November 2020 MAIL ORDER LIST

www.facebook.com/orchidphile
(203) 329-7255

Address all correspondence & orders to: orchidphile@optimum.net

(Please mention "Mail Order" in the subject line)

This list replaces & supersedes all previous lists. All orders are removed from sale in the order in which they are received (if your order is reserved with a credit card) & are subject to prior sale.

We only ship to the continental US (not Hawaii or Alaska) so prices are listed in US Dollars.

PHALAENOPSIS Categories are divided into:

Species, Multi-Floral Minis, Micro-Minis, "Big Lip" hybrids, Waxy (often Fragrant) Novelties & larger-flowering Classic Phalaenopsis in new colors & patterns

Other categories include MINIATURE VANDACEOUS, MINIATURE DENDROBIUMS & divisions of some of our select PAPHS, MINIATURE/COMPACT CATTLEYS and MISCELLANEOUS GENERA ~ all of which grow & flower happily with our Phals. Each genus is put into their own category after our Phal. listings.

Most plants are in 2.5-3" pots as first or second bloomers with a few larger plants noted as being in 4" pots. The bulk of our stock is currently growing in New Zealand moss unless otherwise marked.

ORDERING INFORMATION FOR OUR MAIL ORDER CLIENTS:

In the winter or during inclement weather, shipments may be delayed pending more moderate weather conditions. Shipping is either via FedEx Ground or Air depending on the final destination ~ these days Priority Mail requests are at the buyer's risk. We reserve the right to withdraw any offering from sale and to limit quantities. We guarantee all plants to be true to their identity to the best of our knowledge. However, since many come in from Taiwan, we have to assume they are properly labeled as to their species or hybrid name. We make no warranty as to the productiveness of any plants sold since everyone's growing conditions vary.

Although we do our utmost to pack carefully, we are not responsible for damage to buds or flowers if buyer specifically requests these plants ~ therefore, risk is assumed by buyer for buds or flowers shipped at this stage since factors beyond our control can contribute to flower or spike damage in transit. Safe arrival of a healthy orchid plant is guaranteed.

Packing & Shipping Charges:

A packing charge of approximately 10% of your order total, plus the actual shipping charge, will be added to your invoice.

We use FedEx Ground for most 1-3 day deliveries within our delivery zone (unless otherwise requested)

since Ground shipping rates are much more reasonable than FedEx Air or even USPS Priority Mail.

Distances greater than a 3-day Ground delivery will be sent via FedEx Air or Priority Mail (at your risk if requested).

If heat packs are requested, they will be provided for an additional \$4.50.

Additional Shipping Note: FedEx adds a surcharge of \$3.50 for "Home Delivery" so many of our clients choose to have their plants delivered either to their office or to a nearby FedEx Ship Center that accepts "Hold for Pickup" packages. In addition, during the colder/hotter months, if we ship to a business address or a "Hold for Pickup" location, your package is not exposed to being on the delivery vehicle for too long since Business or Hold for Pickup addresses get priority delivery, always before 5PM.

So we highly recommend choosing the "Hold for Pickup" option, saving the additional surcharge & further protecting the plants.

If you'd like, we can always research a FedEx location near you that accepts "Hold for Pickup" Ground or Express packages.

TO PLACE YOUR ORDER:

1 ~ Email your order, including your shipping address & phone number, to orchidphile@optimum.net

2 ~ **We cannot set aside orders until we have your credit card information to reserve your plants:**

As soon as we've confirmed receipt of your order, call us at (203) 329-7255 with your credit card info.

(This is in adherence to the same policy that all Websites require for orders.)

3 ~ We will then tag, remove your orchids from sale & arrange a shipping date:

PLEASE NOTE: Your card will **not** be charged until your order is packed & ready to ship since the carrier's shipping charges vary, based on box size & destination zip code.

Once your order is packed for shipping you will receive 3 separate confirmation emails:

Your Credit Card Receipt, your orchidPhile Order Receipt & your shipping Tracking Number

SIZE DEFINITIONS:

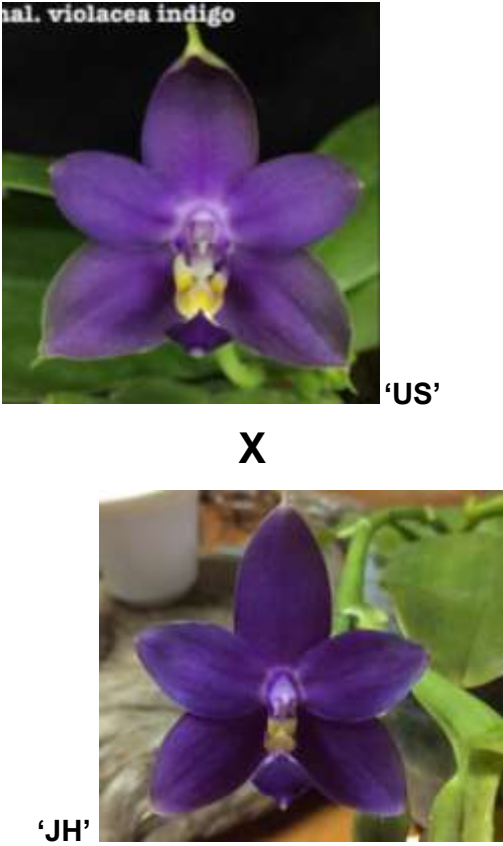

- PF** = Previously flowered & fully mature Blooming Size plants (multi-floral minis can flower more than once a year)
- B/F** = Currently in bud and/or in flower (one spike unless otherwise noted)
- B** = In bud (one spike unless otherwise noted)
- SP** = In spike, just initiating to medium spike stage (one spike unless otherwise noted)
- BS** = Blooming size (should flower in season)
- NBS** = Near blooming size (approximately 1 year to flowering in season)
- S** = about 2-3 years to first flowering

Please Note: Since our stock quantities are changing rapidly due to the current abundance of Covid19 mail orders, we are no longer noting quantities available on most stock since it can vary from one day to the next ~ this also helps avoid disappointment for everyone if we sell out of certain plants quickly. In case we are sold out of an orchid you might want, we can always suggest a substitute of something very similar.

PHAL SPECIES:

Most of our Phalaenopsis species are from Taiwan & reflect much improved forms & colors, having been sibbed or selfed using very select parents. Species like Phal. bellina, violacea, venosa, speciosa, gigantea, viridis and javanica are extremely slow to reach maturity & can be easily lost as small seedlings so we're only offering well-established Near Blooming or Blooming Size plants. As a result of their extra years to reach maturity, the pricing on these plants is higher than is usual for the quicker growing & more readily available Phal. species.

|--|---|----------------------|--------------|
|  | <p>Phal. aphrodite subsp. formosana 'A09001' (4N)</p> <p><i>(TETRAPLOID FORM of Species)</i></p> <p><i>A dynamite tetraploid form of this classic form of all Phal. species ! This clone is producing more compact leaves and much larger flowers than is typical for this subspecies of aphrodite. Its fuller form & beautifully round flowers with the petals almost touching carries heavy substance & produces a much longer-lasting display with a smaller leaf span than is typical for this species. And the bonus to this particular 4N strain is their naturally & gracefully cascading spikes with the flowers displayed to perfection, making for a stunning display !</i></p> <p>WINNER OF IPA BEST PHAL IN SHOW TROPHY !</p> | <p>BS/PF (1)</p> | <p>\$ 35</p> |

| PHOTO | NAME & DESCRIPTION | SIZE | PRICE |
|---|--|-------------------------------|---------------|
|  | <p>Phal. violacea fma. indigo (Sib of 'US' x 'JH')</p> <p><i>An exciting new sibling of the Indigo form which was created using two select Indigo strains of Phal. violacea indigo and which has produced some sensational progeny ! This new generation is the result of a careful selection of its parents based on their increased vigor and robust root systems, building on HP Norton & Krull Smith's original strains of Indigo violaceas. Beautiful richly colored fragrant flowers become their most intense indigo color in slightly cooler & brighter conditions in the spring & fall. What we love about this sibling is the attractively taller spikes creating a perfectly colorful & fragrant presentation. Like all Phal. violaceas, if their flower spikes remain green, do not remove them since they will continue to add buds right into the fall & at their next flowering in addition to creating a new spike or two !</i></p> <p>VERY FRAGRANT !</p> <p>ONE-OF-A-KIND SEEDLINGS !</p> | <p>SP/B</p> <p>NEW</p> | <p>\$ 115</p> |
|  | <p>Phal. zebrina (Sib cross of Palawan form of Species: 'MS' x self)</p> <p><i>Endemic to Myanmar, Thailand, Borneo & Sumatra, this rarely available & fragrant warm growing waxy species flowers from spring into the summer ! We've already flowered a couple from this sib cross & their flower size & crisp well-defined marks have been sensational. This species carries horizontal to erect 4+'' long spikes, producing over five 1 1/2-2'' waxy flowers. Light & temperature during bud/flower formation can affect the degree of its flower color intensity & this will also vary according to its particular bloom season. The flower spikes can remain green from one flowering to the next, continuing to add buds in addition to making additional new spikes in season !</i></p> <p>LIGHTLY FRAGRANT SPECIES</p> <p>ONE-OF-A-KIND SEEDLINGS !</p> | <p>BS</p> <p>NEW</p> | <p>\$ 65</p> |

PHALAENOPSIS HYBRIDS

Most of these clones are the result of cutting-edge Taiwanese breeding programs & are plants we've hand-selected from some of the most forward-thinking nurseries during our annual trips to Taiwan to judge their TIOS Orchid Show.

Many of the hybrids with a heavy Harlequin influence or red, yellow or orange in their breeding will show their boldest and most vivid colors when bloomed under cooler temperatures & brighter light during the fall & winter.

MULTI-FLORAL MINIS & MULTI-FLORAL MIDIS (including Harlequins & Splash-Petals):

Much to our amazement, many of our Minis & Midis have already spiked again for the second time this year ! This tendency to flower more frequently is due in large part to today's select breeding using more vigorous cutting-edge parents.

**** We're defining "MULTI-FLORAL MIDI" as those that produce flowers that are around 2 ½" to 3" in size.*

| PHOTO | NAME & DESCRIPTION | SIZE | PRICE |
|--|--|--|---------------------------|
|  | <p>Phal. Fuller's Gold Stripe 'A09168'</p> <p><i>Producing flowers slightly larger in size (2 ½") than the OX clone, its color is more intense due to a heavier overlay of the red candy striping, giving the appearance of orange ! These are vigorously growing plants as first bloomers with nice compact leaf spans. A definite step up from the older hybrid of Baldan's Kaleidoscope without the downside of that hybrid's large flowers, super tall spikes & huge leaf spans !</i></p> <p>MULTI-FLORAL MIDI ! TAIDA NURSERY, TAIWAN</p> | <p>SP 3 spikes !</p> | <p>\$ 42</p> |
|  | <p>Phal. KS Sweet Diamond 'Pink Salmon'</p> <p><i>(Ching Ann Diamond x Sogo Golden)</i></p> <p><i>A great mating of a multi-floral miniature with a waxy novelty producing a great new direction in this line of breeding ! Ching Ann Diamond, a rich pink multi-floral, brings floriferousness to this hybrid while Sogo Golden, a waxy yellow novelty flower, adds its heavy substance, also giving the flowers their beautiful sunset/salmon color. As with many of this type of breeding, cooler temperatures & brighter light produce an even more intense flower color. A sensational & extremely long-lasting display with glowing color !</i></p> <p>MULTI-FLORAL MIDI</p> | <p>BS/PF</p> <p>SP 3 spikes !</p> | <p>\$ 28</p> <p>\$ 42</p> |

|--|---|---|---------------------------|
|  | <p>Phal. Lioulin Berry 'LM123' <i>(Formosa Cranberry x Nankung's 4.55 PM)</i></p> <p><i>Lightly kissed with a touch of harlequin from both parents, its pristine chalk white flowers set off the burgundy accents to perfection ! Both parents are multi-floral miniatures, their flower size being under 2.5" & this clone can produce quite a floriferous display. Light & temperature differences as the buds form, or the time of year, can influence the intensity of its harlequin accents so often no two flowers may be exactly identical, always a fun surprise !</i></p> <p>HARLEQUIN MULTI-FLORAL MINI ! CAN FLOWER TWICE A YEAR !</p> | <p>B/F 2 spikes</p> | <p>\$ 35</p> |
|  | <p>Phal. Lioulin Violin 'A11402' <i>(Chian Xen Violin x Chia E Yenlin)</i></p> <p><i>This particular clone of Phal. Lioulin Violin is remarkably different from other clones of this hybrid with a strong doubled-up harlequin influence coming from both parents. The pollen parent, Chia E Yenlin, is further intensified by the addition of even more harlequin influence from its Chian Xen Violin parentage ! This is a real little stunner with elegantly tall spikes over nice compact leaf spans. As first bloomers they had already produced two branching spikes & after being cut back just 5 months ago, they're already spiking again. As they reach full maturity we're expecting them to show off with the ultimate harlequin bouquet !</i></p> <p>HARLEQUIN MULTI-FLORAL MIDI ! CAN FLOWER TWICE A YEAR !</p> | <p>BS/PF</p> <p>SP 2 spikes</p> | <p>\$ 25</p> <p>\$ 35</p> |

|  | <p style="text-align: center;">Phal. Liu's Berry 'Orchid House S.W.'</p> <p style="text-align: center;"><i>(Eduardo Quisumbing x parishii)</i></p> <p><i>Carrying the charmingly broad lips and flower size of the more difficult to grow species, Phal. parishii, this easy-to-grow hybrid has it all ! This clone of Liu's Berry has a gentle suffusion of soft pink outlining & dusting all its segments, each flower brilliantly accented with a rich fluorescent pink parishii-type lip. These little wonders had just finished flowering when they spiked again ! With a great compact leaf span & equally compact gently cascading spikes, this little gem fits easily into any collection & can flower twice or more a year !</i></p> <p style="text-align: center;">MULTI-FLORAL MINI ! CAN FLOWER TWICE A YEAR !</p> | <p style="text-align: center;">BS/PF</p> | <p style="text-align: center;">\$ 25</p> |
|  | <p style="text-align: center;">Phal. OX Happy Girl 'OX 1592'</p> <p style="text-align: center;"><i>(OX X-Ray x OX Little King)</i></p> <p><i>A select clone, for its rich color intensity, of this great new harlequin multi-floral midi ! The flowers on this clone are around 2 1/2" in size, beautifully presented on branching cascading spikes. The harlequin spotting pattern has fused to a rich blackened-burgundy and is quite a dramatic contrast against the pink and white background of the flower. While in just 2.7" pots, our first group of these had already flowered once with 2 branching spikes & just 4 months later were already spiking again. This particular group has produced amazingly robust thick spikes, leading us to believe their flowering will be sensationally branched. Can flower twice a year !</i></p> <p style="text-align: center;">BOLD NEW MIDI HARLEQUIN !</p> | <p style="text-align: center;">SP 2 spikes</p> | <p style="text-align: center;">\$ 38</p> |

|--|---|---|-------|
|  | <p>Phal. Pure Moon 'Green Pixie' <i>(Timothy Christopher x Brother Lawrence)</i></p> <p><i>Creating a virtual cloud of soft yellow-green, this multi-floral mini is an amazingly vigorous grower ! We also like the roundness of its flowers as opposed to the starry shape which is all too common in other yellow multi-floral miniatures. In addition, its pollen parent, Brother Lawrence, adds substance to the flowers providing a longer-lasting display. And the pod parent, Timothy Christopher, contributes to its amazing floriferousness. These flowered for the first time in just 2 ½" pots. As pictured on the top left from the Taiwan Show, it's also capable of producing basal keikis from a fully mature mother plant which, when all flower at the same time, produce an outrageous display !</i></p> <p>FRAGRANT ! MULTI-FLORAL MINI</p> | <p>SP 2 spikes \$ 33</p> <p>SP 3 spikes \$ 38</p> | |
|  | <p>Phal. Sogo Amar 'Amy Kuo' <i>(Nobby's Amy x Brother Amar)</i></p> <p><i>A totally delightful addition to our collection of multi-floral mini whites, crowned with a wonderfully yellow-enhanced lip ! Its 2" flowers are produced on compact spikes over equally compact leaf spans. Producing amazingly full form beautifully round flowers, rivaling some of the best full form flowers we only see in large standard whites, this is one superior mini to add to every collection. These just finished flowering, bearing 2 branching spikes in just 2.5" pots & are already spiking again ! Ideal for under-lights, windowsill & space-challenged growing !</i></p> <p>MULTI-FLORAL MINI ! CAN FLOWER TWICE A YEAR !</p> | <p>PF \$ 25</p> <p>SP \$ 33</p> <p>SP 2 spikes \$ 38</p> <p>NEW</p> | |

|--|--|--|---------------------------|
|  | <p>Phal. Sogo Arthur 'DSM307' <i>(Liu's Twilight Rainbow x Sogo Meili)</i></p> <p><i>This is one of the newest & most exciting cutting-edge directions in clear yellow multi-floral mini breeding ! Liu's Twilight Rainbow is a vigorous multi-mini from Mr. Liu's breeding program ~ mated with our favorite waxy yellow novelty, Sogo Meili, the result has been a multi-spiking new hybrid producing 2" brilliant yellow flowers in abundance on branching spikes, complete with the contrasting accent of a white heart around its column from the Sogo Meili pollen parent. The result has been a multi-floral mini with long-lasting heavy substance flowers presented in perfect proportion to the leaves. We also love its more upright leaf habit, making it a very compact grower. A fabulous little bouquet of bright sunshine ~ and thanks to its parentage, it can easily flower more than once a year !</i></p> <p>MULTI-FLORAL MINI ! CAN FLOWER TWICE A YEAR !</p> | <p>BS (1)</p> <p>NEW</p> | <p>\$ 38</p> |
|  | <p>Phal. Summer Rose 'Blue Star' HCC/AOS <i>(Kenneth Schubert x equestris fma. coerulea)</i></p> <p><i>Just granted a 79 point HCC/AOS to our client, Ginna Plude !</i></p> <p><i>A true cerulean blue multi-floral miniature with the blue coming from both parents ! Each flower is beautifully set off by a white column & intense velvety rich blue lip. These are amazingly vigorous & floriferous plants, capable of producing two or more branching spikes as they reach full maturity in addition to producing a keiki or two on a spike or basally. Its blue color will be more intense under warmer & shadier conditions ~ it can vary according to the time of year when it flowers with its best blue color showing from spring into summer !</i></p> <p>MULTI-FLORAL MINI CAN FLOWER TWICE A YEAR ! LIGHTLY FRAGRANT</p> | <p>SP/B <i>(with keiki)</i></p> <p>SP/B <i>(no keikis)</i></p> | <p>\$ 45</p> <p>\$ 38</p> |

|---|--|---|--|
|  | <p style="text-align: center;">Phal. Taida Blush 'Taida Pink Butterfly'</p> <p style="text-align: center;"><i>(Hilo Lip x Malibu Blush)</i></p> <p><i>As first bloomers in just 2.7" pots, these plants produced beautifully cascading spikes & are now spiking again ! With attractively & lightly mottled leaves, in perfect proportion to the spikes, this hybrid is a <u>much</u> easier grower than the difficult Hilo Lip, thanks to the pollen parent's influence. Yet it maintains that beautiful pristine white lip in contrast to the rich pink flower. And its softly mottled foliage from its Phal. schilleriana breeding background makes it a pleasure to enjoy year 'round. This one can't help but draw your eye from anywhere !</i></p> <p style="text-align: center;">MULTI-FLORAL MIDI</p> | <p style="text-align: center;">SP</p> <p style="text-align: center;">NEW</p> | <p style="text-align: center;">\$ 42</p> |
|  <p>OLD: original 'Taida Little Zebra'</p> <p>NEW: 'Taida Little Zebra <u>VA</u>' !</p> | <p style="text-align: center;">Phal. Taida King's Caroline 'Taida Little Zebra VA' AM/AOS</p> <p style="text-align: center;"><i>(Ever-spring King x Ho's Little Caroline)</i></p> <p><i>We just received an AM/AOS from the American Orchid Society for this spectacular clone ! VA is not a boo-boo on the clonal name of these plants ~ VA stands for "Variant" ! These are a mega SENSATIONAL clonal shift from the original older clone of 'Taida Little Zebra' (pictured at top). This fabulous shift has heavily emboldened the harlequin striping on the flowers, creating a stunning & dramatically dark presentation right to the tips of each segment. Same compact gently cascading spikes ~ same flowering habit ~ our photo doesn't even begin to show how dramatically marked & emboldened the flowers really are. A "gutsy" flower with even heavier substance, these are head & shoulders more stunning than the original clone of 'Taida Little Zebra' & are one of our specially selected "must have" favorites, flowering twice a year !</i></p> <p style="text-align: center;">CAN FLOWER TWICE A YEAR !</p> | <p style="text-align: center;">BS/PF</p> | <p style="text-align: center;">\$ 38</p> |

|---|---|--|-------|
|  | <p style="text-align: center;">Phal. Tying Shin Smart 'SF21'</p> <p style="text-align: center;"><i>(Sogo Lawrence x equestris)</i></p> <p><i>A great new "splash petal" multi-floral mini resulting from a clonal shift of the wildly popular Phal. Tying Shin Smart ! After bringing them in from Taiwan, the nursery told us that this clone has only produced a small percent of the plants that are blooming true to the splash-petal parent with the remaining stock reverting back to the original solid salmon multi-mini (top photo). And a few of the splash-petal plants have produced charming "peloric" flowers. Fabulous compact leaf spans with perfectly proportioned spikes, ideal for the space-challenged growers. We hand-selected those plants that were bearing leaves with dark striations on their reverse which is a guarantee that they will produce splash-petal flowers !</i></p> <p style="text-align: center;">MULTI-FLORAL MINI ! CAN FLOWER TWICE A YEAR !</p> | <p>SP \$ 42</p> <p>SP \$ 48 <i>2 Spikes</i></p> <p><i>ALL ARE SPLASH PETAL FORM (bottom photo)</i></p> | |
|  | <p style="text-align: center;">Phal. Younghome Golden Pixie 'YH0198'</p> <p style="text-align: center;"><i>(Sin-Yaun Golden Beauty x Yushan Green Pixie)</i></p> <p><i>One of the newest in FRAGRANT yellow-green multi-floral miniatures, this one is lightly dusted with soft spotting from its waxy novelty parent, Sin-Yaun Golden Beauty ! Phal. Yushan Green Pixie, the pollen parent, adds a touch of green to its non-fading yellow flowers. In addition to bringing a multi-floral mini habit to this hybrid, Yushan Green Pixie also gives it a heavier flower substance. Bearing wonderfully compact spikes in perfect proportion to its leaves, each flower is presented & spaced beautifully on each spike for the ultimate enjoyment. A bright shot of sunshine in a long-lasting display !</i></p> <p style="text-align: center;">FRAGRANT MULTI-FLORAL MINI ! CAN FLOWER TWICE A YEAR !</p> | <p>SP \$ 38 <i>2 Spikes</i></p> <p>BS/PF \$ 28 <i>(1)</i></p> <p>NEW</p> | |

| PHOTO | NAME & DESCRIPTION | SIZE | PRICE |
|---|--|---|-------|
|  | <p style="text-align: center;">Phal. Younghome Little Vermilion 'YH0044'</p> <p style="text-align: center;"><i>(Younghome Sunkist x Brother Oconee)</i></p> <p><i>Our newest & most exciting find, this multi-floral mini is RED ! A mix of an art shade multi-mini with a rich pink multi-mini has created a little wonder that readily produces 2 or more heavily branched compact spikes over very compact leaf spans. And thanks to its pod parent, its buds are very slow to open on the spikes with much longer-lasting flowers due to their heavier substance than is typical for multi-floral minis. When flowered in the cooler & brighter months, the flowers are rich red ~ when bloomed under warmer & shadier conditions, they're a deep pink-red due to their pink heritage. What we particularly love about this hybrid is the distinctive contrast of its white column against the red full-form flowers leading to a striking display. Can flower twice a year !</i></p> <p style="text-align: center;">MULTI-FLORAL MINI ! CAN FLOWER TWICE A YEAR !</p> | BS/PF | \$ 28 |
|  | <p style="text-align: center;">Phal. Younghome Sweety 'YH0007'</p> <p style="text-align: center;"><i>(Gan Lin Beauty x Taida Orange Gem)</i></p> <p><i>A slightly different clone of Phal Younghome Sweety as opposed to the clone 'YH0008' (below) ~ it carries just a hint of red striping over its bright yellow 2 1/4" flowers, perfectly finished with the same blood red lip ! However, the red striping is more lightly expressed in this clone, creating a central blush while allowing the yellow background of the flower to "shine" & revealing a central white heart right around the column. Its leaf span is also more compact than 'YH008'. Bottom line, 'YH0008' produces more of a sunset/art-shade flower while this clone, 'YH0007', is a brilliant shot of sunshine !</i></p> <p style="text-align: center;">MULTI-FLORAL MINI ! CAN FLOWER TWICE A YEAR !</p> | SP <i>2 Spikes</i> NEW | \$ 35 |

| PHOTO | NAME & DESCRIPTION | SIZE | PRICE |
|---|--|---------------------------------------|--|
|  | <p style="text-align: center;">Phal. Younghome Sweetie 'YH0008'</p> <p style="text-align: center;"><i>(Gan Lin Beauty x Taida Orange Gem)</i></p> <p><i>This multi-floral mini has taken after its Taida Orange Gem parent ~ a cross of Little Gem Stripes with Chian Xen Queen. Its multi-mini flower size is the result of the popular multi-floral mini parent, Little Gem Stripes, with Chian Xen Queen giving it the golden yellow color, lightly overlaid with red veining & a bold blood-red lip. Its harlequin pod parent, Gan Lin Beauty, has added its great substance to the flowers, leading to a longer lasting display of its abundant & multiple branching spikes. A beautiful arching presentation unique for this line of breeding !</i></p> <p style="text-align: center;">MULTI-FLORAL MINI ! CAN FLOWER TWICE A YEAR !</p> | <p style="text-align: center;">SP</p> | <p style="text-align: center;">\$ 28</p> |

“BIG LIP” & PELORIC HYBRIDS:

One of the most important factors in today's "Big Lip" breeding is a large flat lip that is almost identical to the petals ! We have seen some pretty poor hybrids in this new line of breeding over the past 2-3 years, with their "big lips" either cupped or crippled, or with the "lip" dropping so far down from the other segments of the flower that you could drive a truck right through it ! The clones we choose to carry must have a beautiful broad flat lip tucked right up into the flower itself so it gives the definite impression of a 3-petal ~ or 3-lip ~ flower. There have been only a few so far that meet those standards for us, & we're excited to be able to share some of them with everyone.

|---|--|--|--|
|  | <p style="text-align: center;">Phal. Charming Crystal Water 'F1287' FCC/AOS</p> <p style="text-align: center;">Grand Champion, TIOS 2018</p> <p style="text-align: center;"><i>(Tying Shin Valentine's Day x Fureshing Mark)</i></p> <p><i>Phal. Tying Shin Valentine's Day is a multi-floral miniature bearing its flowers in super abundance ~ mated with Fureshing Mark, a large "big lip" hybrid, Charming Crystal Water can produce multitudes of stunning pristine white 3+” flowers on branching cascading inflorescences ! Its flat and full lip truly resembles a third petal, filling in between the lateral sepals to absolute perfection ~ so perfect that it was awarded an FCC/AOS in addition to being Grand Champion at the TIOS Show in Taiwan (see photo). If you grow only one "Big Lip", this is THE ONE to own !</i></p> <p style="text-align: center;">MULTI-FLORAL MIDI !</p> | <p style="text-align: center;">SP</p> <p style="text-align: center;"><i>Just initiating ~ the perfect stage for shipping !</i></p> <p style="text-align: center;"><i>Husky plants in 4” pots in bark/NZ Moss mix</i></p> <p style="text-align: center;">NEW !</p> | <p style="text-align: center;">\$ 75</p> |

SUPER-MINIS ~ PERFECT FOR SPACE-CHALLENGED COLLECTIONS:

These smaller growing Phalaenopsis are ideal for tucking into any space-challenged collection. Their leaf spans are much smaller than those of multi-floral miniatures, & they produce multitudes of smaller charming flowers. Many have been bred from smaller flowering or growing Phalaenopsis species like Phal. lobbii, parishii & pulcherrima ~ and they usually flower more than once a year, with many from this type of breeding continuing to add additional buds & flowers on previously bloomed spikes while continuing to add an additional new spike or two. As we add more of these to our collection, we'll update their listings here.

WAXY ~ OFTEN FRAGRANT ~ BRIGHTLY-COLORED NOVELTIES:

This group of Waxy Novelty includes limited Stem Props & Poly Props from Taiwan. As mentioned under Phal. species, due to the heavy influence of the slower-growing species of Phal. bellina, violacea, lueddemanniana, amboinensis & venosa in their breeding backgrounds, it often takes an additional year or two for these hybrids to reach flowering size as opposed to a standard Phalaenopsis. But once they do, they're well worth the wait for their vivid color, thick long-lasting waxy flowers & amazing fragrances. They also have a tendency to produce basal keikis from the mother plant for the ultimate presentation. In addition, many of these Novelty-type hybrids improve even more in their color intensity and size while adding fuller form on their 2nd & 3rd flowerings. They will often retain previously flowered green spikes, continuing to add more buds to them, while still producing additional spikes ~ within a couple of years these plants can be surrounded with multiple spikes in full flower for a sensational show to please all the senses !

OF SPECIAL NOTE: *With many of the blue, red or orange novelties, differences in light & temperature at various times of the year can cause some variation in the flower color and/or intensity of their markings. Under warmer temperatures & more shaded conditions in the summer, many red novelty-type hybrids with yellow or orange in their breeding background will flower showing more of the influence of those colors. Under cooler temperatures & brighter light in the fall to winter months, the red pigment in the flowers is more strongly expressed resulting in solid to nearly solid red flowers. Plus, many of the Novelty-type hybrids with Phal. bellina and/or violacea in their breeding background improve in color intensity and size, with even fuller form, on their 2nd & 3rd flowerings, just like their species parents.*

|  | <p>Phal. LD Passion Boy 'Mituo #1' <i>(Brother Ambo Passion x Yaphon Goodboy)</i></p> <p><i>With two heavily barred parents, this select clone of LD Passion Boy, chosen for limited stem-props by Mituo Orchids, has emboldened its parents' barring while still leaving a generously delightful bright yellow background visible ! As with many of the best novelties today, its breeding background boasts Phal. venosa, mariae, amboinensis & micholitzii ~ giving non-fading color & a delightful fragrance. Capable of producing multitudes of 6cm flowers on each spike, they're held gracefully above the foliage for the ultimate in presentation & viewing !</i></p> <p>STEM PROP FRAGRANT WAXY NOVELTY !</p> | <p>B/F (2)</p> <p>NEW !</p> | <p>\$ 95</p> |
|  | <p>Phal. Mituo Green Canaries 'Mainshow' <i>(Mituo Diamond Canary x Yungho Gelb Canary)</i></p> <p><i>This is one "gutsy" novelty that never fails to please with its yellow-green flowers accented by bold blotches centrally ! We've always loved what Yungho Gelb Canary contributes to its progeny by creating fuller form in its novelty progeny ~ its surprise central harlequin blotching comes from the barred Phal. amboinensis & harlequin parent, Haur Jin Diamond, in its breeding background. Truly dramatic !</i></p> <p>STEM PROP FRAGRANT WAXY NOVELTY !</p> | <p>BS (2)</p> <p>NEW !</p> | <p>\$ 95</p> |
|  | <p>Phal. Yaphon Hsiangor 'Yellow #1' <i>(Nobby's Green Eagle x Yaphon Hero)</i></p> <p><i>Another great new hybrid from the proven & heavily used parent, Phal. Nobby's Green Eagle, combining all the best of our most favorite & fragrant waxy novelty species ~ amboinensis, violacea, micholitzii & venosa ! This limited Stem Prop produces beautiful clear yellow flowers, each offset by a central white halo & white lip ~ and its great compact round leaves create the perfect backdrop for its amazingly fragrant flowers !</i></p> <p>STEM PROP FRAGRANT WAXY NOVELTY !</p> | <p>PF (1)</p> | <p>\$ 95</p> |

MICRO-MINIS ~ PERFECT FOR SPACE-CHALLENGED COLLECTIONS:

These smaller growing Phalaenopsis are ideal for tucking into any space-challenged collection. Their leaf spans are much smaller than those of multi-floral miniatures & they produce multitudes of smaller charming flowers. Many have been bred from smaller growing Phalaenopsis species like Phal. lobbii, parishii & pulcherrima ~ and they usually flower more than once a year, with many from this type of breeding continuing to add additional buds & flowers on previously bloomed spikes while continuing to add a new spike or two. As we add more of these to our collection, we'll update their listings here.

SELECT ONE-OF-A-KIND NOVELTY SEEDLINGS:

Many of our novelty or select seedlings flowered for the first time for us this spring into fall ~ and with Phal. bellina in the background of many, as first bloomers they will initially produce only 1-3 flowers on their first spikes. This type of breeding is extremely slow to reach flowering-size maturity due to the heavy influence of the slower-growing & fragrant waxy Phal. species in their breeding background.

With these waxy novelties, we leave any still-green spikes on the plants since they will most likely add more buds to these spikes in addition to producing new spikes at their next flowering. Some people choose to remove the initial spikes & give the energy back to the plant. However, we've never noticed (with this novelty-type breeding) that it makes much difference in the overall vigor of the plant since their parentage carries the habit of retaining older spikes. Also, their flower form, color and size improve enormously with their 2nd & 3^d flowerings. But ~ the real bonus to owning a One-of-a-Kind plant is that you can give it your own clonal name !

As they flower we number & photograph each one for sale ~ they'll be showcased on our monthly Mail Order Lists in addition to being shared on our Facebook page & when available, on the Facebook page of Orchids, Trade & Sale. Keep your eyes open for these postings since once released, these select plants often sell quickly.

|  | <p style="text-align: center;">Phal. Penang Girl <i>(venosa x violacea fma. indigo)</i></p> <p><i>This seedling population has been amazingly consistent in the wonderfully fragrant sunset/art shade flowers it has produced ! Phal. venosa, the pod parent, has given these a coppery-green background, bearing the typical venosa halo around the column ~ and being overlaid & suffused with the violacea fma. indigo parent, the result has been fragrant waxy flowers in dark salmon to rich sunset tones with great form. As a finishing touch, violacea fma. indigo has also added a "blue" touch to their lips. Its compact spikes are initially produced just above the compact leaf spans ~ those spikes can remain green, continuing to elongate by adding buds & flowers in addition to producing additional spikes in season. A great long-lasting shot of color & fragrance for any collection !</i></p> <p style="text-align: center;">ONE-OF-A-KIND SEEDLINGS !</p> <p style="text-align: center;">FRAGRANT WAXY NOVELTY</p> | <p style="text-align: center;">SP/PF</p> | <p style="text-align: center;">\$ 75</p> |

Phal. Gelblieber has always been one of our favorite parents in new generations of novelty breeding for its ability to pass on full form flowers to its progeny. This hybrid has been no exception to that tendency ~ add the dramatically bold barring from Macassar, and it has produced a great new generation of fragrant waxy novelties !</i></p> <p data-bbox="711 1528 1101 1554">FRAGRANT WAXY NOVELTY !</p> <p data-bbox="712 1564 1099 1589">ONE-OF-A-KIND SEEDLINGS !</p> | <p data-bbox="1211 1031 1252 1094">PF (1)</p> | <p data-bbox="1365 1031 1442 1060">\$ 55</p> |

OTHER GENERA WHICH GROW & FLOWER HAPPILY UNDER PHALAENOPSIS CONDITIONS

MINIATURE VANDACEOUS:

All these species & hybrids grow & flower easily WITH our Phals under the same light & temperature conditions since they are miniature growers, requiring much lower light than their larger-growing & flowering cousins. We're growing them in small plastic baskets, with just a little media in the bottom of each basket, to allow their roots to dry slightly between

waterings. We then rest the rims of these little baskets onto the rims of deep rose pots, allowing the roots to continue to grow down from the basket into the empty bottom of the rose pot. This is our own approach to the growing method of "collaring" which the Vandaceous seem to love. These are mostly miniature ~ with a few compact ~ growing species & hybrids, many of which will readily form basal keikis to become beautiful specimen miniatures producing multitudes of spikes at the same time on all of their mature growths. And many of them are also delightfully FRAGRANT !

PAPHIOPEDILUMS:*

Many of our Paphiopedilums are divisions of select plants from our own collection ~ and are growing and flowering under the same conditions as our Phalaenopsis. Our particular favorites are miniatures from the parvi family, especially those with micranthum, armeniacum & delenatii as parents, and the larger growing, always grand & showy multiflorals, using philippinense or rothschildianum as parents. Pricing will vary according to the number of growths of each division/plant. Number of growths for each provided on request.

|  | <p>Paph. philippinense 'orchidPhile'</p> <p><i>(Multi-floral Species)</i></p> <p><i>We just love this multi-floral species for its colors, its bold striping and floriferousness ~ not to mention its fabulously spiraling long petals ! A great vigorous & compact grower with equally compact inflorescences just loaded with flowers.</i></p> <p><i>DIVISION OF OUR SELECT CLONE</i></p> | <p>BS (1)</p> <p><i>NEW !</i></p> | <p>\$ 125</p> |
|  | <p>Paph. Temptation 'orchidPhile'</p> <p><i>(kolopakingii x philippinense)</i></p> <p><i>This particular clone of Paph. Temptation has been an amazingly easy grower ! Another multi-floral hybrid which is slow to reach flowering maturity, we were struck by its crisply defined dorsal sepal & charmingly twisted petals ~ its beautifully spaced flowers are presented proudly on tall inflorescences. This stunning multi-floral hybrid has already been the recipient of 42 AOS awards !</i></p> <p><i>DIVISION OF OUR SELECT CLONE</i></p> | <p>NBS (1)</p> <p><i>NEW !</i></p> | <p>\$ 95</p> |

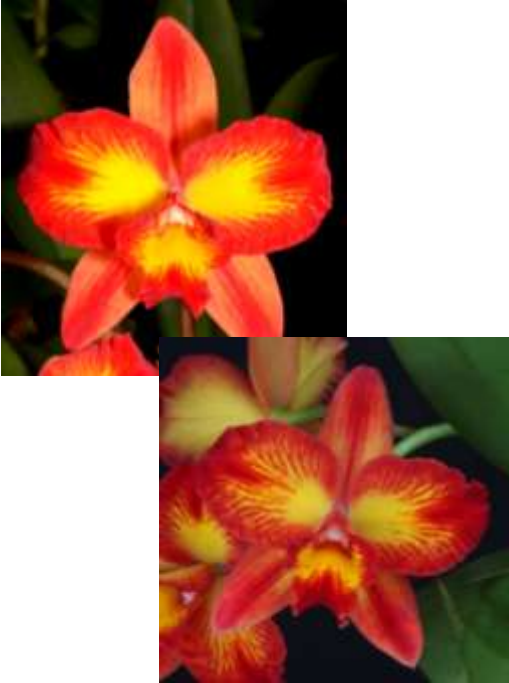

MINIATURE TO COMPACT CATTLEYS:

We've expanded our collection of miniature to compact Cattleyas (many of them Tetraploid breeding) for their ability to thrive & flower under the same conditions as Phalaenopsis, in addition to many of them rewarding us with twice a year blooming ! Contrary to popular belief, they don't require the same high light that larger members of the Cattleya family need & they're happy growing under warm to intermediate temperatures. Also, their flower color intensifies after a few days from first opening as each flower fully matures. They're the perfect addition to any collection, especially collections that are space, windowsill & under-lights challenged, because they're easily tucked between larger plants, taking up little or no room at all.

|  | <p style="text-align: center;">Brassavola Little Stars 'Yasuji Takasaki' <i>(nodosa x cordata)</i></p> <p><i>Delightfully fragrant at night, this primary hybrid is even more floriferous & easy to grow than its "Queen of the Night" Brassavola nodosa parent ! Free-flowering, it can bloom twice a year or more with clusters of light green flowers bearing large 1 3/4" broad crystalline white heart-shaped lips, readily becoming a specimen within a year or two ~ our specimen plant of this is again flowering after having just finished its February blooming. Give it high Phalaenopsis light and allow for good drainage to the point where the medium begins to dry out. We've grown these in bark mixes in a pot & in New Zealand moss in a plastic basket with no problems either way. Its terete leaves indicate it doesn't need high humidity ~ and if getting enough light, it will show red spots on its leaves. The flowers are as large as nodosa but the pollen parent, cordata, has increased its flower count to 6 or more flowers per spike. A compact & forgiving grower with an amazing fragrance that can bloom more than twice a year !</i></p> <p style="text-align: center;">FRAGRANT !</p> | <p style="text-align: center;">BS</p> <p><i>2" pots in bark</i></p> <p style="text-align: center;">NEW !</p> | <p style="text-align: center;">\$ 33</p> |
|  <p style="text-align: center;">X</p> | <p style="text-align: center;">C. (Beaufort 4N x Small World 4N) TETRAPLOID POPULATION</p> <p><i>Adorable tetraploid 3" yellows with a large amethyst lip, dramatically accented with dark amethyst-magenta spots from the tetraploid Tokyo Magic ! Again, a new hybrid using our favorite C. Beaufort, the tetraploid form, as the pollen parent which rounds out the flowers of its progeny. Expect multiple flowerings per year with bright yellow long-lasting blooms. Another "just too cute" fragrant miniature Cattleya for every space-challenged collection !</i></p> <p style="text-align: center;">FRAGRANT ! MINIATURE/COMPACT TETRAPLOIDS! ONE-OF-A-KIND HYBRIDS !</p> | <p style="text-align: center;">NBS/BS</p> <p><i>2" pots in bark or moss</i></p> <p style="text-align: center;">NEW !</p> | <p style="text-align: center;">\$ 33</p> |

|  | <p>Procatavola Key Lime Stars (Prov.) <i>(Epc. Lime Sherbert x B. nodosa)</i></p> <p><i>Expect lime green flowers bearing a huge white lip, kissed with a lime green throat ! We love B. nodosa hybrids for their exotic night-time fragrance & this new hybrid is no exception. The result of this mating shows off with the best of both parents, especially their easy-to-grow ability. Lime Sherbert contributes the green petals & sepals while nodosa brings in the large lip. And the flowers are huge in relation to the plant size itself. These have been flowering for the first time in just 1 ½" pots ~ and they're more than capable of exploding in growth to become a specimen in no time at all. Blooming is usually around September-October, but they've also been known to flower for a second time in the spring, just like their B. nodosa parent. Give them a good draining mix & allow them to approach dryness before watering again.</i></p> <p>FRAGRANT MINIATURE/COMPACT ! ONE-OF-A-KIND HYBRIDS !</p> | <p>BS 2" pots in bark or moss</p> <p>NEW !</p> | <p>\$ 33</p> |
|  | <p>Rth. Shinfong Little Sun 'Youngmin Golden Boy' AM/AOS <i>(Catt. Golden Girl x Taida Love Star)</i></p> <p><i>Exceptionally brilliant orange flowers are produced over this hybrid's great compact foliage ! We like this clone even more than Pot. Young-Min Orange for its fuller form & longer-lasting flowers accented with a beautiful concolor ruffled lip. Husky multiple growth plants are now maturing their new growths in preparation for creating their new flower sheaths. If you want only one orange miniature Cattleya, this is the one !</i></p> <p>MINIATURE !</p> | <p>BS 2" pots in NZ moss</p> <p>NEW !</p> | <p>\$ 38</p> |

OTHER GENERA ~ ONCIDINAE & MISC SPECIES & HYBRIDS:

All the plants listed below grow & flower easily WITH our Phals under the same light & temperature conditions since many are miniature growing species or hybrids, requiring much lower light than their larger cousins – they can put on quite a show for their compact size ! In addition, most of our Oncidinae can also be grown under intermediate conditions with bright Phalaenopsis light.

As a side note, all the Oncidinae are growing in New Zealand moss which they seem to love ~ we never would have believed they would do so beautifully in this medium ! The moss not only helps maintain a nice even moisture in the pot, but it also helps the plant retain plumper pseudobulbs while adding to the vigor of the plant's new growths. We've been amazed at the difference the moss makes for all these plants as opposed to growing them in a bark mix.

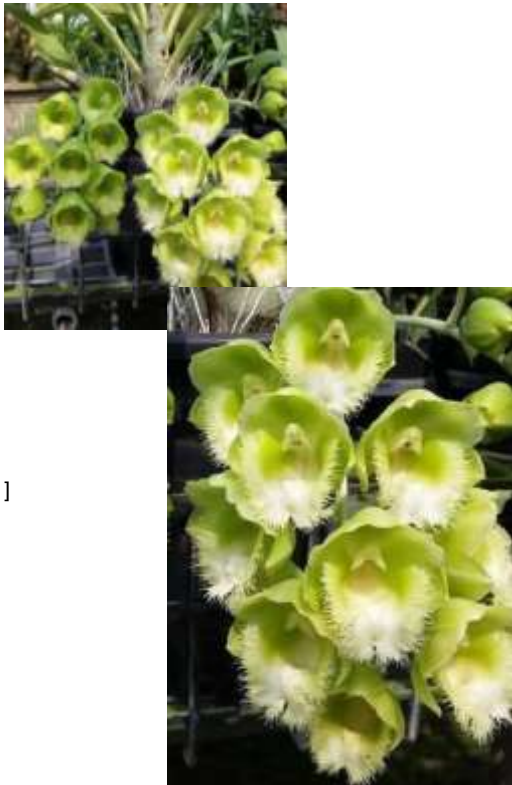

As you will see, we're extremely fond of the Brassia-type Oncidinae from this section of the Oncidium family, choosing to carry many of its hybrids, both miniatures and standards, for their truly exotic displays of long-lasting waxy fragrant flowers ~ they simply redefine the word "exotic" for us.

See our "Bench Clearing Specials" on plants which are now maturing their new growths for spiking in the next month or two.

|  | <p style="text-align: center;">Bst. (Brassostele) Tarantula 'Sweet Orange'</p> <p style="text-align: center;"><i>(Brassia aurantiaca x Summit)</i></p> <p>Brilliant orange Brassia-type 2 ½" flowers are gracefully displayed just above its miniature 11" foliage for a stunning presentation ! These plants were first bloomers but in another year or two, with multiple new growths & spikes, will be an outstanding shot of color in any collection. As a bonus, they produce a sweet citrus-like fragrance & can flower twice a year or more. At every show we sell out of these within the first two hours thanks to their miniature habit & brilliant orange color. And, yes, because it's a miniature, it does bloom at least 2 times a year or more. A great & very compact grower with amazingly vivid color & a delightful fragrance !</p> <p style="text-align: center;">FRAGRANT MINIATURE !</p> | <p style="text-align: center;">PF</p> <p><i>2.25" rose pots – ready to shift into slightly larger pots</i></p> | <p style="text-align: center;">\$ 38</p> <p style="text-align: center;">Bench Clearing Special - \$28</p> |
|  | <p style="text-align: center;">Chysis limminghei</p> <p style="text-align: center;"><i>(MINI Species)</i></p> <p>An adorable species, endemic to Mexico, which just loves warm to hot conditions ! When each new growth matures, it sends out a pendulous, robust inflorescence bearing fragrant, waxy, long-lasting flowers up to 3" in size. Large showy flowers can literally dwarf the miniature size of the plant and pseudobulbs. We've found that this little species is amazingly easy to grow & flower under Phalaenopsis conditions. The leaves will drop in the fall after flowering, at which point we reduce watering & fertilizing through the winter, but we do recommend keeping the medium damp to avoid shriveling its pseudobulbs. With the onset of new growth in the spring, we resume normal watering/fertilizing. This species does not like to be repotted with any great frequency so we wait until new growths are literally overflowing the pot to shift them up to the next larger size.</p> <p style="text-align: center;">FRAGRANT WAXY SPECIES ! |  | <p>Clowesetum Rebecca Express 'M' (Cl. Rebecca Northen x Ctsm. expansum)</p> <p><i>Easily grown under Phalaenopsis conditions, this is one outrageous new green-flowered hybrid mating the best of two worlds ~ the green of expansum enhanced by the frilly lip of Rebecca Northen ! Its wonderful fragrance comes from both parents with Ctsm. Rebecca Northen, which smells like grapefruit, combined with the sweet fragrance of Ctsm. expansum. Allow them to dry slightly between waterings while in active growth & flowering. After they've lost their leaves & have finished flowering, reduce water & fertilizer, keeping the medium just damp enough to avoid shriveling of their pseudobulbs. At the onset of new growth, accompanied by new roots, resume normal watering & fertilizing. One of the most exotic of exotics !</i></p> <p>FRAGRANT !</p> | <p>BS (1) 4" pot</p> <p>NEW !</p> | <p>\$ 48</p> |
|  | <p>Fredclareara After Dark 'Sunset Valley Orchids' FCC/AOS (Mo. Painted Desert x Ctsm. Donna Wise)</p> <p><i>Easily grown under Phalaenopsis conditions, this particular clone of Fredclareara After Dark produces tawny green flowers, heavily spotted maroon over all ! Its heavy substance flowers with a waxy texture lead to a long-lasting display. In 2005 this plant was the recipient of the Merritt W. Huntington Award as the most outstanding plant that had been granted an FCC/AOS. When awarded with its FCC, it was vigorously displaying 48 flowers on three pendant inflorescences, all emerging from just one pseudobulb ! A great exhibit plant and a stunner when in flower. These plants are now just completing their new leafy growths in preparation for fall/winter flowering.</i></p> <p><u>Of special note:</u> We shifted our exhibit plants of Fredclareara into New Zealand moss as an experiment to keep the deciduous growths plump & have noted that its even moisture supply helps keep the older pseudobulbs from desiccating while giving increased vigor to the new growths. We have since moved all our stock of this type into NZ Moss & they're happily thriving !</p> | <p>PF/BS 4" pot</p> <p>Last one</p> <p>Large multiple growth plant</p> | <p>\$ 45</p> |
