

Indigenous Vascular Flora of the Wannon River Frontages from Wannon Falls Scenic Reserve to the Red Rd Bridge

**Species lists for 44 sections of Wannon River frontage and
nearby reserves, updated in October 2020**

Rod Bird

October 2020

NOTE

This is an updated account of the report published in February 2011, adding new records for several sections.

This report lists genera and species, together with associated common names. It does not contain the family listing component but does retain the 25 colour photographs of various key species that accompanied the 2011 text.

There have been many revisions of species and genus names over the last 10 years and attention has been given to updating with the latest botanic names listed in the Victorian Royal Botanic Gardens website *VicFlora*.

Some names will be altered in future years, as botanists subject certain species to further study. Care is therefore required in using this resource.

INDIGENOUS FLORA OF THE WANNON RIVER FRONTAGE AND RESERVES **(Wannon Falls Reserve to Red Rd Bridge)**

This report summarises surveys from 1975-1985, with additions in later years on Crown reserves (entries from 1986-1995, #; 1996-2005, \$; 2006-2010, Δ; 2011-2015, □; 2016-2020, ♦) for 44 areas of bushland along the Wannon, together with a flora list prepared for the "Wannon 18 Acre Reserve" by MG Corrick and the HFNC in 1968-69. Cliff Beaglehole assisted with surveys of W1-2, S4, T1-7, F2, F4, J1, J3, J5 & R1-4 (Feb. 1978).

Early surveys (1975-78) were conducted in preparation for the Land Conservation Council's assessment of the conservation significance, future status and management of Crown lands in the South-Western Area District 2 (1979, 1981, 1982). Some of the frontage areas surveyed are private land, held under very old titles. The list of flora for this freehold frontage is the least complete; further surveys will also reveal other species on the Crown frontage.

The objective of this report is to aid the preservation of the landscape, flora and wildlife of this unique 30 km river corridor. Notable plants include *Glycine latrobeana* (Clover Glycine), *Gahnia clarkei* (Tall Saw-sedge), *Dicksonia antarctica* (Soft Tree-fern), *Dodonaea cuneata* (Wedge-leaved Hop-bush), *Bossiaea riparia* (River Bossiaeae), *Dilwynnia cinerascens* (Grey Parrot-pea), *Pultenea dentata* (River Bush-pea) and rare outliers from the Wimmera in *Aristida ramosa* (Cane Wire-grass), *Triodia scariosa* (Porcupine Grass), *Pimelea stricta* (Gaunt Rice-flower), *Myoporum petiolatum* (Sticky Boobialla) & *Philotheeca angustifolius* var. *angustifolius* (Small-leaved Wax-flower).

Photo 1 (above) – Wannon Falls in Sept. 1996, from the Thomas Clark viewing area off Morgiana Rd. The Wannon Falls Scenic Reserve area W2 is the north side of the river (right side above). Area W1 lies across the river from the viewing stage at the falls. The river flows SE around a ridge on W1, then west.

Photo 2 (above) – A splendid scene among River Red Gums (*Eucalyptus camaldulensis*) on the Wannon River below the Rapids Flora Reserve near Bular. One tree bears the scar where bark has been cut away by Aborigines in time long past, to make a small canoe.
