U.S.A.

Dear Emily

Dr. Pannell has recently given me a copy of the corrected version of the list of all *Aglaia* (Meliaceae) specimens examined at the Leiden herbarium, including their up-to-date determinations. I enclose a copy of it for use in curating your own *Aglaia* collection.

If you have any queries regarding the list it would be advisable to contact Dr. Pannell herself. If you write c/o The department of Plant Sciences, I will forward any correspondence to her.

With best wishes

Yours sincerely

Alison

U.S.A.

Dear Emily,

The *Aglaia* det. list which Alison Strugnell sent you last September may contain an error in the authority for *A. leucophylla*. It should be 'King' not 'A.C. Smith'. I hope that you have found it useful.

I shall be visiting the U.S. for year from 6 August and enclose my home addresses until 15 June next year. I shall be a Visitor in the relevant department / herbarium at both U.T. and University of Michigan, researching the literature on dispersal by animals which eat seeds and fruits.

With best wishes
Yours sincerely

Caroline Pannell

Subject: Aglaia determinations

Dear Emily

Stephen Harris has now sent the 60% complete list of Aglaia specimens I had on loan and a full list of FHO holdings. They are not arranged in the same way as the Leiden det. list which you already have, but I will forward the two messages containing the data, and the third which explains them, following this message. The name changes he refers to in message 3 should accurately convert to the accepted name via the index of my monograph except for the new species, for which you will need a conversion from the letters I used prior to publication. They are as follows:

W = A. australiensis Pannell
GG = A. brownii Pannell
FF = A. ceramica (Miq.) Pannell
Y = A. densisquama Pannell
AA = A. densitricha Pannell
B = A. erythrosperma Pannell
L = A. foveolata Pannell
EE = A. integrifolia Pannell
V = A. meridionalis Pannell
C = A. multinervis Pannell
R = A. penningtoniana Pannell
N = A. ramotricha Pannell
A = A. rugulosa Pannell
Z = A. subsessilis Pannell
BB = A. variisquama Pannell

I hope you will be able to make use of this new data - you may even be able to sort it into a more user-friendly format. If you would prefer a print out of the files as they have been sent, let me know.

Strugnell, A.M. and Pannell, C. M. 1987. "Correspondence re: Aglaia collections." *Aglaia inventories*
