; Loc. 6, epiphyllous, ASV 34876/B. **Portland:** Loc. 9, epiphyllous, ASV 34932/C. **St. Andrew:** Loc. 14, on shrub in summit region, ASV 35104/B (+ *Lejeunea bermudiana*). **St. Thomas:** Loc. 31, epiphyllous, *HvM* 216873, on root, 1320 m, ASV 35328; Loc. 33, epiphyllous, 2150 m, ASV 35393/A (c. per.).

Drepanolejeunea biocellata A.Evans

St. Andrew: Loc. 14, epiphytic in summit region, ASV 35102/B, and on dead wood, ASV 35125/B; Loc. 34, on shady rocky slope, ASV 35465. **Portland:** Loc. 19, epilithic, *HvM* 216757, 216758, on bark of planted tree, ASV 35202/A.

Drepanolejeunea fragilis Bischl. ex L.Söderstr., A.Hagborg & von Konrat

St. Thomas: Loc. 33, epiphyllous in elfin forest, 2150 m, ASV 35393/B.

Drepanolejeunea inchoata (C.F.W.Meissn.) Steph.

Portland: Loc. 18, epiphyllous, *HvM* 216740; Loc. 30, epiphyllous on fern frond, ASV 35310/B.

Drepanolejeunea lichenicola (Spruce) Steph.

St. Andrew: Loc. 14, epiphytic, ASV 35083/B (+ *Prionolejeunea decora*), 35102/A.

St. Thomas: Loc. 31, epiphyllous on fern frond, 1600-1640 m, ASV 35356/D, 35362/A; Loc. 33, epiphyllous, 1675 m, ASV 35449/D, 35452/B (c. per.).

***Drepanolejeunea mosenii* (Steph.) Bischl.**

St. Ann: Loc. **5**, epiphyllous, *HvM* 216268; Loc. **6**, epiphyllous, *HvM* 216493.
Portland: Loc. **10**, epiphyllous on fern frond, *ASV* 34951/A; Loc. **19**, epiphyllous, *HvM* 216759, *ASV* 35212/A; Loc. **24**, on leaves of *Citrus*, *ASV* 35278/B; Loc. **30**, epiphyllous on fern frond, *ASV* 35309/C. **St. Andrew:** Loc. **14**, epiphyllous on fern frond, *ASV* 35139; Loc. **20**, epiphyllous, *ASV* 35236/A.

***Drepanolejeunea orthophylla* (Nees & Mont.) Bischl.**

Portland: Loc. **9**, on dead branchlets, *ASV* 34925/D.

****Drepanolejeunea submuricata* R.M.Schust. ex L.Söderstr. & A.Hagborg**

Portland: Loc. **18**, epiphytic, *ASV* 35187; Loc. **19**, on bark of *Pinus*, *ASV* 35200/A.
St. Thomas: Loc. **31**, epiphyllous on fern frond, 1640 m, *ASV* 35362/B.

A scattered Caribbean species, known from Venezuela, Costa Rica, Dominica (type), Guadeloupe, and the Dominican Republic (Dauphin & Ilku-Borges, 2002; Morales *et al.*, 2007; Schäfer-Verwimp in Blockeel *et al.*, 2009; Schäfer-Verwimp & Pócs, 2009; Schäfer-Verwimp & Reiner-Drehwald, 2009).

****Drepanolejeunea valiae* Jovet-Ast**

St. Thomas: Loc. **33**, epiphytic in elfin forest, 2150 m, *ASV* 35391/A.

An uncommon species reported so far from Guadeloupe (type), Dominica, and Venezuela (Schuster, 1996). However, there is some confusion with the Venezuelan record. Schuster (1996: 44) in the text refers his “Venezuelan material” to “Fig. 9: 13-14”, “Fig. 10: 7”, and “Fig. 10: 12”, but the legends of these figures indicate the collections came from Dominica. Further on, there is an unpublished record from Peru (Romanski, 2007). First record of the species for the Greater Antilles.

***Dumortiera hirsuta* (Sw.) Nees**

Portland: Loc. **12**, epilithic, *HvM* 216565; Loc. **18**, epilithic, *HvM* 216741, *ASV* 35177.

****Fossumbronia porphyrorhiza* (Nees) Prosk.**

Portland: Loc. **12**, *HvM* 216567; Loc. **19**, *HvM* 216760; **St. Andrew:** Loc. **11**, *ASV* 34954; Loc. **16**, *HvM* 216723, *ASV* 35164; Loc. **21**, *HvM* 216835; Loc. **22**, *ASV* 35264. **St. Thomas:** Loc. **31**, 1390 m, *ASV* 35331 – all on soil, and all c. spor.

It is surprising that this widespread and rather common neotropical species which is frequent in the Blue Mountains area has not previously been reported from Jamaica. Further records from the West Indies include Cuba, Haiti, Dominican Republic, Puerto Rico, Guadeloupe, Martinique, Trinidad, and Dominica (Lavocat Bernard & Schäfer-Verwimp, 2011; Schäfer-Verwimp & Pócs, 2009).

***Frullania atrata* (Sw.) Nees ex Mont.**

St. Andrew: Loc. **14**, epiphytic, *HvM* 216678. **St. Thomas:** Loc. **33**, elfin forest in summit region, pending from *Podocarpus* branches, 2240 m, *ASV* 35401/A.

***Frullania brasiliensis* Raddi**

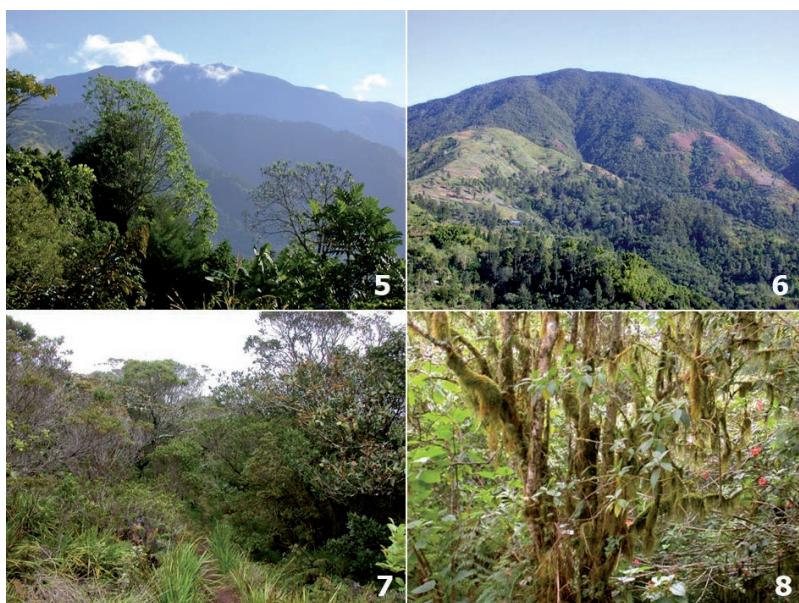

St. Andrew: Loc. **22**, epiphytic, *HvM* 216846. **St. Thomas:** Loc. **33**, on exposed rock, 1950-2000 m, *ASV* 35387, 35438/A, both c. per.

***Frullania caulisequa* (Nees) Nees**

St. Ann: Loc. **5**, epiphytic, *HvM* 216479, *ASV* 34860, 34872. **Portland:** Loc. **19**, on branchlets of planted *Rhododendron*, c. per., *ASV* 35203/C. **St. Thomas:** Loc. **33**, epiphytic in elfin forest, c. per., 2250 m, *ASV* 35409.

Figs 1-4. **1.** Adams Peak with easy access by military road. **2.** Portland: humid secondary vegetation at base of John Crow Mountains south of Port Antonio. **3.** Degraded woodland south of Port Antonio. **4.** Large epiphytic mats of *Erpodium domingense* in Port Antonio. (Photographed by A. Schäfer-Verwimp, December 2013).

Figs 5-8. **5.** View from Mavis Bank to Blue Mountain Peak. **6.** Cleared and degraded forest high up the southern slopes of Blue Mountains. **7.** Elfin forest at Blue Mountain Peak, 2250 m altitude. **8.** Cloud forest at Portland Gap, 1675 m altitude. (Photographed by A. Schäfer-Verwimp, December 2013).

****Frullania convoluta*** Lindenb. & Hampe

St. Thomas: Loc. 33, pendent from branches in elfin forest, 2250 m, ASV 35410.

Widely distributed from Mexico to Bolivia, Galapagos Islands, and the Dominican Republic (Uribe, 2008).

****Frullania dulimensis*** Uribe

St. Thomas: Loc. 33, pendent from branchlets in elfin forest, 2250 m, ASV 35419.

Previously known only from the type collection from Colombia, Tolima, from 3200 m altitude (Uribe, 2008); this is the first record for it in the West Indies.

Frullania ericoides (Nees) Mont.

Trelawny: Loc. 3, epiphytic, HvM 216464, ASV 34849/A. **St. Mary:** Loc. 7, epiphytic, HvM 216503. **St. Andrew:** Loc. 16, on bark of tree, HvM 216730; Loc. 21, epiphytic, HvM 216290; Loc. 22, on bark of solitary tree, HvM 216847, ASV 35263 (c. per.). **Portland:** Loc. 19, epiphytic, HvM 216761. **St. Thomas:** Loc. 31, epiphytic, HvM 216876; Loc. 32, epiphytic, HvM 216303; Loc. 34, on exposed rock, HvM 216950, ASV 35455 (c. per.).

Frullania gibbosa Nees

Trelawny: Loc. 2, HvM 216450. **St. Mary:** Loc. 7, c. per., ASV 34888. **St. Andrew:** Loc. 8, HvM 216421; Loc. 23, HvM 216779, 216780, ASV 35265/A (c. per.) – all epiphytic.

Frullania intumescens (Lehm. & Lindenb.) Lehm. & Lindenb.

St. Andrew: Loc. 21, epilithic, HvM 216836, ASV 35238 (c. per.); Loc. 34, on exposed rock, c. per., ASV 35454. **St. Thomas:** Loc. 31, on rock, 1480 m, ASV 35338.

Frullania kunzei (Lehm. & Lindenb.) Lehm. & Lindenb.

St. Ann: Loc. 5, ASV 34866; Loc. 7, HvM 216504 (with *Frullania gibbosa*), ASV 34890. **St. Andrew:** Loc. 8, HvM 216422, ASV 34910 (c. per.); Loc. 13, HvM 216611, ASV 35024 (c. per.); Loc. 14, HvM 216282, 216679; Loc. 22, HvM 216292, 216848, ASV 35248, 35253 (c. per. + andr., dioicous); **Portland:** Loc. 19, HvM 216289, 216762, ASV 35206, 35220 (c. per.); Loc. 23, HvM 216781, ASV 35265, 35268 (both c. per. + andr., dioicous). **St. Thomas:** Loc. 31, 1240 m, c. per., ASV 35322; Loc. 33, elfin forest, 2200 m, ASV 35397/A; Loc. 34, on exposed rock, ASV 35456 – all others epiphytic.

Frullania obscura (Sw.) Mont. [= *Frullania arecae* (Spreng.) Gottsche]

Portland: Loc. 12, on rotting branchlets, c. per., ASV 35017; Loc. 28, epiphytic, HvM 216801.

Frullania rio-janeirensis (Raddi) Ångstr.

Trelawny: Loc. 2, HvM 216451, ASV 34833 (c. per.); **St. Ann:** Loc. 5, HvM 216480; Loc. 6, HvM 216494; **St. Andrew:** Loc. 20, HvM 216825; Loc. 22, HvM 216849, ASV 35262 (c. per.), all epiphytic.

Frullania subtilissima (Mont. ex Nees) Lindenb.

St. Andrew: Loc. 13, on bark of tree, c. per. + andr., autoicous, ASV 35026; Loc. 14, epiphytic, ASV 35133, 35136 (c. per. + andr., autoicous). **St. Thomas:** Loc. 33, on exposed rock, c. per., 1950 m, ASV 35438/B, epiphytic in elfin forest, 2250 m, ASV 35414/A.

Frullanoides corticalis (Lehm. & Lindenb.) van Slageren

Portland: Loc. 25, on bark of old tree, c. per., ASV 35281; Loc. 26, epiphytic, HvM 216793, ASV 35283 (c. per. + andr., dioicous).

Frullanoides liebmaniana (Lindenb. & Gottsche) van Slageren

St. Andrew: Loc. 17, on rock, HvM 216736, ASV 35175 (c. spor.).

Frullanoides tristis (Steph.) van Slageren

Trelawny: Loc. 1, epiphytic in coffee plantation, c. per., ASV 34807. **St. Mary:** Loc. 7, on palm tree, c. andr., ASV 34886. **Portland:** Loc. 19, on bark of solitary tree, c. per., ASV 35222; Loc. 23, epiphytic at edge of coffee plantation, c. per., ASV 35270. **St. Andrew:** Loc. 22, epiphytic, HvM 216850, ASV 35249 (c. per.).

**Fuscocephaloziopsis catenulata* (Huebener) Váňa & L.Söderstr.

St. Andrew: Loc. 14, on rotting wood, c. per., ASV 35124, conf. J. Váňa.

A suboceanic montane boreo-subtropical species, known from Europe, Caucasus, Russian Far East, NE China, North America including Mexico, from Japan, Thailand and the Philippines known as *Cephalozia catenulata* subsp. *nipponica* (Potemkin & Sofronova, 2013, as *Cephalozia*; Váňa, 1988, as *Cephalozia*); further on reported from Costa Rica and the Dominican Republic (Holz *et al.*, 2001; Schäfer-Verwimp & Pócs, 2009, both as *Cephalozia*). This is the second collection from the West Indies.

Fuscocephaloziopsis crassifolia (Lindenb. & Gottsche) Váňa & L.Söderstr.

[= *Cephalozia crassifolia* (Lindenb. & Gottsche) Fulford]

St. Thomas: Loc. 33, on rotten wood, 1675 m, ASV 35451.

Harpalejeunea reflexula A.Evans

St. Andrew: Loc. 14, epiphytic, ASV 35089, det. J. Heinrichs & ASV, 35126.

A poorly known species known only from the type from Jamaica (Evans, 1908a; Grolle & Reiner-Drehwald, 1999). It is one of the few species of *Harpalejeunea* with numerous dispersed ocelli which are very conspicuous in fresh material.

Harpalejeunea tridens (Besch. & Spruce) Steph.

St. Andrew: Loc. 14, epiphytic, HvM 216283.

Herbertus juniperoides (Sw.) Grolle subsp. *juniperoides*

St. Andrew: Loc. 14, epiphytic, HvM 216680, ASV 35118. **St. Thomas:** Loc. 32, epiphytic, HvM 216924; Loc. 33, epiphytic, 1960 m, ASV 35384, on stem of tree fern in elfin forest, 2250 m, ASV 35418.

Herbertus juniperoides subsp. **acanthelius* (Spruce) K.Feldberg & Heinrichs

St. Thomas: Loc. 33, epiphytic in elfin forest, 2200 m, ASV 35399.

Herbertus juniperoides subsp. *pensilis* (Taylor) K.Feldberg & Heinrichs

St. Thomas: Loc. 33, epiphytic in elfin forest, ASV 35398.

Isotachis multiceps (Lindenb. & Gottsche) Gottsche

St. Thomas: Loc. 33, on soil in summit region, 2250 m, ASV 35407.

**Jensenia wallisii* (J.B.Jack & Steph.) Grolle

St. Thomas: Loc. 32, on soil, HvM 216375.

Known from Costa Rica, Panama, Colombia, Venezuela, and Guyana (Schuette & Stotler, 2005); this is the first record for the West Indies.

This species is very similar to *Jensenia difformis* (Nees) Grolle and is sometimes included in the latter. Schuette & Stotler (2005) kept it as a separate species, however, in our opinion the size of the plant seems not to be a reliable character for separation of the two. Future phylogenetic studies may prove (or reject) the distinctness of the two taxa. Nevertheless, also *J. difformis*, a south-pantropical species reaching southeast Brazil, would be a new record for the West Indies.

Söderström *et al.* (2016) accepted *Jensenia wallisii* as a good species.

***Kurzia capillaris* (Sw.) Grolle**

Portland: Loc. **10**, on soil, HvM 216541, ASV 34952. **St. Andrew:** Loc. **13**, on slope, 1480 m, ASV 35053; Loc. **14**, on soil, HvM 216683.

***Leiolejeunea grandiflora* A.Evans**

St. Thomas: Loc. **33**, epiphytic in elfin forest, 2150 m, ASV 35394, 35423 (both. c. per.), creeping on *Herbertus* and *Bazzania*, 2200 m, ASV 35398/A, epiphytic in summit region, 2200-2250 m, ASV 35405, 35422, epiphytic in cloud forest, c. per., 1800 m, ASV 35443.

A very rare species (and genus) previously known only from the type collections where it now has been recollected after more than 100 years. A second record from Venezuela (Fulford, 1972) should be confirmed (Dauphin *et al.*, 2008). Robinson (1976) lists the same specimen as Fulford (1972). The specimens ASV 35394 and 35422 have been used for phylogenetic studies and consequently *Leiolejeunea* was placed in its own subtribe of Lejeuneaceae (Schäfer-Verwimp *et al.*, 2014).

***Leiomitra elliotii* (Steph.) R.M.Schust. [= *Trichocolea elliotii* Steph.]**

St. Andrew: Loc. **13**, epiphytic, HvM 216627, on forest floor, 1525 m, ASV 35064; Loc. **14**, epiphytic, HvM 216711, on slope, ASV 35145.

***Leiomitra tomentosa* (Sw.) Lindb.**

St. Andrew: Loc. **14**, epiphytic, HvM 216712.

***Lejeunea adpressa* Nees**

Trelawny: Loc. **2**, on dead branchlets, c. per. + andr., autoicous, with marginal rhizoids, ASV 34835/B. **St. Andrew:** Loc. **8**, on root, c. spor., ASV 34906. **Portland:** Loc. **9**, on shrub, c. per., ASV 34918/A, 34925/B; Loc. **12**, epiphyllous, ASV 34997/B; Loc. **19**, epiphytic on shrub, c. per. + andr., autoicous, ASV 35204/B; Loc. **28**, epiphytic at edge of fence, c. per., ASV 35286.

****Lejeunea aphanes* Spruce**

Portland: Loc. **28**, epiphyllous and on dead branch, ASV 35296/C, 35298.

A widespread Afro-American species (for a long time known as *L. filipes* Spruce and *L. autoica* R.M.Schust.); in the West Indies known from Guadeloupe (Schäfer-Verwimp & Reiner-Drehwald 2009), Martinique (Eggers in Eggers *et al.*, 2004), Dominica (Schäfer-Verwimp, 1999, as *L. filipes*, with detailed distribution), and Cuba (Reiner-Drehwald, 1995).

****Lejeunea bermudiana* (A.Evans) R.M.Schust.**

St. Andrew: Loc. **14**, on shrub in summit region, c. per., ASV 35099/A, 35104/A.

St. Thomas: Loc. **31**, epiphyllous on fern frond, 1620 m, c. per., ASV 35357/B.

A scattered tropical and subtropical American species, reported from Bermuda, southeastern United States, Panama, Brazil; in the West Indies known from Puerto Rico, Dominica, and Guadeloupe (Reiner-Drehwald & Goda, 2000; Schäfer-Verwimp, 2014; Schäfer-Verwimp & Reiner-Drehwald, 2009).

****Lejeunea cancellata* Nees & Mont.**

Trelawny: Loc. **1**, epiphytic in coffee plantation, ASV 34806/B; Loc. **2**, epiphytic, HvM 216463, ASV 34824, 34840/A. **St. Ann:** Loc. **5**, epiphytic, HvM 216482, ASV 34864.

Portland: Loc. **9**, epiphytic, HvM 216518; Loc. **10**, epiphyllous on fern frond, ASV 34951/C; Loc. **19**, epiphytic, ASV 35204/A, 35209 (c. per.), 35215/B (c. per.), 35218 (nearly exclusively flagelliferous branches); Loc. **30**, epiphytic, HvM 216818, on ornamental shrub, ASV 35315.

St. Andrew: Loc. **16**, epiphytic, with *Lejeunea laetevirens*, HvM 216724; Loc. **20**, on dead branchlet, ASV 35232/B. **St. Thomas:** Loc. **31**, epiphytic, HvM 216298, 216882.

A widespread tropical American species: Florida, Costa Rica, Panama, Ecuador, Argentina, Brazil, Surinam; records from Hawaii and Africa have been rejected (Grolle, 1985); in the West Indies known from Cuba (type), and the Dominican Republic (Schäfer-Verwimp & Pócs, 2009).

****Lejeunea caulicalyx* (Steph.) M.E.Reiner & Goda**

St. Andrew: Loc. 13, epiphyllous on fern frond, 1420 m, ASV 35045/B.

A widely distributed species in tropical America (Guatemala, Panama, Ecuador, Bolivia, Brazil, French Guiana); in the West Indies known from Cuba (type), Dominican Republic, and Guadeloupe (Reiner-Drehwald & Goda, 2000; Reiner-Drehwald in Gradstein & Ilku-Borges, 2009; Schäfer-Verwimp & Reiner-Drehwald, 2009; Schäfer-Verwimp & Pócs, 2009).

***Lejeunea cerina* (Lehm. & Lindenb.) Lehm. & Lindenb.**

Portland: Loc. 9, epiphytic, HvM 216519; Loc. 12, at tree base, c. per., ASV 35008.

St. Andrew: Loc. 13, on soil and epiphyllous on fern frond, 1270-1420 m, ASV 35021, 35041, 35046/A; Loc. 22, on shady slope, HvM 216293, ASV 35255. **St. Thomas:** Loc. 31, epiphytic, HvM 216883, 216884; Loc. 32, epiphytic, HvM 216925.

****Lejeunea controversa* Gottsche**

St. Andrew: Loc. 20, on shady rock, ASV 35227. **Portland:** Loc. 30, epiphytic, HvM 216297, on shady slope, ASV 35311. **St. Thomas:** Loc. 31, on root of tree, 1220 m, ASV 35320/A.

A widespread species in Central and South America; in the West Indies known from Cuba, Guadeloupe, and Dominica (Reiner-Drehwald & Goda, 2000).

***Lejeunea deplanata* Nees [= *Lejeunea maxonii* (A.Evans) Xiao L.He]**

Portland: Loc. 19, on bark of solitary tree, ASV 35223. **St. Andrew:** Loc. 20, on dead branchlet, ASV 35232/C; Loc. 21, on bark of old tree, ASV 35244 – all c. per.

***Lejeunea flava* (Sw.) Nees**

Trelawny: Loc. 1, epiphytic, HvM 216178; Loc. 2, on dead plants, c. spor. ASV 34844. **St. Ann:** Loc. 5, epiphytic, HvM 216483, ASV 34859/B (c. per.), 34871 (c. spor.), epiphyllous on fern frond, c. per., ASV 34862, on burnt ferns, c. per., ASV 34865, on rotting wood, c. spor., ASV 34869, epiphyllous, ASV 34870/B; Loc. 6, on palm tree, c. spor., ASV 34878. **St. Mary:** Loc. 7, epiphytic, HvM 216179. **St. Andrew:** Loc. 13, epiphytic, HvM 216615, epiphyllous on fern frond, 1420-1480 m, c. per., ASV 35046/B, 35077; Loc. 14, epiphyllous, c. per. + andr., autoicous, ASV 35129/B. **Portland:** Loc. 9, on rotting branchlets, c. per., ASV 34925/A, and epiphyllous, c. per. + andr., autoicous, ASV 34932/A; Loc. 12, epiphyllous, c. per. + andr., autoicous, ASV 34995/B; Loc. 19, on bark of *Pinus*, c. per., ASV 35200/B, on branchlets of *Rhododendron*, c. per., ASV 35203/A, on root of tree, c. per. + andr., autoicous, ASV 35215/A, on bark of solitary tree, c. per. + andr., autoicous, ASV 35225/D; Loc. 28, epiphytic, HvM 216804, ASV 35290 (c. spor.), on burnt ferns, c. per., ASV 35292/A. **St. Thomas:** Loc. 31, epiphyllous on fern fronds, c. per. + andr., autoicous, ASV 35355.

***Lejeunea glaucescens* Gottsche**

St. Andrew: Loc. 8, epiphytic, HvM 216424, on root, c. per. + andr., autoicous, HvM 216269; Loc. 14, epiphyllous, c. per. + andr., autoicous, ASV 35129/A. **St. Thomas:** Loc. 31, epiphyllous on fern frond, c. per., 1620 m, ASV 35357/C.

****Lejeunea laeta* (Lehm. & Lindenb.) Lehm. & Lindenb.**

Trelawny: Loc. 1, on humid soil, HvM 216403, ASV 34810 (c. spor.). **St. Andrew:** Loc. 8, on humid stone, HvM 216425, ASV 34898 (c. andr.), 34904. **Portland:** Loc. 9, on humid rocky slope, ASV 34934. **St. Thomas:** Loc. 31, on soil in coffee plantation, 1270-1350 m, HvM 216885, ASV 35324, 35329.

A widespread but scattered tropical American species (Mexico to Argentina and Brazil); in the West Indies known from the Dominican Republic and Guadeloupe (Lavocat Bernard & Schäfer-Verwimp, 2011; Schäfer-Verwimp & Pócs, 2009).

***Lejeunea laetevirens* Nees & Mont.**

Trelawny: Loc. 1, epiphytic, *HvM* 216262, ASV 34806/A; Loc. 2, epiphytic, *HvM* 216453, on limestone, ASV 34826/B; Loc. 3, epiphytic, *HvM* 216467, on shady concrete wall, ASV 34846/B. **St. Ann:** Loc. 4, epiphytic, *HvM* 216471, ASV 34855/A, on shady limestone wall, ASV 34854/B; **St. Mary:** Loc. 7, on bark of solitary tree, *HvM* 216781, ASV 34892; **Portland:** Loc. 9, epiphytic, *HvM* 216395; Loc. 23, epiphytic, *HvM* 216725, ASV 35266/A; Loc. 24, epiphyllous on *Citrus*, ASV 35278/D; Loc. 26, epiphytic, *HvM* 216794, 216795, ASV 35284; Loc. 28, epiphytic, *HvM* 216805. **St. Andrew:** Loc. 16, epiphytic, *HvM* 216520, on rock, ASV 35168.

****Lejeunea paucidentata* (Steph.) Grolle**

St. Andrew: Loc. 16, on soil, *HvM* 216726, ASV 35166, both c. per.

An Antillean endemic species, known from Cuba, Dominican Republic, Puerto Rico, Guadeloupe, and Dominica (Reiner-Drehwald & Goda, 2000; Schäfer-Verwimp & Pócs, 2009; Schäfer-Verwimp & Reiner-Drehwald, 2009).

***Lejeunea phyllobola* Nees & Mont.**

Portland: Loc. 23, epiphytic, *HvM* 216294, ASV 35269 (c. andr., dioicous).

St. Andrew: Loc. 16, epiphytic, c. andr. (dioicous), ASV 35170. **St. Thomas:** Loc. 31, epiphytic, c. per. + andr., 1450 m, ASV 35453.

****Lejeunea sporadica* Besch. & Spruce**

St. Andrew: Loc. 14, on rotting wood, c. per. + andr. (autoicous), ASV 35087.

St. Thomas: Loc. 33, epiphyllous on fern frond, c. per., 1850 m, ASV 35371/B, and epiphytic in cloud forest, c. per. + andr. (autoicous), 1950 m, ASV 35383/B.

A very scattered neotropical species: Guyana, Brazil, Panama, Costa Rica (Bastos & Yano, 2004, as *L. elliottii*; Herzog, 1951, as *Harpalejeunea sporadica*; Reiner-Drehwald & Goda, 2000, as *L. elliottii*; Schäfer-Verwimp, 2014); in the West Indies known from Dominica, Guadeloupe, St. Vincent, and Cuba (Schäfer-Verwimp & Reiner-Drehwald, 2009).

****Lejeunea tapajosensis* Spruce**

Trelawny: Loc. 1, in crown of fallen tree, ASV 34819; Loc. 3, epiphytic, *HvM* 216267. **Portland:** Loc. 9, on rotting stem, ASV 34924 (with numerous caducous leaves).

Widespread but scattered in tropical America: Panama to Peru, Argentina, and Brazil; in the West Indies known only from the Lesser Antilles (Dominica, Guadeloupe; Schäfer-Verwimp, 1999; Schäfer-Verwimp & Reiner-Drehwald, 2009); new to the Greater Antilles.

***Lejeunea trinitensis* Lindemb.**

Trelawny: Loc. 1, on dead plants, c. per., ASV 34815; Loc. 3, epiphytic, *HvM* 216468. **St. Ann:** Loc. 4, epiphytic, *HvM* 216472, ASV 34855/B, on shady limestone wall, ASV 34854/A. **St. Andrew:** Loc. 15, epiphytic, *HvM* 216720, ASV 35159/B.

***Lejeunea* spec. – 38 further specimens (mainly *Hetero-* and *Taxilejeunea*) which could not be determined to species level.**

***Lepidolejeunea cuspidata* (Gottsche) Heinrichs & Schäf.-Verw. [= *Lepidolejeunea punctata* (Herzog) R.M.Schust.]**

Portland: Loc. 9, on soil, *HvM* 216521, ASV 34931; Loc. 12, epiphytic, *HvM* 216275, ASV 34984, 34987, 35009. **St. Andrew:** Loc. 13, epiphytic, 1380 m, ASV 35036;

Loc. **20**, on dead branchlet, mixed with *Lejeunea controversa* and *Lejeunea laetevirens*, ASV 35232/A, epiphyllous, ASV 35236/B.

This species was previously known under different names in synonymy of *Lepidolejeunea involuta* (as *L. punctata* from Jamaica) until Heinrichs *et al.* (2015) could demonstrate the taxon to be a good species. *Lepidolejeunea cuspidata* is best distinguished from the similar *L. involuta* by the occurrence of ocelli mostly smaller than surrounding cells (in *L. involuta*, the ocelli are more or less of the same size as surrounding cells and not or hardly recognizable in old herbarium material).

Lepidolejeunea involuta (Gottsche) Grolle

Portland: Loc. **12**, epiphyllous, with *Microlejeunea epiphylla* and *Cololejeunea papillosa*, ASV 34995/C; Loc. **18**, on liana, ASV 35195. **St. Andrew:** Loc. **13**, epiphytic, HvM 216616, on slope, 1480 m, ASV 35052.

See note under the preceding species.

Lepidozia cupressina (Sw.) Lindenb.

St. Thomas: Loc. **33**, on root in cloud forest, 1900 m, ASV 35377/A.

Lepidozia patens Lindenb.

St. Thomas: Loc. **33**, on humid slope in cloud forest, 1880 m, ASV 35372.

****Leptolejeunea convexistipa*** Bischl.

Portland: Loc. **18**, epiphyllous, ASV 35198/A.

Previously known from Brazil (type), Costa Rica (Lücking, 1995, as *L. cf. convexistipa*), Ecuador, and Panama (Heinrichs *et al.*, 2014); however, its distribution is incompletely known since it was included in the polymorphous *L. maculata* (Mitt.) Schiffn. (Grolle, 1976). Recent molecular studies provided some evidence that this complex may include several species, and therefore *L. convexistipa* was kept separately (Heinrichs *et al.*, 2014).

Leptolejeunea elliptica (Lehm. & Lindenb.) Besch.

Trelawny: Loc. **1**, epiphytic on shrub in coffee plantation, HvM 216404, ASV 34801, epiphyllous in secondary forest, ASV 34813/A; Loc. **2**, epiphyllous, HvM 216454, ASV 34834/E. **St. Ann:** Loc. **5**, epiphyllous, HvM 216484, ASV 34867/A, 34870/C; Loc. **6**, epiphyllous, HvM 216495, 216496, ASV 34876/A. **St. Andrew:** Loc. **8**, epiphyllous, ASV 34902/A. **Portland:** Loc. **9**, epiphyllous, ASV 34932/D; Loc. **24**, on leaves of *Citrus*, ASV 35278/A.

Leptolejeunea exocellata (Spruce) A.Evans

Trelawny: Loc. **2**, epiphyllous, ASV 34834/D.

****Leptoscyphus amphibolius*** (Nees) Grolle

St. Thomas: Loc. **33**, on rotting wood, 1950 m, ASV 35439.

A widespread tropical American species ranging from Mexico to Bolivia and Brazil (Grolle 1963, with map); in the West Indies known only from Cuba (Fulford, 1976).

Leptoscyphus trapezoïdes (Mont.) L.Söderstr. [= *Chiloscyphus breutelii* (Gottsche) J.J.Engel & R.M.Schust.]

St. Andrew: Loc. **14**, epiphytic, HvM 216672.

Lophocolea bidentata (L.) Dumort. [= *Chiloscyphus coadunatus* (Sw.) J.J.Engel & R.M.Schust.]

Portland: Loc. **12**, epiphytic, HvM 216574. **St. Andrew:** Loc. **13**, on rocky slope, 1380 m, ASV 35035. **St. Thomas:** Loc. **31**, epiphytic, HvM 216886.

The specimen ASV 35035 was used in a phylogenetic study (Patzak *et al.*, 2016, as *Chiloscyphus coadunatus*).

Lophocolea muricata (Lehm.) Nees [= *Chiloscyphus muricatus* (Lehm.) J.J.Engel & R.M.Schust.]

Portland: Loc. 12, epiphytic, HvM 216558. **St. Thomas:** Loc. 32, epiphytic, HvM 216921.

Lopholejeunea subfusca (Nees) Schiffn.

Trelawny: Loc. 1, HvM 216405. **St. Ann:** Loc. 5, HvM 216485. **St. Mary:** Loc. 7, HvM 216506. **St. Andrew:** Loc. 8, HvM 216428. **Portland:** Loc. 28, HvM 216806 – all epiphytic.

Marchantia chenopoda L.

Portland: Loc. 10, on soil, HvM 216543; Loc. 12, on soil, HvM 216576.

Marchesinia cf. brachiata (Sw.) Schiffn.

Trelawny: Loc. 2, on soil, HvM 216455, on limestone, 360 m; Loc. 3, on soil, HvM 216621. **St. Andrew:** Loc. 13, on shady wall near military base, ASV 35080; Loc. 21, on soil, HvM 216838; Loc. 22, on soil, HvM 216852; on rock, ASV 35257; Loc. 34, on soil, HvM 216952, on rocky slope, ASV 35462. **Portland:** Loc. 19, epiphytic on *Coffea* shrub, ASV 35224/A. **St. Thomas:** Loc. 31, on soil, HvM 216887.

Surprisingly, perianths, which should not be rare in this species, have not been seen in any of the specimens. The underleaf bases are variably decurrent, often asymmetrically so, or even not decurrent as in *M. robusta*, however, with smooth margin. Also, no caducous leaves could be observed, indicating *M. bongardiana* which may be expected at altitudes below 500 m (localities 2 and 3).

Mastigolejeunea auriculata (Wilson & Hook.) Steph.

Trelawny: Loc. 2, on limestone, c. per., ASV 34841; Loc. 3, on shady limestone, HvM 216469, ASV 34850 (c. per.). **St. Ann:** Loc. 4, epiphytic, HvM 216473, ASV 34856 (c. per.).

Metzgeria albinea Spruce var. *albinea*

St. Andrew: Loc. 13, epiphytic, HvM 216994; Loc. 20, on dead branch, ASV 35234.

***Metzgeria attenuata** Steph.

St. Thomas: Loc. 33, epiphyllous in cloud forest, ASV 35448/B.

An Afro-American species, in the Neotropics known from Mexico, Costa Rica, Panama, Colombia, Ecuador, and Bolivia (Costa 2008); new to the West Indies.

Metzgeria ciliata Raddi

Portland: Loc. 12, on forest floor, ASV 34985, epiphyllous on fern frond, ASV 35006/A. **St. Thomas:** Loc. 31, epiphytic, HvM 216888.

***Metzgeria crassipilis** (Lindb.) A.Evans

Portland: Loc. 19, epiphytic on *Coffea* shrub, creeping on and between *Marchesinia brachiata*, ASV 35224/B.

A nearly worldwide distributed species, known from North America, Mexico, Panama, Colombia, Madagascar, Burundi, Malawi, Uganda, India, Sri Lanka, China, Indonesia, Japan, Australia, and New Zealand (Costa, 2008; Grolle, 1995; Schäfer-Verwimp, 2014; So, 2003, 2004); in the West Indies reported from Guadeloupe, Cuba, and the Dominican Republic (Costa, 2008; Lavocat-Bernard & Schäfer-Verwimp, 2011; Mustelier Martínez, 2005, 2006).

Metzgeria leptoneura Spruce

St. Thomas: Loc. 32, on soil, *HvM* 216930; Loc. 33, on humid slope in cloud forest, 1880 m, ASV 35374.

Metzgeria procera Mitt.

St. Thomas: Loc. 33, on humid slope in cloud forest, 1950 m, ASV 35378.

****Metzgeria scyphigera*** A.Evans

St. Thomas: Loc. 31, epiphyllous on fern frond, 1630 m, ASV 35361/B.

An Afro-American species, widely distributed in tropical and temperate America from Mexico to Bolivia and Brazil with isolated stations in Tierra del Fuego of Chile and Argentina (Costa, 2008); recently reported from Rwanda, Central Africa (Bednarek-Ochyra & Ochyra in Ellis *et al.*, 2013). This is the first record for the West Indies.

Microlejeunea acutifolia Steph.

Portland: Loc. 12, epiphytic, ASV 34970/B.

Microlejeunea bullata (Taylor) Steph.

Portland: Loc. 19, on bark of solitary tree, ASV 35223/A. **St. Andrew:** Loc. 22, creeping on *Frullania kunzei*, ASV 35248/A.

****Microlejeunea capillaris*** (Gottsche) Steph.

Portland: Loc. 19, epiphytic, creeping on *Frullania kunzei* and *Odontolejeunea lunulata*, ASV 35207/B.

A widespread but scattered tropical American species (Costa Rica to Peru and Brazil), in the West Indies previously known only from the Dominican Republic (Schäfer-Verwimp & Pócs, 2009).

****Microlejeunea colombiana*** Bischl.

St. Thomas: Loc. 33, epiphyllous in elfin forest, growing with *Colura calyptrifolia*, *Drepanolejeunea araucariae* and *D. bidens*, 2150 m, ASV 35392/A.

A scattered neotropical species ranging from Mexico to Peru with a few records from Panama, Colombia, Ecuador, and Venezuela (Bischler *et al.*, 1963; Parolly *et al.*, 2004; Schäfer-Verwimp, 2014); in the West Indies known only from the Dominican Republic (Schäfer-Verwimp & Pócs, 2009).

****Microlejeunea diversiloba*** (Spruce) Müll.Frib. [= *Microlejeunea stricta* (Gottsche, Lindenb. & Nees) Steph.]

Portland: Loc. 12, epiphyllous, *HvM* 216580, ASV 34997/A, epiphytic, ASV 34982/B, creeping on *Pilotrichum bipinnatum*, ASV 34991/A.

A widespread tropical American species ranging from Mexico to Ecuador and Brazil; in the West Indies known from Guadeloupe and the Dominican Republic (Bischler *et al.*, 1963; see also note in Schäfer-Verwimp, 2010).

****Microlejeunea epiphylla*** Bischl.

St. Mary: Loc. 7, epiphytic, *HvM* 216507, ASV 34891. **Portland:** Loc. 12, epiphytic and epiphyllous on fern frond, ASV 34978, 34994/C; Loc. 23, epiphytic, *HvM* 216784, ASV 35267. **St. Thomas:** Loc. 32, epiphytic, *HvM* 216931.

A widespread neotropical species, known from Florida and Costa Rica to Ecuador and Brazil; in the West Indies reported from Guadeloupe, Martinique, Dominica, Cuba, and the Dominican Republic (Bischler *et al.*, 1963; Mustelier Martínez, 2012; Schäfer-Verwimp, 2010; Schäfer-Verwimp & Pócs, 2009).

Micropterygium trachyphyllum Reimers

St. Andrew: Loc. 14, epiphytic in cloud forest, *HvM* 216691, ASV 35120.

Mnioloma cyclostipum (Spruce) R.M.Schust.

St. Andrew: Loc. **13**, epiphytic, *HvM* 216622, on humus in summit region, 1525 m, ASV 35069.

Monoclea gottschei Lindb. subsp. *elongata* Gradst. & Mues

Portland: Loc. **12**, on stone in brook, *HvM* 216581, ASV 35004.

Myriocoleopsis minutissima (Sm.) R.L.Zhu, Y.Yu & Pócs subsp. *myriocarpa* (Nees & Mont.) R.L.Zhu, Y.Yu & Pócs [= *Cololejeunea minutissima* (Sm.) Steph. subsp. *myriocarpa* (Nees & Mont.) R.M.Schust.]

Trelawny: Loc. **2**, on branchlets, c. per., ASV 34829. **St. Ann:** Loc. **6**, on branchlets, c. per., ASV 34873/B. **St. Andrew:** Loc. **8**, epiphyllous, c. per., ASV 34902/B. **St. Mary:** Loc. **7**, epiphytic, *HvM* 216501. **Portland:** Loc. **28**, epiphytic, *HvM* 216798, ASV 35287 (c. per.). **St. Thomas:** Loc. **31**, epiphytic at edge of coffee plantation, 1300 m, c. per., ASV 35326.

Neesioscyphus bicuspidatus (Steph.) Grolle

St. Andrew: Loc. **14**, on soil, *HvM* 216692, ASV 35147.

Neurolejeunea breutelii (Gottsche) A.Evans

St. Andrew: Loc. **14**, epiphytic and on soil, *HvM* 216693, ASV 35149. **Portland:** Loc. **29**, epiphytic, *HvM* 216295.

**Nowellia wrightii* (Gottsche ex Spruce) Steph. ex Duss

St. Andrew: Loc. **14**, epiphytic, on rotting log, *HvM* 216694, ASV 35095, 35125/A (c. per.).

Grolle (1968) considered this species to be a Cuban endemic; however, the plants from Jamaica and also a specimen from Dominica (*Schäfer-Verwimp & Verwimp* 17764 from Morne Trois Pitons, 22 May 1996), originally determined as *N. wrightii*, but redetermined by Grolle as “luxuriant phase” of *N. dominicensis* Steph. (Grolle in litt. 1997), seem inseparable from *N. wrightii*; possibly *N. dominicensis* represents only a weak phase of *N. wrightii*. This is the first record of the species for Jamaica.

Odontolejeunea lunulata (F.Weber) Schiffn.

St. Ann: Loc. **6**, epiphytic, *HvM* 216497, epiphyllous, ASV 34877/B. **Portland:** Loc. **12**, epiphytic, ASV 34975; Loc. **19**, epiphytic, *HvM* 216769, 216770, ASV 35207/A, epiphyllous, ASV 35211; Loc. **28**, epiphytic, *HvM* 216808, 216809.

Odontoschisma longiflorum (Taylor) Trevis.

St. Andrew: Loc. **13**, epiphytic, *HvM* 216624, on humus in summit region, 1525 m, ASV 35070. **St. Thomas:** Loc. **32**, on rotting wood, *HvM* 216933.

Odontoschisma sphagni (Dicks.) Dumort. [= *Odontoschisma prostratum* (Sw.) Trevis.]

St. Andrew: Loc. **14**, on rotting log, *HvM* 216696, ASV 35090.

**Otigonialejeunea huctumalcensis* (Lindenb. & Gottsche) Y.M.Wei, R.L.Zhu & Gradst.

St. Andrew: Loc. **14**, epiphytic, ASV 35109, 35132.

Widely distributed in tropical America, ranging from Mexico to Bolivia and Brazil (including the Cocos and Galápagos Islands); in the West Indies reported from Cuba, Guadeloupe, and Dominica (Reiner-Drehwald & Ilku-Borges, 2007; *Schäfer-Verwimp*, 2010, both as *Lejeunea*).

Paracromastigum bifidum (Steph.) R.M.Schust.

Portland: Loc. **10**, on rocky slope over soil, *HvM* 216546, ASV 34947. **St. Andrew:** Loc. **13**, on soil, *HvM* 216636, ASV 39018; Loc. **14**, on soil, *HvM* 216698, ASV 35134;

Loc. **22**, on rocky slope, ASV 35250. **St. Thomas:** Loc. **31**, on soil, HvM 216891; Loc. **33**, on soil, 1750 m, ASV 35368.

There is a single report of *P. bifidum* subsp. *densum* (Pears.) R.M.Schust., nom. inval., from Jamaica; however, we would refer our specimens to *P. bifidum* (subsp. *bifidum*) and keep it separate from the Brazilian *P. pachyrhizum* (Nees) Fulford until phylogenetic studies may prove its synonymy with the latter species.

Plagiochila aerea Taylor

St. Andrew: Loc. **31**, on shady slope, ASV 35359.

Plagiochila bifaria (Sw.) Lindenb.

St. Andrew: Loc. **13**, on slope, 1500 m, ASV 35056.

Plagiochila cristata (Sw.) Lindenb.

St. Thomas: Loc. **31**, epilithic, HvM 216895, 216896, 216935, ASV 35353 (at 1600 m alt.).

Plagiochila dominicensis Taylor

St. Andrew: Loc. **13**, epiphytic, 1400 m, ASV 35078. **St. Thomas:** Loc. **31**, epiphytic, HvM 216897.

****Plagiochila heterophylla*** Lindenb.

St. Thomas: Loc. **33**, epiphytic in elfin forest, 2250 m, ASV 35404, det. J. Heinrichs.

A widespread neotropical species, ranging from Mexico to Ecuador with a single record from the Dominican Republic; further records are from the British Isles and northwestern France (Heinrichs, 2002). This is the second record of the species for the West Indies.

The specimen was used in a phylogenetic study (Patzak *et al.*, 2016).

Plagiochila patula (Sw.) Lindenb.

Portland: Loc. **9**, on humid slope, ASV 34919, det. J. Heinrichs.

Porella swartziana (F.Weber) Trevis.

St. Thomas: Loc. **31**, on soil, HvM 216905, 216906, ASV 35342.

Prionolejeunea decora (Taylor) Steph.

St. Andrew: Loc. **14**, on tree fern, c. per., ASV 35083/A, on rotting log, ASV 35088/A, on root, ASV 35092, 35135, on bark of tree, c. per., ASV 35117/A, on shady stone, c. per. + andr. (dioicous) + caducous leaves, ASV 35122.

Pycnolejeunea schwaneckei (Steph.) Schiffn. ex P.Syd.

St. Andrew: Loc. **14**, epiphytic, HvM 216703, ASV 35113, 35128, 35152.

St. Thomas: Loc. **33**, epiphytic in cloud forest, 1800-1950 m, ASV 35383/A (with *Leiolejeunea grandiflora*), 35444.

Radula antilleana Castle

Portland: Loc. **9**, on humid slope, ASV 34933. **St. Andrew:** Loc. **13**, on soil, 1270 m, ASV 35020; Loc. **20**, on rocky slope, ASV 35231/A. **St. Thomas:** Loc. **31**, on soil, HvM 216303.

****Radula cubensis*** K.Yamada

Portland: Loc. **12**, on humid slope, numerous caducous leaves, ASV 35012.

A rather scattered neotropical species (Ecuador, Bolivia, Brazil); in the West Indies known only from Cuba (type) and the Dominican Republic (Yamada, 1983; Schäfer-Verwimp & Pócs, 2009).

Radula flaccida Lindenb. & Gottsche

Trelawny: Loc. 1, epiphyllous, ASV 34813/B.

Radula grevilleana Taylor

Portland: Loc. 12, HvM 216586, ASV 34994/A, 35007/A. **St. Andrew:** Loc. 13, 1420 m, ASV 35045/A; Loc. 14, ASV 35130. **St. Thomas:** Loc. 31, 1620 m, ASV 35358; Loc. 33, 1850 m, ASV 35370 – all epiphyllous.

Radula javanica Gottsche

Portland: Loc. 9, on rotting stem, ASV 34923, partly with caducous leaves; Loc. 29, epiphytic, HvM 216296, on shady slope, c. per. + caducous leaves, ASV 35301. **St. Andrew:** Loc. 13, on rock, 1270 m, with caducous leaves, ASV 35022; Loc. 20, epiphytic, HvM 216828, 216829, on dead branch, with caducous leaves, ASV 35235; Loc. 34, on rocky slope, ASV 35461.

Radula mexicana Lindenb. & Gottsche

Portland: Loc. 12, on branchlets, ASV 34965. **St. Andrew:** Loc. 13, on humid rocky slope, 1370-1440 m, ASV 35033, 35048. **St. Thomas:** Loc. 31, on rock, HvM 216301, ASV 35337 – all collections except ASV 35337 c. per. + andr., autoicous.

Radula pallens (Sw.) Nees ex Mont.

St. Andrew: Loc. 13, on slope, 1500 m, c. per., ASV 35075; Loc. 34, on rock, HvM 216955. **St. Thomas:** Loc. 31, on rock, HvM 216300, on soil, 1580 m, c. per., ASV 35348; Loc. 32, on rock, HvM 216306.

Radula quadrata Gottsche

St. Andrew: Loc. 20, epilithic, HvM 216830, ASV 35229.

Radula tectiloba Steph.

Trelawny: Loc. 1, in crown of fallen tree, ASV 34818/B. **Portland:** Loc. 19, on shady wall, ASV 35213/A.

Radula underwoodii Castle

Portland: Loc. 12, on humid slope, ASV 34963; Loc. 18, epilithic, on boulder, HvM 216285, ASV 35179.

Reboulia hemisphaerica (L.) Raddi

St. Andrew: Loc. 15, on rocky steep slope, HvM 216261, 216262, ASV 35161, 35162; Loc. 16, on slope, ASV 35169.

****Rectolejeunea versifolia*** (Schiffn.) L.Söderstr. & A.Hagborg [= *Rectolejeunea berteroana* A.Evans]

Portland: Loc. 18, epiphyllous, ASV 35197/B. **St. Thomas:** Loc. 32, epiphytic, HvM 216307; Loc. 33, epiphytic, 1675 m, ASV 35447.

A widespread neotropical species, in the West Indies known from Puerto Rico (type), Cuba (Reiner-Drehwald & Grolle, 2012), Guadeloupe (Eggers in Eggers *et al.*, 2004), and Dominica (Schäfer-Verwimp, 2010).

Riccardia digitiloba (Spruce) Pagán

St. Andrew: Loc. 22, on soil, HvM 216855, on rocky slope, ASV 35251.

A widespread neotropical species, in the West Indies known from Cuba, Puerto Rico, Dominican Republic, Guadeloupe, Martinique, Dominica (Lavocat-Bernard & Schäfer-Verwimp, 2011; Mustelier Martínez, 2006; Pagán, 1939; Schäfer-Verwimp & Pócs, 2009).

Riccardia fucoidea (Sw.) C.Massal.

Portland: Loc. 12, on humid slope, HvM 216590, ASV 34962. **St. Andrew:** Loc. 13, on slope, 1525 m, ASV 35060; Loc. 14, on shady slope, ASV 35142. **St. Thomas:** Loc. 33, on humid slope, 1880 m, ASV 35373.

Scapania portoricensis Hampe & Gottsche

St. Thomas: Loc. **32**, on soil, *HvM* 216943; Loc. **33**, on shady slope, 1950 m, ASV 35380.

Schiffneriolejeunea polycarpa (Nees) Gradst.

St. Mary: Loc. **7**, on bark of solitary tree, *HvM* 216509, 216440, ASV 34889 (c. per.). **Portland:** Loc. **19**, on bark of solitary tree, *HvM* 216775, ASV 35219 (c. spor.); Loc. **23**, epiphytic at edge of coffee plantation, *HvM* 216786, ASV 35266 (c. per.); Loc. **27**, epiphytic, *HvM* 216811.

Solenostoma callithrix (Lindenb. & Gottsche) Steph.

Portland: Loc. **12**, on soil, ASV 34961. **St. Andrew:** Loc. **13**, on soil, *HvM* 216382, ASV 35030. **St. Thomas:** Loc. **31**, on soil, *HvM* 216881.

Symbiezidium barbiflorum (Lindenb. & Gottsche) A.Evans

Trelawny: Loc. **1**, epiphytic in coffee plantation, ASV 34800 (c. per. + andr.).

St. Andrew: Loc. **14**, epiphytic, *HvM* 216706, ASV 35127 (c. per.). **Portland:** Loc. **18**, epiphyllous, ASV 35196/B.

**Symphyogyna brasiliensis* Nees & Mont.

St. Andrew: Loc. **14**, on soil, *HvM* 216707.

Widespread in tropical America and Africa including the West Indies: Cuba, Guadeloupe, Grenada (Evans, 1927; Mustelier Martínez, 2006; Pagán, 1942).

**Symphyogyna bronniartii* Mont.

Portland: Loc. **12**, on soil, *HvM* 216592; Loc. **18**, on soil, *HvM* 216747.

A widespread tropical American species (Costa Rica to Bolivia and Brazil); in the West Indies known from Cuba, Puerto Rico, Guadeloupe, Dominica, Martinique, St. Lucia, Grenada (Evans, 1925; Pagán, 1939).

Symphyogyna fuscovirens A.Evans

St. Thomas: Loc. **32**, on soil, *HvM* 216377; Loc. **33**, on soil, 1960 m, ASV 35385 (c. spor.).

Symphyogyna sinuata (Sw.) Nees & Mont.

St. Andrew: Loc. **13**, on soil, *HvM* 216649, ASV 35057. **Portland:** Loc. **18**, on humid soil, ASV 35186.

Syzygiella perfoliata (Sw.) Spruce

St. Andrew: Loc. **14**, on soil, *HvM* 216710, at base of tree, ASV 35091 (c. per.); Loc. **34**, on soil, *HvM* 216958, on rocky slope, ASV 35460. **St. Thomas:** Loc. **31**, on rock, 1600 m, ASV 35354; Loc. **32**, on soil, *HvM* 216945.

Syzygiella rubricaulis (Nees) Steph.

St. Thomas: Loc. **32**, on soil, *HvM* 216948; Loc. **33**, on root and epiphytic, 1900-2250 m, ASV 35377/B, 35400/A, 35412, 35427.

Telaranea nematodes (Gottsche ex Austin) M.Howe

St. Andrew: Loc. **13**, on rotting tree fern, 1525 m, ASV 35061/A. **St. Thomas:** Loc. **31**, on rotting root, 1500 m, ASV 35339/A, both c. per.

Trichocolea brevifissa Steph.

St. Andrew: Loc. **13**, epiphytic, *HvM* 216653, on stem of old tree fern, ASV 35044. **St. Thomas:** Loc. **31**, epiphytic, *HvM* 216913, on root, 1540 m, ASV 35341; Loc. **32**, epiphytic, *HvM* 216946.

****Trichocolea floccosa*** Herzog & Hatcher

St. Thomas: Loc. **31**, epilithic, *HvM 216914*, on shady root, 1220 m, ASV 35321.

Portland: Loc. **18**, on shady rock, *HvM 216748*, ASV 35192.

Scattered throughout its neotropical range (Costa Rica, Panama, Colombia, Ecuador), in the West Indies known only from Cuba (Mustelier Martínez, 2012) and Guadeloupe (Jovet-Ast, 1960).

MOSSES

***Acporium estrella*ae** (Müll. Hal.) W.R.Buck & Schäf.-Verw.

Portland: Loc. **10**, epiphytic, *HvM 216380*.

Acporium longirostre (Brid.) W.R.Buck

Portland: Loc. **23**, on rotting log, ASV 35271; Loc. **29**, on node of bamboo, ASV 35302. **St. Thomas:** Loc. **31**, on root, 1220 m, ASV 35320/B – all c. spor.

Acporium pungens (Hedw.) Broth.

Portland: Loc. **12**, *HvM 216273*. **St. Andrew:** Loc. **14**, *HvM 216658*. **St. Thomas:** Loc. **32**, *HvM 216373* – all on soil.

Adelothecium bogotense (Hampe) Mitt.

Portland: Loc. **12**, *HvM 216555*. **St. Thomas:** Loc. **32**, *HvM 216917* – both epiphytic.

Anoectangium euchloron (Schwägr.) Mitt.

St. Andrew: Loc. **13**, on soil, *HvM 216589*; Loc. **21**, on soil, *HvM 216196*, and on limestone, *HvM 216256*, all conf. Sollman, ASV 35240.

Anomodon rostratus (Hedw.) Schimp.

St. Andrew: Loc. **21**, epilithic, *HvM 216831*, ASV 35239; Loc. **22**, on wall, ASV 35247. **St. Thomas:** Loc. **31**, epilithic, on limestone, *HvM 216861*, ASV 35318.

Aongstroemia filiformis (P.Beauv.) Wijk & Marg.

St. Andrew: Loc. **13**, *HvM 216600*, ASV 35050; Loc. **14**, *HvM 216660*, ASV 35134/A. **St. Thomas:** Loc. **33**, ASV 35390 – all on soil.

Aptychella proligera (Broth.) Herzog

St. Thomas: Loc. **33**, hanging from branches in cloud forest, 1950 m, ASV 35379, and epiphytic in elfin forest at summit region, 2240-2250 m, ASV 35401, 35408.

The specimen ASV 35401 was used in a phylogenetic study of the genus *Aptychella* (Akiyama *et al.*, 2015).

Atrichum muelleri Schimp. ex Besch.

St. Andrew: Loc. **13**, on soil, *HvM 216601*, 216629, ASV 35032.

Barbula arcuata Griff.

Portland: Loc. **18**, on wet soil, ASV 35191; Loc. **19**, on soil, *HvM 216200*.

Barbula indica (Hook.) Spreng.

Trelawny: Loc. **2**, on soil, *HvM 216239*. **St. Ann:** Loc. **6**, on soil, *HvM 216249*.

St. Andrew: Loc. **13**, epilithic, *HvM 216197* – all conf. Sollman.

Barbula orizabensis Müll.Hal.

St. Ann: Loc. **4**, on small limestones in garden, ASV 34851. **Portland:** Loc. **9**, on soil, with *Dolotortula mniifolia*, *HvM 216510*, det. Sollman. **St. Andrew:** Loc. **13**, on soil, *HvM 216186*; Loc. **15**, on soil, *HvM 216175*, ASV 35155.

Brachythecium ruderale (Brid.) W.R.Buck

St. Andrew: Loc. **13**, HvM 216602; Loc. **15**, HvM 216714; Loc. **16**, HvM 216721.
Portland: Loc. **19**, HvM 216750. **St. Thomas:** Loc. **31**, HvM 216863, ASV 35325 – all on soil.

Breutelia jamaicensis (Mitt.) A.Jaeger

Portland: Loc. **10**, on soil, HvM 216532; Loc. **30**, on soil, HvM 216816, ASV 35308.

Breutelia tomentosa (Brid.) A.Jaeger

Portland: Loc. **10**, on soil, HvM 216533. **St. Andrew:** Loc. **14**, on soil, HvM 216663.

Brymela websteri (H.A.Crum & Bartr.) W.R.Buck

St. Andrew: Loc. **14**, epiphytic, HvM 216664, ASV 35151.

Bryum argenteum Hedw.

St. Andrew: Loc. **20**, on soil, HvM 216824.

Bryum billarderi Schwägr.

Portland: Loc. **19**, on soil, ASV 35210. **St. Thomas:** Loc. **32**, on soil, HvM 216920.

Bryum lanatum (P.Beauv.) Brid.

St. Andrew: Loc. **22**, epilithic, on concrete, HvM 216841, ASV 35261, on sunny rocky slope, ASV 35245.

Callicostella depressa (Hedw.) A.Jaeger

St. Andrew: Loc. **14**, epiphytic, on rotting wood, HvM 216665.

Callicostella pallida (Hornschr.) Ångstr.

St. Ann: Loc. **6**, on soil, HvM 216476. **Portland:** Loc. **12**, on humid rotting log, ASV 35000/B.

Calliergonella cuspidata (Hedw.) Loeske

Portland: Loc. **10**, on soil, HvM 216534.

Calymperes afzelii Sw.

St. Andrew: Loc. **8**, epiphytic, HvM 216415.

Calymperes cf. guildingii Hook. & Grev.

St. Thomas: Loc. **31**, epiphytic, HvM 216864.

Calymperes palisotii Schwägr.

St. Mary: Loc. **7**, HvM 216500. **Portland:** Loc. **25**, HvM 216790, ASV 35282; Loc. **26**, HvM 216792; Loc. **27**, HvM 216796 – all epiphytic.

Campyliadelphus chrysophyllus (Brid.) R.S.Chopra

Portland: Loc. **10**, epilithic, HvM 216535, on shady wall, ASV 34943.

Campylopus cygneus (Hedw.) Brid.

Portland: Loc. **10**, on soil, HvM 216536, ASV 34949. **St. Andrew:** Loc. **22**, on shady slope, ASV 35260. **St. Thomas:** Loc. **33**, on soil and exposed rock in cloud forest, 2000 m, ASV 35386 (c. spor.), 35436.

Campylopus shawii Wilson in Hunt.

St. Thomas: Loc. **33**, on soil in elfin forest, 2250 m, ASV 35406.

Caribaeohypnum polypterum (Mitt.) Ando & Higuchi

St. Thomas: Loc. **31**, on soil, 1450 m, HvM 216866, ASV 35335/A; Loc. **33**, beside trail in rain forest, 1800 m, c. spor., ASV 35445.

Crossomitrium epiphyllum (Mitt.) Müll.Hal.

Trelawny: Loc. **1**, epiphytic on shrub in coffee plantation, ASV 34802/B. **Portland:** Loc. **24**, epiphyllous, HvM 216788, epiphytic on ornamental shrub, ASV 35277.

Crossomitrium patrisiae (Brid.) Müll.Hal.

Trelawny: Loc. **1**, HvM 216399, ASV 34802/A; Loc. **2**, HvM 216446. **St. Ann:** Loc. **6**, HvM 216492, ASV 34880/A. **St. Andrew:** Loc. **14**, HvM 216674 – all epiphytic.

Cyclodictyon albicans (Hedw.) Kuntze

Portland: Loc. **12**, epilithic, HvM 216560, ASV 34990, on rotting wood, ASV 34999/A; Loc. **18**, epilithic, HvM 216737. **St. Andrew:** Loc. **13**, epilithic, HvM 216606, on soil, 1380 m, ASV 35038. **St. Thomas:** Loc. **31**, on root in rain forest, 1550 m, ASV 35344/B.

Cyclodictyon bicolor (Besch.) Kuntze

Portland: Loc. **12**, on root, ASV 35002.

Cyclodictyon roridum (Hampe) Kuntze

St. Thomas: Loc. **31**, on soil, HvM 216870, 216871, ASV 35345.

Cyclodictyon varians (Sull.) Kuntze

Portland: Loc. **18**, on shady rock in brook, ASV 35185.

Cyrtosmia involvens (Hedw.) W.R.Buck & H.A.Crum

Trelawny: Loc. **3**, on shady limestone, c. spor., ASV 34848. **Portland:** Loc. **9**, epilithic, HvM 216511, ASV 34938; Loc. **18**, on dead wood, c. spor., ASV 35188; Loc. **19**, epilithic, HvM 216753, ASV 35216 (c. spor.); Loc. **28**, epilithic, HvM 216800, at base of tree, c. spor., ASV 35289.

Daltonia longifolia Taylor

Portland: Loc. **12**, epiphytic, HvM 216562. **St. Thomas:** Loc. **33**, epiphytic in elfin forest, c. spor., mixed with *Cheilolejeunea xanthocarpa* and *Brachiolejeunea laxifolia*, ASV 35411/B.

Daltonia stenophylla Mitt.

Portland: Loc. **10**, epiphytic, HvM 216381.

Didymodon australasiae (Hook. & Grev.) R.H.Zander

St. Andrew: Loc. **16**, on soil, HvM 216199.

Diphyscium foliosum (Hedw.) Mohr

St. Thomas: Loc. **33**, on soil, 2050 m, c. spor., ASV 35429.

Ditrichum difficile (Dub.) M.Fleisch.

St. Andrew: Loc. **14**, on soil, HvM 216676. **St. Thomas:** Loc. **33**, on humid slope, 2000 m, c. spor., ASV 35389.

Dolotortula mniifolia (Sull.) R.H.Zander

Portland: Loc. **9**, on soil, HvM 216512, ASV 34921; Loc. **18**, on soil, HvM 216738, on dripping wall, ASV 35190.

Ectropothecium leptochaeton (Schwägr.) W.R.Buck

Trelawny: Loc. **2**, epiphytic, HvM 216449.

Entodon macropodus (Hedw) Müll.Hal.

Portland: Loc. **12**, on soil, HvM 216566, ASV 35014. **St. Andrew:** Loc. **13**, on soil, HvM 21630, on shady wall, c. spor., 1500 m, ASV 35054; Loc. **20**, on rocky slope, ASV 35230; Loc. **21**, on soil, HvM, 216832; Loc. **22**, on soil, HvM 216833, on rocky slope,

c. spor., ASV 35252. Loc. **23**, on soil, HvM 216843. **St. Thomas:** Loc. **31**, on soil, HvM 216874, on rock, c. spor., 1580 m, ASV 35347.

Entosthodon bonplandii (Hook.) Mitt.

St. Andrew: Loc. **14**, on soil, HvM 216677, ASV 35131, both c. spor.

Epipterygium wrightii (Sull.) Lindb.

Portland: Loc. **9**, HvM 216513, ASV 34935; Loc. **23**, HvM 216778, ASV 35272.

St. Andrew: Loc. **13**, HvM 216608, ASV 35027 – all on soil.

Erpodium domingense (Spreng.) Brid. ex Müll.Hal.

St. Ann: Loc. **4**, epiphytic, HvM 216470, c. spor., ASV 34857. **St. Andrew:** Loc. **8**, epiphytic, HvM 216419, c. spor., ASV 34913; Loc. **17**, epiphytic, HvM 216731, c. spor., ASV 35176. **Portland:** Loc. **23**, epiphytic, HvM 216787; Loc. **25**, on concrete wall in town, HvM 216791, c. spor., ASV 35280; solitary tree along road A 4 at western edge of Hope Bay, ASV 35275.

Eulacophyllum cultelliforme (Sull.) W.R.Buck & Irel.

St. Andrew: Loc. **8**, epiphytic, HvM 216420, on shady stone, ASV 34897; Loc. **17**, epiphytic, HvM 216732.

Eurhynchium clinocarpum (Taylor) Paris

Portland: Loc. **12**, on shady stone, ASV 34983/B.

Fabronia ciliaris (Brid.) Brid. var. *polycarpa* (Hook.) W.R.Buck

St. Andrew: Loc. **15**, epilithic, HvM 216715, on root, ASV 35159/A; Loc. **22**, limestone rock, HvM 216844.

Fabronia ciliaris var. *wrightii* (Sull.) W.R.Buck

St. Andrew: Loc. **17**, epiphytic, HvM 216733, ASV 35171; Loc. **21**, epiphytic, HvM 216834; Loc. **22**, epiphytic, HvM 216845.

Fabronia macroblepharis Schwägr.

Portland: Loc. **9**, epilithic, HvM 216514, ASV 34930.

Fissidens angustelimbatus Mitt.

Portland: Loc. **9**, on soil, with *Fissidens serratus*, HvM 216515, det. Bruggeman-Nannenga.

Fissidens angustifolius Sull.

Trelawny: Loc. **1**, on soil, HvM 216181, det. Bruggeman-Nannenga.

Fissidens asplenoides Hedw.

Portland: Loc. **10**, HvM 216538; Loc. **18**, HvM 216949. **St. Andrew:** Loc. **11**, HvM 216609; Loc. **13**, HvM 216722; Loc. **16**, HvM 216742 – all on soil.

Fissidens crispus Mont.

St. Andrew: Loc. **15**, on soil, HvM 216716; Loc. **17**, on soil, ASV 35172; Loc. **34**, on soil, HvM 216183, on rocky slope, ASV 35463. **Portland:** Loc. **18**, on soil, HvM 216182, on irrigated wall, ASV 35189, det. Bruggeman-Nannenga.

Fissidens dissitifolius Sull.

St. Mary: Loc. **7**, epilithic, HvM 216201, conf. Bruggeman-Nannenga.

Fissidens flaccidus Mitt.

St. Andrew: Loc. **11**, epilithic, HvM 216194; **Portland:** Loc. **18**, epilithic, HvM 216185, submerged on rock in brook, ASV 35183, all det. Bruggeman-Nannenga.

Fissidens pallidinervis Mitt.

Trelawny: Loc. 2, epilithic, on shaded limestone rock, HvM 216189, det. Bruggeman-Nannenga.

Fissidens palmatus Hedw.

Portland: Loc. 9, on soil, HvM 216516, det. Bruggeman-Nannenga, ASV 34929.

Fissidens polypodioides Hedw.

Portland: Loc. 12, HvM 216187. **St. Andrew:** Loc. 13, HvM 216610. **St. Thomas:** Loc. 31, HvM 216875; Loc. 32, HvM 216923 – all on soil.

Fissidens serratus Müll.Hal.

Portland: Loc. 9, on soil, admixed to *Fissidens angustelimbatus*, HvM 216515 p.p., det. Bruggeman-Nannenga.

Fissidens taylorii Müll.Hal.

St. Andrew: Loc. 8, on soil, HvM 216193, det. Bruggeman-Nannenga.

Fissidens weiri Mitt.

St. Andrew: Loc. 34, on soil, HvM 216198, conf. Bruggeman-Nannenga.

Fissidens yucatanensis Steere

St. Ann: Loc. 4, on soil, HvM 216190, conf. Bruggeman-Nannenga.

Fissidens zollingerii Mont.

St. Andrew: Loc. 11, on soil, HvM 216191, det. Bruggeman-Nannenga.

Groutiella mucronifolia (Hook. & Grev.) H.A.Crum & Steere

Portland: Loc. 10, epiphytic, HvM 216539.

Gymnostomiella vernicosa (Hook. ex Harv.) M.Fleisch.

St. Andrew: Loc. 15, epilithic, HvM 216717, ASV 35158.

Haplocladium microphyllum (Hedw.) Broth.

Trelawny: Loc. 3, HvM 216465, ASV 34845. **St. Mary:** Loc. 7, HvM 216505. **St. Andrew:** Loc. 15, HvM 216718. **Portland:** Loc. 28, HvM 216802. **St. Thomas:** Loc. 31, HvM 216877 – all on soil.

Helicodontium capillare (Hedw.) A.Jaeger

Trelawny: Loc. 2, on shaded limestone rock, HvM 216452, ASV 34826/A; Loc. 3, on concrete wall, HvM 216466; Albert town, exposed limestone in urban area, ASV 34823.

St. Ann: Loc. 5, epiphytic, HvM 216481. **St. Andrew:** Loc. 8, on limestone rock, HvM 216423; Loc. 21, on rock, HvM 216837. **Portland:** Loc. 9, on soil, HvM 216517, on concrete wall, c. spor., ASV 34937; Loc. 19, epiphytic, HvM 216763; Loc. 23, epiphytic, HvM 216781.

St. Thomas: Loc. 31, on roots, HvM 216878.

Helicophyllum torquatum (Hook.) Brid.

St. Andrew: Loc. 17, epilithic, on boulder, HvM 216734, ASV 35173. **Portland:** Loc. 22, on boulder, HvM 216851.

Henicodium geniculatum (Mitt.) W.R.Buck

Trelawny: Loc. 1, epiphytic, HvM 216400.

Holomitrium calycinum (Hedw.) Mitt.

St. Andrew: Loc. 14, epiphytic, HvM 216681, ASV 35082. **St. Thomas:** Loc. 33, on tree stump in rain forest, 1900 m, c. spor., ASV 35376.

Homalia glabella (Hedw.) Schimp.

Portland: Loc. 12, HvM 216568. **St. Andrew:** Loc. 14, HvM 216682. **St. Thomas:** Loc. 31, HvM 216879 – all epiphytic.

Homaliodendron flabellatum (Sm.) M.Fleisch.

St. Thomas: Loc. 32, epiphytic, HvM 216374.

Hydrogonium gregarium (Mitt.) Kučera [= *Barbula indica* var. *gregaria* (Mitt.) R.H.Zander]

Trelawny: Loc. 2, on calcareous rocky slope, ASV 34827/A.

Hymenodon reggaeus Kartt. & S.Bäck

St. Andrew: Loc. 13, epiphytic, HvM 216612, at base of tree fern, ASV 35040; Loc. 14, on stem of tree fern, ASV 35084. **Portland:** Loc. 29, epiphytic, HvM 216815, ASV 35305. **St. Thomas:** Loc. 31, epiphytic, HvM 216880; Loc. 33, on humus over rock in rain forest, 1700 m, ASV 35365.

Hymenostylium recurvirostrum (Hedw.) Dix.

Trelawny: Loc. 1, on soil, HvM 216401. **Portland:** Loc. 10, on shady wall, ASV 34942. **St. Andrew:** Loc. 13, on soil, HvM 216631; Loc. 17, on shady rock, HvM 216174, det. Sollman, ASV 35174.

Hyophila involuta (Hook.) A.Jaeger

Trelawny: Loc. 1, on soil, HvM 216402; Loc. 2, on limestone rock, HvM 216240; Loc. 3, on concrete wall, HvM 216243. **St. Ann:** Loc. 4, on brick wall, HvM 216246; Loc. 9, on wet limestone wall, HvM 216540. **Portland:** Loc. 18, on limestone rock, HvM 216255; Loc. 25, on soil, HvM 216258.

Hyophiladelphus agrarius (Hedw.) R.H.Zander

Trelawny: Loc. 2, epilithic, on shaded limestone rock, with *Barbula indica* and *Hyophila involuta*, HvM 216203.

Hypopterygium tamarisci (Sw.) Brid.

St. Andrew: Loc. 13, on soil, HvM 216276.

Isodrepanium lentulum (Wilson) E.Britton

St. Andrew: Loc. 13, epiphytic, HvM 216613, 216632, on shrub in summit region, 1525 m, ASV 35072.

Isopterygium jamaicense (E.B.Bartram) W.R.Buck

Portland: Loc. 29, epiphytic, HvM 216381.

Isopterygium subbrevisetum (Hampe) Broth.

Trelawny: Loc. 2, at base of tree, ASV 34840/B. **Portland:** Loc. 28, epiphytic, HvM 216803.

Leiomela bartramoides (Hook.) Par.

St. Andrew: Loc. 13, on soil, HvM 216614.

Lepidopilum muelleri (Hampe) Hampe

Portland: Loc. 12, epiphytic, HvM 216569, ASV 35015, both c. spor.

Note: Determination follows Allen (2010); Buck (1998) included *L. muelleri* from the West Indies in *L. scabrisetum*.

Lepidopilum tortifolium Mitt.

Portland: Loc. 12, epilithic, HvM 216570, ASV 35003, on humid rotten log, ASV 34999/B.

Leptodontium viticulosoides (P.Beauv.) Wijk & Marg. var. *panamense* (Lor.) R.H.Zander

St. Thomas: Loc. 33, on sunny slope, 2000 m, ASV 35437.

**Leptophascum leptophyllum* (Müll.Hal.) J.Guerra & M.J.Cano
[= *Chenia leptophylla* (Müll.Hal.) R.H.Zander]

St. Andrew: Loc. 16, on soil, HvM 216727. **St. Thomas:** Loc. 31, on soil in urban area, 1220 m, HvM 216893, ASV 35317.

Nearly cosmopolitan in range (Arts & Sollman, 1991, as *Phascum leptophyllum*) but previously not reported from the West Indies.

Lepyrodontopsis trichophylla (Sw. ex Hedw.) Broth.

Portland: Loc. 10, on soil, HvM 216542, on humid rocky slope, ASV 34946; Loc. 12, on soil, HvM 216571. **St. Andrew:** Loc. 13, on soil, HvM 216617, 216633.

Leskeodon auratus (Müll.Hal.) Broth.

St. Andrew: Loc. 13, epiphytic, on rotting wood, HvM 216618, ASV 35066.

Leucobryum albidum (Brid.) Lindb.

St. Mary: Loc. 7, epiphytic, HvM 216426.

Leucobryum antillarum Schimp. ex Besch.

St. Andrew: Loc. 34, on shady rocky slope, ASV 35458.

Leucobryum giganteum Müll.Hal.

St. Andrew: Loc. 14, on soil, HvM 216684, ASV 35105.

Leucobryum martianum (Hornschr.) Hampe ex Müll.Hal.

St. Andrew: Loc. 13, 14, epiphytic, on rotting wood, HvM 216619, 216685.

Leucobryum polakowskyi (Müll.Hal. ex Besch.) Card.

St. Andrew: Loc. 8, epiphytic, HvM 216427, in lawn and at base of fern, ASV 34901.

Leucoloma cruegerianum (Müll.Hal.) A.Jaeger

Portland: Loc. 12, HvM 216572, ASV 34979. **St. Andrew:** Loc. 13, HvM 216620, ASV 35051; Loc. 14, HvM 216634, 216686. **St. Thomas:** Loc. 32, HvM 216926 – all epiphytic.

Leucomium strumosum (Hornschr.) Mitt.

Portland: Loc. 12, epiphytic, HvM 216573.

Macromitrium cirrosum (Hedw.) Brid.

St. Andrew: Loc. 14, epiphytic, HvM 216687.

Macromitrium richardii Schwägr.

St. Andrew: Loc. 22, on rock, c. spor., ASV 35254.

Macromitrium schwaneckeanum Hampe

Portland: Loc. 10, on rock, c. spor., ASV 34944; Loc. 12, epilithic, HvM 216575, ASV 34981 (c. spor.). **St. Thomas:** Loc. 33, on exposed rock, 2000 m, c. spor., ASV 35388. **St. Andrew:** Loc. 34, on exposed rock, HvM 216951, ASV 35468.

Meteoriidium remotifolium (Müll.Hal.) Mitt.

Portland: Loc. 12, HvM 216578; Loc. 19, HvM 216764. **St. Thomas:** Loc. 32, HvM 216927 – all epiphytic.

Meteoriidium deppei (Hornschr. ex Müll.Hal.) Mitt.

Portland: Loc. 10, on soil, HvM 216272; Loc. 12, on soil, HvM 216579. **St. Andrew:** Loc. 13, epiphytic at summit region, 1500 m, ASV 35074; Loc. 14, on soil, HvM 216689; Loc. 20, on soil, HvM 216826. **St. Thomas:** Loc. 32, on soil, HvM 216928.

Meteoriump nigrescens (Sw. ex Hedw.) Dozy & Molk. [= *Papillaria nigrescens* (Sw. ex Hedw.) A.Jaeg.]

Trelawny: Loc. **1**, *HvM* 216406. **Portland:** Loc. **19**, *HvM* 216429, 216765. **St. Thomas:** Loc. **32**, *HvM* 216929 – all epiphytic. **St. Andrew:** Loc. **34**, on concrete wall, ASV 35467.

Mittenothamnium reptans (Hedw.) Card.

St. Thomas: Loc. **32**, epiphytic, *HvM* 216932.

Mittenothamnium substriatum (Mitt.) Card.

Portland: Loc. Loc. **19**, epilithic, *HvM* 216766, on shady earth covered wall, ASV 35217.

Neckeropsis disticha (Hedw.) Kindb.

Trelawny: Loc. **1**, *HvM* 216407. **Portland:** Loc. **27**, *HvM* 216797; Loc. **28**, *HvM* 216807 – all epiphytic.

Neckeropsis undulata (Hedw.) Reichardt

Portland: Loc. **18**, *HvM* 216744; Loc. **19**, *HvM* 216767. **St. Andrew:** Loc. **21**, *HvM* 216839 – all epiphytic.

Octoblepharum albidum Hedw.

Portland: Loc. **18**, epiphytic, *HvM* 216768.

Octoblepharum erectifolium Mitt.

St. Andrew: Loc. **13**, epiphytic, *HvM* 216623; Loc. **14**, on rotting wood, *HvM* 216695, ASV 35119.

Orthostichopsis tetragona (Hedw.) Broth.

Trelawny: Loc. **1**, epiphytic, ASV 34814.

Palamocladium leskeoides (Hook.) E.Britton

St. Andrew: Loc. **13**, on soil, *HvM* 216635. **St. Thomas:** Loc. **31**, on soil, *HvM* 216889, 216890.

Philonotis elongata (Dism.) H.A.Crum & Steere

Portland: Loc. **28**, on soil, *HvM* 216814, ASV 35295.

Philonotis sphaericarpa (Hedw.) Brid.

St. Andrew: Loc. **11**, on soil, ASV 34956.

Philonotis uncinata (Schwägr.) Brid. [incl. *var. *gracillima* (Ångstr.) Florsch.]

Trelawny: Loc. **2**, *HvM* 216457, *ASV34827/B. **Portland:** Loc. **9**, *HvM* 216522, *ASV 34936; Loc. **23**, *HvM* 216785; Loc. **24**, *HvM* 216789. **St. Andrew:** Loc. **15**, *HvM* 216547, *ASV 35156; Loc. **16**, *HvM* 216719, **HvM* 216728 – all on soil.

Phylogonium fulgens (Hedw.) Brid.

Portland: Loc. **10**, *HvM* 216548. **St. Andrew:** Loc. **13**, *HvM* 216638; Loc. **14**, *HvM* 216699. **St. Thomas:** Loc. **32**, *HvM* 216934 – all epiphytic.

Phylogonium viride Brid.

Portland: Loc. **10**, epiphytic, *HvM* 216277. **St. Andrew:** Loc. **13**, epiphytic, *HvM* 216639; Loc. **34**, epiphytic, *HvM* 216954, on shady rocky slope, with *Cheilolejeunea filiformis*, ASV 35466/A.

Pilopogon guadalupensis (Brid.) J.-P.Frahm

St. Thomas: Loc. **33**, on soil in summit region, c. spor., 2250 m, ASV 35421.

Pilotrichella flexilis (Hedw.) Ångstr.

Portland: Loc. **10**, epiphytic, *HvM* 216549. **St. Thomas:** Loc. **31**, epiphytic, *HvM* 216894.

Pilotrichidium callicostatum (Müll.Hal.) A.Jaeger

Portland: Loc. **12**, on rotten wood, *HvM* 216380.

Pilotrichum bipinnatum (Schwägr.) Brid.

Portland: Loc. **12**, epiphytic, *HvM* 216582, ASV 34991.

Plagiomnium rhynchophorum (Harv.) T.J.Kop.

Portland: Loc. **12**, *HvM* 216584. **St. Andrew:** Loc. **13**, *HvM* 216642. **St. Thomas:** Loc. **31**, *HvM* 216899 – all on soil.

Plagiothecium drepanophyllum Ren. & Card.

St. Thomas: Loc. **31**, on soil, *HvM* 216900, 216901, ASV 35349.

Plaubelia sprengelii (Schwägr.) R.H.Zander

Trelawny: Loc. **2**, on limestone, *HvM* 216188. **St. Ann:** Loc. **4**, on shady limestone, ASV 34853. **St. Mary:** Loc. **7**, on limestone, *HvM* 216250.

Pogonatum procerum (Lindb.) Schimp.

St. Thomas: Loc. **31**, on soil, *HvM* 216937, ASV 35360; Loc. **32**, on soil, *HvM* 216938.

Pogonatum tortile (Sw.) Brid.

St. Andrew: Loc. **13**, *HvM* 216643, ASV 35025; Loc. **14**, *HvM* 216702. **St. Thomas:** Loc. **31**, *HvM* 216902, 216903 – all on soil.

Pohlia papillosa (Müll.Hal.) Broth.

St. Mary: Loc. **7**, on soil, ASV 34893. **Portland:** Loc. **12**, on road cut, c. spor., ASV 34960. **St. Thomas:** Loc. **31**, on soil, *HvM* 216904.

Porotrichodendron lindigii (Hampe) W.R.Buck

Portland: Loc. **12**, epiphytic, *HvM* 216263; Loc. **18**, epiphytic, *HvM* 216745. **St. Andrew:** Loc. **20**, on dead branch, ASV 35233.

Porotrichum mutabile Hampe

St. Thomas: Loc. **33**, epiphytic in rain forest, 1675 m, ASV 35446.

Prionodon densus (Hedw.) Müll.Hal.

St. Andrew: Loc. **13**, *HvM* 216656; Loc. **20**, *HvM* 216827, ASV 35231. **St. Thomas:** Loc. **32**, *HvM* 216939 – all epiphytic.

Pseudocryphaea domingensis (Spreng.) W.R.Buck

Trelawny: Loc. **1**, epiphytic in coffee plantation, ASV 34821.

Pseudoscleropodium purum (Hedw.) M.Fleisch. ex Broth.

St. Andrew: Loc. **13**, on soil, *HvM* 216644.

Pseudosymbularia schimperiana (Par.) H.A.Crum

St. Andrew: Loc. **21**, on shady rock, ASV 35241.

Pterogonidium pulchellum (Hook.) Müll.Hal.

St. Andrew: Loc. **8**, *HvM* 216432, ASV 34900, 34914/A. **Portland:** Loc. **12**, *HvM* 216433; Loc. **28**, *HvM* 216810, ASV 35288. **St. Thomas:** Loc. **31**, ASV 35339/B – all epiphytic.

Pyrrhobryum spiniforme (Hedw.) Mitt.

Portland: Loc. 12, on soil, HvM 216586. **St. Thomas:** Loc. 32, on soil, HvM 216940.

Racopilum tomentosum (Hedw.) Brid.

Trelawny: Loc. 1, on soil, HvM 216409. **St. Ann:** Loc. 4, on roots, HvM 216475. **St. Mary:** Loc. 7, on roots, HvM 216434. **Portland:** Loc. 9, on soil, HvM 216525; Loc. 18, on soil, HvM 216746.

**Rauiella praelonga* (Schimp. ex Besch.) Wijk & Margad.

St. Andrew: Loc. 22, epilithic, on boulder, HvM 216291.

A widespread species known from the southwestern United States and Mexico to Argentina, eastern and southern Africa; in the West Indies known only from two collections, one from Cuba and one from Haiti (Buck, 1998).

Rhamphidium dicranoides (Müll.Hal.) Par.

Portland: Loc. 12, on rocky slope, ASV 34969. **St. Andrew:** Loc. 13, on soil, HvM 216655, ASV 35018/A.

Rhodobryum grandifolium (Taylor) Schimp.

Portland: Loc. 19, HvM 216773. **St. Thomas:** Loc. 31, HvM 216907; Loc. 32, HvM 216376 – all on soil.

Rhynchostegiopsis flexuosa (Sull.) Müll.Hal.

Portland: Loc. 12, epiphytic, HvM 216589, ASV 34986, on rotting wood, ASV 35000/A. **St. Andrew:** Loc. 13, on rotting wood, ASV 35068; Loc. 14, on rotten wood, ASV 35085. **St. Thomas:** Loc. 32, on rotting wood, HvM 216941.

Rhynchostegium serrulatum A.Jaeg. & Sauerb.

St. Andrew: Loc. 13, on slope, c. spor., ASV 35019. **St. Thomas:** Loc. 31, epiphytic, HvM 216908, on root in rain forest, 1550 m, ASV 35344/A.

Schlottheimia jamesonii (Arnott) Brid.

St. Thomas: Loc. 33, on tree fern in cloud forest, c. spor., 2000 m, ASV 35433.

Schlottheimia rugifolia (Hook.) Schwägr.

Portland: Loc. 10, epiphytic, HvM 216551. **St. Andrew:** Loc. 34, epiphytic, HvM 216956, on partially exposed rock, c. spor., ASV 35457.

Schlottheimia tecta Hook.f. & Wilson

St. Andrew: Loc. 14, epiphytic, HvM 216704.

Schoenobryum julaceum Dozy & Molk.

Trelawny: Loc. 1, HvM 216410, ASV 34808/B; Loc. 2, ASV 34836; Loc. 3, ASV 34849/B. **St. Ann:** Loc. 6, HvM 216498, ASV 34883, 34885 – all c. spor. and epiphytic.

Note: Following Álvarez & León Vargas (2013) there is only one species of *Schoenobryum* in the Neotropics which has to be called *S. julaceum*.

Sematophyllum adnatum (Michx.) E.Britton

Trelawny: Loc. 1, HvM 216411; Loc. 2, HvM 216379, 216458a. **St. Andrew:** Loc. 22, HvM 216856. **St. Thomas:** Loc. 31, HvM 216910 – all epiphytic.

Sematophyllum galipense (Müll.Hal.) Mitt.

St. Ann: Loc. 6, epiphytic, HvM 216499. **St. Andrew:** Loc. 8, epiphytic, HvM 216436; Loc. 22, epiphytic, HvM 216857. **Portland:** Loc. 23, on humid soil, c. spor., ASV 35274. **St. Thomas:** Loc. 33, on rock in rain forest, 2050 m, ASV 35430/B.

Sematophyllum subpinnatum (Brid.) E.Britton

Trelawny: Loc. 2, HvM 216459. **St. Ann:** Loc. 5, HvM 216488. **St. Andrew:** Loc. 8, HvM 216441. **Portland:** Loc. 19, HvM 216776; Loc. 24, ASV 35276; Loc. 29, ASV 35303/A. **St. Thomas:** Loc. 32, HvM 216944 – all epiphytic.

Sematophyllum swartzii (Schwägr.) Welch & H.A.Crum

St. Andrew: Loc. 13, HvM 216647; Loc. 34, HvM 216957. **St. Thomas:** Loc. 31, HvM 216911 – all epiphytic.

Sphagnum meridense (Hampe) Müll.Hal.

St. Thomas: Loc. 33, on floor in rain forest, 1700 m, ASV 35367.

Squamidium leucotrichum (Taylor) Broth.

St. Andrew: Loc. 14, epiphytic, HvM 216705.

Squamidium nigricans (Hook.) Broth.

St. Andrew: Loc. 13, epilithic, HvM 216648, on shady wall, 1500 m, ASV 35055; Loc. 21, epilithic, HvM 216840, on concrete wall, ASV 35242.

Steereobryon subulirostrum (Schimp.) G.L.Sm.

St. Thomas: Loc. 31, on shady earth cut, 1230 m, ASV 35323.

Stereophyllum radiculosum (Hook.) Mitt.

St. Ann: Loc. 4, on root, ASV 34858. **St. Andrew:** Loc. 17, epilithic, on a boulder, HvM 216735.

Syrrhopodon gaudichaudii Mont.

St. Andrew: Loc. 14, epiphytic, HvM 216708.

Syrrhopodon incompletus Schwägr. var. *incompletus*

Trelawny: Loc. 1, epiphytic, HvM 216412. **St. Andrew:** Loc. 8, epiphytic, HvM 216438, ASV 34899.

Syrrhopodon incompletus var. *berteroanus* (Brid.) Reese

Portland: Loc. 12, epiphytic, HvM 216593, ASV 34993.

Syrrhopodon lycopodioides (Sw.) Müll.Hal.

St. Andrew: Loc. 13, epiphytic, HvM 216650. **St. Thomas:** Loc. 33, epiphytic in rain forest, 1950 m, ASV 35382, and in elfin forest at summit region, 2250 m, ASV 35417.

Syrrhopodon parasiticus (Brid.) Besch.

Trelawny: Loc. 1, on shrub in coffee plantation, c. spor., ASV 34803. **St. Ann:** Loc. 6, epiphytic, c. spor., ASV 34881. **Portland:** Loc. 29, epiphytic, ASV 35303/B.

Syrrhopodon prolifer Schwägr. var. *prolifer*

Portland: Loc. 12, epiphytic, HvM 216594. **St. Andrew:** Loc. 13, epiphytic, HvM 216651.

Syrrhopodon prolifer var. *tenuifolius* (Sull.) Reese

St. Andrew: Loc. 14, epiphytic, HvM 216709, on rotting wood, ASV 35121.

Taxiphyllum taxirameum (Mitt.) M.Fleisch.

Portland: Loc. 9, HvM 216529, ASV 34915; Loc. 10, HvM 216552. **St. Andrew:** Loc. 13, HvM 216652, ASV 35081 – all on soil.

Taxithelium planum (Brid.) Mitt.

Trelawny: Loc. 1, epiphytic, HvM 216413. **St. Andrew:** Loc. 8, epiphytic, HvM 216439, ASV 34905.

Thamnobryum fasciculatum (Sw. ex Hedw.) I.Sastre

Portland: Loc. 12, on soil, HvM 216596, on rock, ASV 34992.

Thuidium urceolatum Lorentz

Trelawny: Loc. 2, on soil, HvM 216460. **Portland:** Loc. 9, on soil, HvM 216530; Loc. 10, on soil, HvM 216553; Loc. 12, on soil, HvM 216597. **St. Andrew:** Loc. 34, on concrete wall, ASV 35464.

Toloxis impondorosa (Taylor) W.R.Buck

St. Andrew: Loc. 22, on boulder, HvM 216859. **St. Thomas:** Loc. 31, on rock, ASV 35335/B.

Tortella humilis (Hedw.) Jennings

St. Thomas: Loc. 31, epilithic, on boulder, HvM 216260.

Trachypus viridulus (Mitt.) Broth.

St. Thomas: Loc. 33, on rock in rain forest, 2050 m, ASV 35430/A.

Trichosteleum sentosum (Sull.) A.Jaeger

Portland: Loc. 12, on rotting wood, ASV 35000/C.

Trichostomum brachydontium Bruch

Portland: Loc. 12, on shady rock, ASV 35013. **St. Thomas:** Loc. 32, on soil, HvM 216202.

Vesicularia vesicularis (Schwägr.) Broth.

Trelawny: Loc. 1, on soil, HvM 216414; Loc. 2, epiphytic, HvM 216461. **Portland:** Loc. 10, on soil, HvM 216554; Loc. 18, on shaded boulder, HvM 216749; Loc. 28, on bark, HvM 216812.

Weissia controversa Hedw.

St. Andrew: Loc. 21, on soil, HvM 216257.

Weissia jamaicensis (Mitt.) Grout

Trelawny: Loc. 1, on soil, HvM 216238; Loc. 2, on limestone, HvM 26242. **St. Ann:** Loc. 4, on limestone wall, ASV 34852/A; Loc. 5, on soil, HvM 216247. **Portland:** Loc. 9, on limestone, HvM 216253. **St. Andrew:** Loc. 11, on rock, HvM 216251; Loc. 13, on shaded brick wall, HvM 216254. **St. Thomas:** Loc. 31, on soil, HvM 216261.

Wijkia flagellifera (Broth.) H.A.Crum

St. Thomas: Loc. 33, on rotting wood in rain forest, ASV 35441.

Zelometeoriumpatulum (Hedw.) Manuel

Trelawny: Loc. 2, HvM 216462. **St. Ann:** Loc. 5, HvM 216487. **Portland:** Loc. 9, HvM 216531; Loc. 29, ASV 35304 – all epiphytic.

DISCUSSION

As outlined by Söderström *et al.* (2011), the most significant liverwort collections of Jamaica remain those of Swartz in 1783, Evans in 1903 and Schuster in 1967. It is therefore not surprising that we now report 53 species of liverworts and two species of hornworts as new to the island (see Table 1). Eight of these represent new records for the West Indies and an additional three species are new to

the Greater Antilles. One genus of hornworts and five genera of liverworts are firstly recorded for Jamaica: *Notothylas*, *Alobiellopsis*, *Colura*, *Fossombronia*, *Jensenia*, and *Otigonirolejeunea*. The number of liverwort and hornwort species raised from 314 (Söderström *et al.*, 2011) to 369 species, reaching now nearly the 377 species so far known from Cuba (Pócs, 1988), and considerably surpassing the number of known liverworts and hornworts from the Dominican Republic (250 species; Schäfer-Verwimp & Pócs, 2009; Frahm, 2012).

Table 1. Species new to Jamaica; * = new to the Greater Antilles; ** = new to the West Indies

Hornworts	
<i>Notothylas breutelii</i>	** <i>Jensenia wallisii</i>
<i>Phaeoceros carolinianus</i>	<i>Lejeunea aphanes</i>
	<i>Lejeunea bermudiana</i>
	<i>Lejeunea cancellata</i>
Liverworts	
* <i>Acrobolbus antillanus</i>	<i>Lejeunea caulicalyx</i>
<i>Adelanthus carabensis</i>	<i>Lejeunea controversa</i>
<i>Alobiellopsis dominicensis</i>	<i>Lejeunea laeta</i>
<i>Ceratolejeunea rubiginosa</i>	<i>Lejeunea paucidentata</i>
** <i>Cheirolejeunea aneogyna</i>	<i>Lejeunea sporadica</i>
<i>Cheirolejeunea inflexa</i>	* <i>Lejeunea tapajosensis</i>
<i>Cheirolejeunea ovalis</i>	** <i>Leptolejeunea convexistipa</i>
<i>Cheirolejeunea quinquecarinata</i>	<i>Leptoscyphus amphibolius</i>
<i>Cheirolejeunea trifaria</i>	** <i>Metzgeria attenuata</i>
<i>Cheirolejeunea unciloba</i>	<i>Metzgeria crassipilis</i>
<i>Cololejeunea diaphana</i>	** <i>Metzgeria scyphigera</i>
<i>Cololejeunea sintenisii</i>	<i>Microlejeunea colombiana</i>
** <i>Cololejeunea papilliloba</i>	<i>Microlejeunea diversiloba</i>
<i>Cololejeunea subcardiocarpa</i>	<i>Microlejeunea epiphylla</i>
<i>Colura calytrifolia</i>	<i>Nowellia wrightii</i>
<i>Colura rhynchophora</i>	<i>Otigonirolejeunea huctumalcensis</i>
<i>Colura tenuicornis</i>	<i>Plagiochila heterophylla</i>
<i>Colura tortifolia</i>	<i>Radula cubensis</i>
<i>Diplasirolejeunea grolleana</i>	<i>Rectolejeunea versifolia</i>
<i>Drepanolejeunea araucariae</i>	<i>Riccardia digitiloba</i>
<i>Drepanolejeunea submurmicata</i>	<i>Symphyogyna brasiliensis</i>
* <i>Drepanolejeunea valiae</i>	<i>Symphyogyna brongniartii</i>
<i>Fossombronia porphyrorhiza</i>	<i>Trichocolea floccosa</i>
<i>Frullania convoluta</i>	
** <i>Frullania dulimensis</i>	** <i>Leptophascum leptophyllum</i>
<i>Fuscocephaloziopsis catenulata</i>	<i>Rauiella praelonga</i>
Mosses	

To the most remarkable finds belong *Acrobolbus antillanus*, *Cheirolejeunea ovalis*, *Ch. quinquecarinata*, *Diplasirolejeunea grolleana*, *Drepanolejeunea valiae*, *Frullania dulimensis*, *Fuscocephaloziopsis catenulata*, *Harpalejeunea reflexula*, *Jensenia wallisii*, *Leirolejeunea grandiflora*, *Lejeunea paucidentata*, *Metzgeria scyphigera*, and *Nowellia wrightii*. Two of these, *Harpalejeunea reflexula* and *Leirolejeunea grandiflora*, have so far been known only from the type collections from Jamaica made more than 100 years ago. *Frullania dulimensis* has been known only from the type from Colombia and was discovered in the elfin forest at summit region of the Blue Mountain Peak. Further remarkable species found only in the undisturbed rain and elfin forests around Portland Gap and from there up to the Blue Mountain Peak are *Acrobolbus antillanus*, *Adelanthus carabensis*, *A. pittieri*, *Brachiolejeunea laxifolia*, *Cheirolejeunea quinquecarinata*, *Cololejeunea sicifolia*

subsp. jamaicensis, *C. spathulata*, *Colura calyptrifolia*, *Drepanolejeunea araucariae*, *D. fragilis*, *D. valiae*, *Frullania convoluta*, *Fuscocephaloziopsis crassifolia*, *Herbertus juniperoides* subsp. *acanthelius* and subsp. *pensilis*, *Isotachis multiceps*, *Leioblejeunea grandiflora*, *Lepidozia cupressina*, *L. patens*, *Leptoscyphus amphibolioides*, *Metzgeria attenuata*, *M. leptoneura*, *M. procera*, *Microlejeunea colombiana*, *Plagiochila heterophylla*, *Scapania portoricensis*, *Szygiella rubricaulis*, and among the mosses *Aptychella proligera*, *Campylopus cygneus*, *C. shawii*, *Ditrichum difficile*, *Daltonia longifolia*, *Leptodontium viticulosoides* var. *panamense*, *Pilopogon guadalupensis*, *Sphagnum meridense*, *Trachypus viridulus*, and *Wijkia flagellifera*.

Surprisingly, for some species frequently found by us as for example *Colura tortifolia* and *Fossombronia porphyrorhiza* records in literature are missing, even for the whole genus *Colura* of which we report four species. On the other hand, such conspicuous species as *Bryopteris filicina*, *Plagiochila adianthoides*, and others could not be relocated though searched for. This may be due to the great loss of forests in large parts of the Blue Mountains area where the southern slopes are nearly completely cleared; however, these species and others not found by us may still occur in forests on the currently hardly accessible steep northern slopes of the Blue Mountains.

We present here the first floristic list of liverworts and hornworts from Jamaica based on the occurrence in parishes as it earlier was done by Crum & Bartram (1958) for the mosses. Only six of the fourteen parishes have been visited, for the recorded species see Table 2.

Table 2. Numbers of recorded species of hornworts, liverworts and mosses for each parish visited

Parish	Portland	St. Andrew	St. Ann	St. Mary	St. Thomas	Trelawny
Hornworts	1	3	0	1	1	0
Liverworts	94	115	22	10	96	30
Mosses	88	95	17	7	63	32

Crum & Bartram (1958) considered, that “a surprisingly large number of mosses have already been reported from Jamaica”. Their survey of the Jamaican moss flora contains 316 species “plus a number of trivial taxa”. Only the pleurocarpous mosses from the West Indies have been treated recently (Buck, 1998); this treatment has added 26 (+ 2 doubtful) new records for Jamaica. However, 21 species listed in Crum & Bartram (1958) in the meantime have been synonymized. The actual number of moss species of Jamaica may therefore be about 325. Considering this high number it is not too surprising that only two mosses were added to the moss flora of Jamaica: *Leptophascum leptophyllum* and *Rauiella praelonga*. Both represent new genus records, and *Leptophascum* is new to the West Indies.

Acknowledgements. For determination or confirmation of critical specimens we thank C. J. P. Bastos, Salvador da Bahia, Brazil (*Cheirolejeunea*), I. Bruggeman-Nannenga, Zeist, The Netherlands (*Fissidens*), S. R. Gradstein, Paris (*Bazzania*), J. Heinrichs, Munich (*Plagiochila*), P. Sollman, St. Annarochie, The Netherlands (Pottiaceae), and J. Váňa, Prague (Cephaloziaceae). J. Váňa is also thanked for fruitful discussions on *Jensenia* and various taxa of Cephaloziaceae.
